half of whom are young ladies.

Highest advantages in all departments. Buildings heated by steam, and lighted by electricity.

NEWS NOTES.

Judge Deroche, has returned from a trip to Europe.

Leon Morane the French aviator, reached an altitude of 8,471 feet in France.

A landslide occurred at Cobalt, and a work train of four cars slid into the lake.

Peter McDonald was nearly drowned at Detroit while trying to walk on the water of the river.

Woods defeated Longboat in a fifteen mile race at Montreal, Monday, by about thirty feet.

Sir Wilfrid Laurier returned to Ottawa from his western tour, and received a great welcome at the station.

Thieves broke into the vault of the Nova Scotia mine, Cobalt, and stole twenty-seven bars of silver valued at \$27,500.

The demand for men in the west is still keen, although ten thousand harvesters already have arrived from the east.

Mrs McWilliams, an aged lady, residing on William street, Belleville, fell and broke her hip bone. Her condition is serious.

Graham White, the British aviator, gave a remarkable demonstration of bomb-throwing from an aeroplane at Atlantic, Mass.

James Darden, who was accidentally shot by his son while the boy was cleaning an old gun, died in Victoria Hospital at Montreal.

Miss, Dorothy Hobson of Hamilton, who was injured in an automobile accident two months ago, died in the hospital from her injuries.

Since the outbreak of the epidemic this year 133,601 cases of cholera, with 64,405 deaths, in Russia, have been officially reported.

In a speech in Iowa Theodore Roosevelt commended the work of the Tatt Administration in negotiating a tariff agreement with Canada.

There will be the usual advance of one per cent. per quart in the price of milk in Toronto for the winter months commencing November 1st.

A jury at Gretna, Man., returned a verdict indicating murder in the case of C. Hiebert, who was found dead in his house with a wound in his head.

Some forty-eight persons, many of them accused in first degree of murder, are on trial at Newark, Ohio, in connection with the lynching of a private detective in July.

The Dominion Alliance has had to make a deposit of \$1,440 to cover the cost of writs to be issued against Montreal hotel-keepers detected of selling liquor on Sunday.

Brookville has another theatre. The large skating rink has been converted into a playhouse. The seating capacity of the place is over 2,000. It will be used while the old Brookville Opera House is being remodelled.

Mr. Orvid Jacobson, Norwegian Consul at Montreal, warns his fellow-countrymen against coming to Canada to work on railway construction, on the ground that contractors do not treat their men fairly, and the precautions against accident are not properly observed.

From present indications Lennox County Fair at Napanee on Thursday and Friday, September 15th and 16th, promises to be better than ever. A large number of prizes are offered for all classes of stock, vegetables, fruit, ladies' work and everything that goes to make the Fair attractive.

Mrs. Jessie Smith, Kingston, was almost instantly killed at London by falling down stairs at the home of her daughter, Mrs. Rev. James Rollins, where she had been visiting with her daughter and son-in-law. She returned about 11 o'clock from the King

LENNOX FAIR

Thursday and Friday

Sept. 15, & 16,

Thursday and Friday next will be banner days in Napanee, the attraction being the Annual Fall Show of the Lennox Agricultural Society. Increases in prize moneys, and the fact that the growth of garden products this year have been unusually good means that the exhibits at the show will be as good, if not better than any previous year. If the weather man hands out suitable weather the show this year will eclipse anything in the history of the society. Make it a point to attend.

Baby Show.

Don't forget the Baby Show on the evening of Thursday, the 15th. Everybody gets double their money's worth sight-seeing at the show.

SPECIAL PRIZES

Contributed to the Lennox Agricultural Society for 1910.

MERCHANTS' BANK OF CANADA—Sterling Silver Cup, for best heavy draught foal of 1910. Cup to be held by winner for one year. If it is won twice, it becomes the property of winner. Now in possession of S. G. Hogle, Violet.

Notice is hereby given that I have transmitted or delivered to the persons mentioned in section nine of "The Ontario Voters' Lists Act" the copies required by said section to be so transmitted or delivered of the list, made pursuant to said Act, of all persons appearing by the last revised Assessment Roll of the said Municipality to be entitled to vote in the said Municipality at elections for members of the Legislative Assembly, and at Municipal Elections; and that the said list was first posted up at my office in Richmond, on the 6th day of Sept., 1910, and remains there for inspection.

And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law.

ABRAM WINTERS,
Clerk of said Municipality.
Richmond, Sept. 5th, 1910.

RE-OPENING

Schools will re-open
in a few days,

All Successful Entrance Pupils

will need a quarty of new books. Don't buy any until schools open as there are several changes.

For the Public Schools there are at least three new books wanted. One of them—the Geography—is ready now. The other two—the Arithmetic and Grammar—will be ready for school opening.

Before buying any new books consult Paul who keeps posted in all school changes.

We try to keep everything a pupil needs for school, making a specialty of Scribblers and Exercise Books, Pencils, and the regular line of Text Books. Give me a call.

PRINCIPAL DYER, D. D.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Supplying Coal for the Dominion Buildings," will be received until 4 p. m., on Tuesday, August 3, 1910, for the supply of coal for the Public Buildings throughout the Dominion.

Combined specification and form of tender can be obtained on application at this office. Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so or fail to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Asst. Secretary.

A Wedding Present.

If you are unable to decide what will be most suitable for the occasion we feel confident that if you will inspect our fine assortment of Hanging, Banquet and Electric Lamps the question will be settled at once.—The Medical Hall—Napanee's Largest Drug Store.—Fred L. Hooper.

Peter Remilong, of Glennellin, North Dakota, arrested a month ago by the mounted police, charged with the murder of a homesteader at Waish, Alta., has been cleared of the charge he having satisfied the police that he was not in the vicinity at the time of the murder.

Fair at Napanee on Thursday and Friday, September 15th and 16th, promises to be better than ever. A large number of prizes are offered for all classes of stock, vegetables, fruit, ladies' work and everything that goes to make the Fair attractive.

Mrs. Jessie Smith, Kingston, was almost instantly killed at London by falling down stairs at the home of her daughter, Mrs. Rev. James Rollins, where she had been visiting with her daughter and son-in-law. She returned about 11 o'clock from the King Street Presbyterian Church, where Mr. Rollins had been tendered a reception by the congregation on returning from his vacation. In the fall Mrs. Smith's neck was fractured, and she died in a few minutes.

When the steamer Alexandria reached Kingston Monday evening the police were called to take charge of a deckhand named Tweddell, who tried to commit suicide by jumping overboard near Bath. The steamer came about when the cry of "man overboard" was raised and picked Tweddell up. When Tweddell entered the water he evidently changed his mind and swam about for some time until rescued in an exhausted condition.

The Brockville police were asked to be on the lookout for a man who held up the night operator of the G. T. R. at Prescott. The man is alleged to have placed a gun under the nose of the operator, but when refused money, he showed the white feather and disappeared. A provincial officer traced him to Brockville. After that the trail was lost. The stranger is described as being six feet tall, shabbily dressed, and talks with a slight impediment in his speech.

An Exchange Says:—The other day a Deseronto man nearly lost his eye through thoughtlessness on the part of his wife. Their little boy has an air-rifle that he is in the habit of using frequently. The lad is always very careful to see that the rifle is never put away loaded. To avoid the possibility of it being put away loaded he fires it off to make sure. One day he happened to be using it, and laid it down while he went about something else. His mother thinking the rifle was unloaded, laughingly pointed it at her husband and said: "Shut up, or I'll shoot you," and pressed the trigger. "I guess you have, all right," responded the husband as he put his hand to his forehead and felt a small round hole which the shot had made. His wife probed the wound and got the shot out and drew the hole together. The results were not serious, but had the shot struck an inch farther down, in all probability the man would have lost his eyesight.

A. S. Kimmerly has full stock of choice alfalfa, red clover, timothy seed, and Manchuria barley. I pay 18c for eggs. 19 lbs granulated sugar \$1. Five Roses Flour has no equal; good flour \$2.00. 8 lbs sulphur 25c.

J. L. BOYES,

TOWN COUNCIL.

Council Chamber,
Sept. 6th, 1910.

Council met in regular session on Tuesday evening, Mayor T. W. Simpson in the chair.

Present—Reeve Alexander and Councillors Meng, Osborne, Waller and Kimmerly.

W. A. Grange, the clerk, was unavoidably absent, and Mr. A. B. Root acted as clerk for the evening.

A petition was presented from Thos. Wilson, H. R. Savage, W. Bullion, J. Briggs and P. Normile asking for a cement walk on the west side of Robert street, from Miss Catherine Sharp's property to Thomas street, said walk to be laid down outside the trees, and built under the usual terms, namely the property owners to pay half the cost.

On motion of Councillor Kimmerly and Reeve Alexander the prayer of the petition was granted, and a by-law ordered prepared confirming the same.

Coun. Waller, chairman of Streets Committee, said he thought for economy sake the services of one of the street sprinklers could be dispensed with particularly at this season of the year. He would like an opinion from the council concerning the same.

Councillor Steacy entered. No action was taken on Councillor Waller's suggestion, but the general opinion of the council seemed to be that the Streets Committee had power to decide the question as they saw fit. Councillors Osborne and Steacy moved that the Mayor and Clerk be authorized to sign a contract with the Bell Telephone Co. for a telephone to be installed in the home of Mr. John Fish in Clarksville, to be used as a fire alarm. Owing to the absence of some re-

ADDRESS AND PRESENTATION.

Rev. J. R. Conn, pastor of the Presbyterian Church, left this week for Cannington to take charge of the Presbyterian congregation there. Rev. Conn has occupied the pulpit here for seven years and his leaving is regretted, not only by his own congregation but by the citizens of the town. Mr. Conn is a fine type of a Christian minister and a ripe scholar, and during his residence here has made a host of friends. On the evening of his departure he was presented with tangible evidence of the high appreciation of his ministry here. Mrs. Conn was also remembered and her departure is likewise regretted. They leave with the best wishes of all. The following address and a handsome sum of Gold was presented to Mr. Conn.

To REV. J. R. CONN, M. A.

Rev. and Dear Sir,—On behalf of your many friends we present you, on the eve of your departure, this token of their respect, good will and affection.

During your pastorate here you have won the highest esteem and regard by your uniform Christian department, your zeal and sympathy for every good cause, and your admirable and thoughtful discourses. We therefore feel a keen sense of the loss suffered by the breaking of the pastoral tie.

We wish you the highest success in your new field of labor, and commend you, Mrs. Conn and family, to the guidance, help and blessing of the Great Head of the Church.

F. BURROWS,
Chairman.

U. J. FLACH,
Treasurer.

W. J. CAMPBELL,
Secretary.

For Board of Management.

Napanee, Sept. 3rd, 1910.

DIED IN BELLEVILLE.

William H. Stafford died at his residence, William Street, Belleville, on Saturday, September 3rd, after a lingering illness. Until recently he had been a resident of Deseronto, where he carried on business as a hardware merchant. He was in his forty-seventh year, and is survived by his wife, one son, Roy, and two daughters, Flossie and Georgie, all in Belleville. Mr. Stafford, who was a native of Ameliasburg township, was a man of sterling business integrity, and by his ever genial and amiable disposition, had endeared himself to a wide circle of friends, who deplore his removal.

The funeral took place on Monday and was numerously attended, notwithstanding the heavy rain. After a short service in the house, the casket was conveyed to the Methodist church at Albury, Prince Edward County. Religious services were conducted by Rev. G. H. Copeland, of Deseronto, and Rev. E. F. Pratt, of Bridge street church, Belleville. Rev. Mr. Copeland and Judge Deroche both paid earnest and becoming tributes to the memory of the deceased. Joseph R. Stainton, Deseronto, on behalf of the Deseronto town council, and the quarterly board of the Methodist church, in Deseronto, conveyed resolutions of sympathy from both these bodies, and in suitable language expressed the sympathy of Deseronto citizens with the bereaved family. In politics, Mr. Stafford was an enthusiastic reformer. The remains were interred in the family plot in the

NEW LUMBER YARD

Manager, Napanee Branch.

MERCHANTS' BANK OF CANADA. ESTABLISHED 1864.

Wall's suggestion, but the general opinion of the council seemed to be that the Streets Committee had power to decide the question as they saw fit. Councillors Osborne and Steacy moved that the Mayor and Clerk be authorized to sign a contract with the Bell Telephone Co. for a telephone to be installed in the home of Mr. John Fish in Clarksville, to be used as a fire alarm.

Owing to the absence of some records in connection with this matter the question was left over until the next meeting of council.

Coun. Steacy informed the council that Mr. E. B. Perry, nightwatchman, would like to have ten or twelve days leave of absence.

On motion of Coun. Steacy and Reeve Alexander the request was granted.

Mr. Cyrus Woodcock appeared before the council and asked that a sidewalk be built from Dundas street to his property. At present there is no walk on his side of the road and the crossing leading over to his property is worn out.

On motion of Councillors Waller and Meng a three foot cement crossing was ordered built, to replace the old wooden one.

Coun. Kimmerly called the attention of the council to the necessity of putting a cement floor in the cellar of the Public Library building. Owing to the dampness of the cellar, under the present state of affairs, it was stated that the furnace was fast being ruined.

On motion of Coun. Osborne, seconded by Coun. Meng, a cement floor was ordered built in the Public Library building.

Councillor Waller informed the council that Mrs. A. Lafferty had complained to him that refuse from the sewer on Robert street was being backed up into the cellar of her property, recently occupied by Walter Coxall.

Referred to the Streets Committee to investigate and report.

Moved by Councillors Waller and Meng that the clerk be instructed to prepare all papers and by-laws re the report of the engineer on sewers, and that the council put itself on record as being in favor of same. Carried.

The Town Property Committee was asked to have the premises, recently occupied by Chas. Anderson as a livery stable, cleared up and put in a sanitary condition.

The following accounts were ordered paid:

Jas. Richardson	\$ 75
Wm. Loucks	29 50
Geo. Sampson	37 50
Robt. Light	177 01

The council adjourned to meet on Thursday evening, Sept. 8th, at 8 p. m.

Paint, Paint, Varnish

Huyler's Chocolate

A man is known by the candy he sends. "Huyler's" the highest grade chocolate in Canada are sold in Napanee only at Wallace's drug store.

memory of the deceased. Joseph R. Stainton, Deseronto, on behalf of the Deseronto town council, and the quarterly board of the Methodist church, in Deseronto, conveyed resolutions of sympathy from both these bodies, and in suitable language expressed the sympathy of Deseronto citizens with the bereaved family. In politics, Mr. Stafford was an enthusiastic reformer. The remains were interred in the family plot in the Albury cemetery. The floral tributes were numerous. The bearers were: Judge Deroche, S. Russell, ex-M.P.P., D. V. Sinclair, C. N. Salmon, James Farley and S. Bell.

Lamps and Lamp Goods.

We have some nice lamps for Oil, Gas and Electric. Nice goods. Drop in and see them.

BOYLE & SON.

Sunday evening Mr. John Kent, River Road, had a valuable team of horses break down the fence and stray away from the field in which they were kept. With the assistance of Chief Graham they were recovered on Wednesday, having wandered into a farmer's barn yard near Selby.

Owing to the large amount of job work done at this office we have found it necessary to increase our productive facilities, and consequently have purchased a fine Chandler & Price Gordon Press, which will arrive in a few days. The quality of the job work done at our office is appreciated by the public, and they certainly know when they leave their order that the quality of the work will be A. No. 1.

How to Make Starch.

To make starch allow one-half pint of cold water and one quart of boiling water to every two tablespoonsful of starch. Put the starch in a large saucepan and pour on the cold water, stirring all the while with a spoon to remove all lumps. When the mixture is smooth place the pan on the hot stove and pour boiling hot water over the starch, continuing the stirring. If made properly the starch will thicken immediately. It often happens that the water is not at boiling point when being poured of the starch, and in this case it will not thicken and must therefore be emptied into a clean vessel and placed on the fire to boil. When smooth remove from the stove and strain. Set aside to cool, taking care that it is covered so that a skin will not form over the top. To give a shiny and smooth appearance to the linen when ironed stir a piece of wax candle three or four times in the starch. This will also prevent the iron from sticking.

How to Make Good Coffee.

Here is a recipe for coffee that never fails. Use a tablespoonful of coffee for each cupful desired and one spoonful for the pot. Mix with a small quantity of cold water and bring to a boil. A little white of an egg mixed with the coffee and cold water or well washed eggshells added will help to make the coffee clear, but egg is not essential to good coffee. After the coffee has boiled for a few minutes add the quantity of boiling water desired. Let it sit for one minute, pour a little cold water into the pot, and the coffee is ready to serve. Mix cream and sugar in a cup and pour the coffee into it. Always serve coffee and tea very hot.

Venetian Hospitality.

Whatever might have been said against the Venetians, they were a hospitable people—this, too, in small as well as in great matters. When, for example, in 1476, an ambassador from the Khan of Tartary visited the city and it was known that the khan and his suit carried but one shirt apiece in their bags the senate formally voted 20 ducats that they might be provided with additional shirts, which were accordingly made "alla tartaresca" and presented. We can imagine how the good councillors and citizens would enjoy this little jest.

FOR SALE—14 acres, new house, eight rooms, bathroom, cellar, large cistern, well at door, large orchard and variety of berries, good drive house, barn and shed—a mile and a half from Napanee on Palace road. Enquire on premises. Also Piano for sale. MRS. G. VANALSTINE. 151r

40 FARMS FOR SALE in Napanee and Belleville districts. Many of these are valuable farms, and at right price. Call at once or write for list. We can suit you, and you will save time and money. Also some good town properties. W. G. H. BROWN, Real Estate. Opposite Royal Hotel, Napanee.

FARM FOR SALE—100 acres—Valuable and desirable farm in Ernestown Township, lot No. 13, 7th concession, six miles from the town of Napanee, and about three miles from Newburgh. Farm is well fenced, never failing creek through centre of farm. Good frame house and new barn. 74 acres under cultivation, 26 acres woodland. Apply to W. G. BAUGHAN, at Gibbard's sale rooms, Napanee. 281r

The "Shannon Farm" at Centreville, for rent or for sale. Here's your opportunity! An intelligent farmer who understands how to cultivate different kinds of soil, and knows the value of rotation of crops, can grow 50 bushels of oats, or 40 bushels of barley to the acre on the average, from at least 85 acres of this fine farm—10 acres in sugar bush, 3 acres in orchard. Modern brick residence worth \$300, new frame tenant house worth \$100. Drive house, barn, hog pen, and implement house; never-failing pure sparkling spring water in pasture, of priceless value to all stock. No wild mustard or "herick," and well fenced. If not rented by the 15th Sept., will sell at any time. Possession given to plough at once, with privilege of stable at barn and room in tenant house, full possession 1st March, 1911. Apply to M. SHANNON, Centreville, Ont., or W. J. SHANNON, Napanee. 381r

Kodaks in Napanee.

The genuine Kodak's sold in Napanee only at Wallace's Red Cross drug store. To insure getting the best results use only the genuine Eastman N. C. Film. We do the developing and printing at Wallace's. Don't forget when you order by mail to enclose postage.

STONE & WELLINGTON,

The Fonthill Nurseries,
Toronto, Ont.

Established 1837.

We are a drug-consuming people, devoted to the use of medicine and interested to the point of excitement in new remedies for old diseases. It is an interference with one of our chief pleasures, therefore, to be told that the most that can be said for some wonderful compounds is that they are harmless, and that specifics which should be a sure cure for divers ailments are not specifics at all, and that they may do positive injury.

The person who writes in this discouraging strain is Dr. Woods Hutchinson, but his article, which appears in *The Delineator*, is not purely destructive. There are remedies which receive his hearty endorsement, and we propose to pass them along. If "there is no known drug that will add in the slightest degree to the strength and vigor of the human body, no 'tissue builder' on earth except food," let us be thankful for this concession. "The only universally reliable 'bracer' is exercise in the open air and sleeping with your windows open, and the only permanent tonics to the body are fresh fruit, red meat and green vegetables." Let us agree that "only" is enough if the prescription will only act, and take in what comfort we can from the following:

A dollar's worth of cream contains ten times the "strength" of any dollar-bottle of tonic ever invented. Eat plenty of real foods, the best you can raise or buy, and you'll have little need of either medicinal foods or patent medicines.

Objections may be raised to cream and the other real foods because prices are ruling so high, but drugs are not given away. Upon the whole it strikes us that Dr. Hutchinson's remedies are well worth trying, although they may not be within the reach of all.

notes and comments

The cost of aviation, in terms of human life, has been widely considered. Its cost in dollars and cents has received less attention, but it is considerable. The initial cost of an aeroplane may be anywhere between \$1,000 and \$5,000. An unlucky accident may make the machine a total loss before it has been two minutes in the air. Even if it survives its earlier experiences, every flight reduces its value and affects its stability.

A large force of auxiliary hands must be employed. The aeroplane is a queen bee that requires the attendance of the whole hive. A swarm of mechanics and helpers must always be on hand. Fifteen or twenty are employed by the most conspicuous aeronauts, and their wages amount to a large sum. Add the charges for the transport

YOUR SECRET THOUGHTS

You Cannot Harbor an Unclean Thought and Leave the Life as Sweet as Before.

"And may your spirit and soul and body be preserved entire without blame."—I. Thess. v. 23.

Either a man is religious all the way through or he is not religious at all.

That is not the same as saying that one is either wholly good or he is not good at all. Religion is such a turning of the whole life in the direction of spiritual ideals that its principle cannot rule in one section of the life and at the same time have no relation to the others. It is the answer of the whole of a life to that which is seen as the highest good.

In the realm of character there are no partitions or divisions. Here man is not a trinity of persons, a separate body, mind, and soul. Whatever we may attempt it remains that we cannot be pious in spirit, unreligious in mind, and irreligious in body and practical life. It is impossible thus to partition off the personality, for personality is always a unit, and what we are in any level of living depends on what we are in all.

Yet men are constantly wasting energy in the impossible task of separating the life into unrelated sections; they would divide it into the sacred and the secular, into the physical, mental, and spiritual, into the realms of the ideal and the practical, into what one is at the church and what he is at the office or the shop. We forget that we carry the whole of ourselves into

EVERYTHING WE DO.

We never can be parts of ourselves. The whole personality moves as a unit.

Life is the composite and aggregate of all its experience and endeavors. Your real self is just about the average of the sum of all your many levels, the levels of your secret thoughts, whether high or low, of your periods when you let yourself down as well as of those when you seek to tone yourself up.

It is a common fallacy to suppose that we will be known in the last assay of life by what we are at certain periods of idealistic exaltation, by the response which we make in aspiration when certain high thoughts lift their light before us.

To some one such moment of spiritual exaltation atones for

years of living on levels of dull, unworthy content. Yet we can never be known for any other than what we really are.

Our hope may well be that infinite affection will regard us with tender pity, will take us up as does a father, loving the child not for what it has done but for what it has sincerely, earnestly sought to do.

Our concern ought to be not as to how far we may count on such pity but as to how truly we may be worthy, by the steadfastness of our endeavor, of such love. It is nobler by far to live up to love and mercy than to lie down on it. The faith that saves is that deep, high confidence in the ultimate right and good which compels us to turn the whole of ourselves always to that which we know to be true and good. Such a faith saturates the whole being and cannot be content with any part or fragment of the time, the thought, the powers. Religion then becomes the consecration of every faculty to this way of

THINKING AND LIVING.

Like every other great love, the love of the eternal good knows no compromises. We cannot say to ourselves, I will love God with my spirit and leave myself free to seek my own ends, to follow selfish desires, with my other powers. You cannot let yourself down in the physical without dragging yourself down in every part of the life.

You cannot harbor an unclean thought and leave the life as rich and sweet in any part as it was before. Whenever the will yields on any level of the life to the downward pull the whole personality goes with it. But the other side is true, also, to resist a temptation in even the least matter is to enrich and strengthen the life in every way.

Every act of life, every detail and every phase of being is an opportunity to live the religious life, the life of living out toward the best, the spiritual and divine. Life moves steadily upward, gains in power and value as in everything we move with the whole of our powers, whether in business or pleasure, in the path where the divine light shines.

HENRY F. COPE.

THE SUNDAY SCHOOL

INTERNATIONAL LESSON,
SEPT. 11.

Lesson XI. The King's Marriage Feast, Matt. 22. 1-14. Golden Text, Matt. 22. 14.

Verse 1. Jesus answered—His response to their attempt to lay hold on him was to give the third of the parables on judgment.

2. A certain king—God. Other passages may be compared with

was a serious offense. To be in unseemly attire at a festive occasion of such importance was disrespect to the king. The man was speechless (12) inasmuch as there was no excuse for coming unprepared. As in the parable of the virgins, time was allowed to provide oil, so here there must have been ample opportunity to dress properly. The garment, then, refers to the character which a man bears, whether good or bad. To be disobedient to the King's will in this matter is to put oneself on the side of those who lightly or violently refused the invitation.

13. There shall be the weeping—This is said, not by the king to the servants (in this case the angels), but by Christ to his people.

HOME

BREADS.

Kneadless Bread.—Break two cakes of compressed yeast in a cupful of blood warm water, with two teaspoonfuls of granulated sugar. Let it stand about fifteen minutes. Now sift a bowl full of flour, about two quarts, make hollow in center, into which place one tablespoonful of salt, one-quarter cupful of sugar, and a tablespoonful of lard. Melt the lard if you like. Now two cupfuls of milk and one of water, heat milk in water until blood warm, and if you use less milk just add more warm water; place this in the bowl with the yeast added and mix gradually with the flour (I use a wood paddle for this). A paint paddle which comes with a fresh can of paint with holes in it is excellent for this and costs nothing, as you can get one for the asking at any department store) until it can be handled. Place back in the bowl, cover with the bread board, and let it stand fifteen minutes. This is necessary, as this does the work of kneading. Now butter raising bowl, place dough in and turn over to butter top; let raise until doubled, or forty minutes. Make into loaves; let raise again, and bake. This recipe makes four medium sized loaves. H.A.J.

Nut Bread.—Four cupfuls pastry flour, one-fourth cupful sugar, one teaspoonful salt, six level teaspoonfuls baking powder, one cupful nut meats (chopped), one and one-half cup milk; stir to smooth dough, turn into prepared pan and let stand thirty minutes and bake forty minutes.

Butter Thins.—Fine and keep well. Three cups of flour, one cup butter, one-half teaspoon soda, all rubbed together. In another dish have three eggs, two cups of granulated sugar, one teaspoon vanilla (or any flavor desired). Mix with flour sufficient to roll. Roll thin and bake in quick oven, using care not to burn on bottom. Cut in any desired shape.

White Bread.—Almost every one who uses dry yeast stiffens the sponge the evening before. Here is an excellent recipe for summer. Save the water from boiled potatoes at noon, mixing in about one cup of mashed potatoes and one-half cup of sugar and one yeast cake. Cover and set away until next morning. Then add lukewarm water until you have one quart of liquid and stiffen with flour until it will drop from spoon. Let stand until it doubles. Put two sieves of flour in bread bowl, hollow out and pour in sponge with two tablespoons of salt and lard size of walnut. Knead well, let raise twice and divide into four loaves; let raise again and bake for one hour. Do not think yeast is spoiled in morning, as it will have fermented.

Graham Nut Bread.—Three cups graham flour, one-half cup white flour, one teaspoonful salt, three teaspoonfuls baking powder. Sift three times, then add two and one-half cups milk, one-half cup raisins, cup chopped nut meats. Mix well and bake about one hour.

THE LAUNDRY.

Ironing Hint.—When ironing starched clothes, if the iron is dipped quickly into cold water each time when taken from the stove the

to be employed. The aeroplane is a queen bee that requires the attendance of the whole hive. A swarm of mechanics and helpers must always be on hand. Fifteen or twenty are employed by the most conspicuous aeronauts, and their wages amount to a large sum. Add the charges for the transportation of the unwieldy apparatus, the airman's expenses for board and lodging and the by no means negligible cost of gasoline. The minimum charges in connection with a first-class meet can scarcely be brought below \$500.

The professional flyer recoups himself by charging passengers for short flights, but the price falls as the novelty wanes. There is also the competition of wealthy amateurs who not only "blanket" the professional in the public eye but also carry their friends for nothing. Clearly, the professional airman—particularly when the risk to life and limb is considered—earns his fee. And if, in the case of exceptionally skillful and noted professionals, the fee may go as high as \$10,000, it is still well earned.

TRUST.

Isaiah 12: 2.
In Thy name, O Lord, most holy
I will trust.
In Thy kind protection solely
I will trust.
With my heart and spirit wholly
I will trust.
When the skies are dark above me
I will trust.
When the world has ceased to love me
I will trust.
When Thy faithful words reprove me
I will trust.
For the help my soul is needing
I will trust.
For all grace from Thee proceeding
I will trust.
For Thy all-sufficient leading
I will trust.
Lest my heart fresh care should borrow
I will trust.
When I tread the vale of sorrow
I will trust.
For the bright and glad to-morrow
I will trust.
For success in my endeavor
I will trust.
Lest most sacred ties should sever
I will trust.
In Thy glorious name forever
I will trust.

T. WATSON.
Granthurst, Ont., 1910.

MEAN OF HER.

Miss Howells—"Since I had typhoid fever I haven't been able to sing at all. I seem to have lost my voice entirely."
Miss Kunning—"Typhoid is a queer disease. I've often heard that if you recover from it it improves you in every way."
You may be as honest as the day is long, but the days are growing shorter

Feast, Matt. 22. 1-14. Golden Text, Matt. 22. 14.

Verse 1. Jesus answered—His response to their attempt to lay hold on him was to give the third of the parables on judgment.
2. A certain king—God. Other passages may be compared with profit (Matt. 8. 11; 25. 10; 2 Cor. 11. 2; Rev. 19. 7; 21. 2). The marriage feast was the most important social event in the life of a family, and where wealth permitted was a most elaborate affair. According to New Testament symbolism, this would be the marriage of Christ and the church, though the bride is not mentioned, and the son is introduced apparently only to emphasize the lavish splendor of the feast.
3. Them that were bidden—The Jews would not come to the feast, even though participation in its generous bounty was the sum of all good. This is the amazing feature of the parable, that men should refuse what God has graciously done for their highest well-being. There is a climax in their refusal. First, they are unwilling; then, they treat the invitation disdainfully; finally, some stoop to abuse and murder.
4. Other servants—The first group (3), possibly representing the prophets, simply summoned those who were already invited. These later servants are, perhaps, the apostles. The patience and generosity of the king are in keeping with the character of God as revealed in his dealings with Israel. Until men have finally and deliberately spurned his favors, he continues to seek them out, saying, Come.
All things are ready—There is no human need for which God has not made rich and fitting provision.
5. They made light of it—The tragedy of human life is, that it can become so absorbed in the farm and merchandise as to become unconcerned with matters of higher value.
6. Treated them shamefully—It is characteristic of the man who begins by ignoring with an air of superior indifference the claims of religion that he ends by treating the messenger of religion with sullen anger. Having refused God's grace, it hurts his pride and stirs his will into rebellion to have the invitation pressed.
7. The king was wroth—An evidence that in the love of God is a fire which blazes forth at last against persistent, unchangeable refusal to have the gracious benefits of that love. The armies—It may be the Romans who burned their city, are called his because providentially used by him to bring an end to the murderous rulers of Jerusalem.
8. His servants—The first Christian preachers, who went forth to the partings of the highways (9), where the roads from the Gentile country led into the city, and there found both bad and good (10), signifying that, in the matter of inviting, there is to be no discrimination.
11. The king came in to behold the guests—This is a scene of solemn judgment. It is not enough to have been invited and to have made formal acceptance. There still remains the inescapable scrutiny of the King. The question of fitness is not finally settled by membership in the visible church.
A man who had not on a wedding garment—This was a violation of the regulations of the feast, and

garment, then, refers to the character which a man bears, whether good or bad. To be disobedient to the King's will in this matter is to put oneself on the side of those who lightly or violently refused the invitation.
13. There shall be the weeping—This is said, not by the king to the servants (in this case the angels), but by Christ to his hearers by way of explanation: in the outer darkness there will be remorse marked by gnashing of teeth, an evidence of the rebelliousness which makes the doom fitting.
14. Many are called, but few chosen—"All the Jews and all the Gentiles were called: but only a few of the former, and not all of the latter, were chosen." It is God who both calls and finally chooses. But every man has his destiny in his own keeping.
A BIT OF RED TAPE.
Most persons not in the legal profession learn sooner or later that there are "rules of evidence" which make it possible for court proceedings to be blocked for considerable periods of time. Exactly what these rules are, few laymen know.
"I understand that you called on the plaintiff. Is that so?"
"Yes," replied the witness.
"What did he say?"
The attorney for the defense jumped to his feet and objected that the conversation could not be admitted. A half-hour's argument followed. The judges retired to their private room to consider the point.
Some time later they filed into the court-room and announced that the question might be put.
"Well, what did the plaintiff say?"
"He weren't home, sir," came the answer.
HIGH FINANCE.
"What are you doing, little boy?" asked the curious stranger as he passed the suburban garden.
"I'm catching potato bugs," responded the youngster with the paper box. "Pa gives me a penny a dozen for all I catch."
"Ah, and you are too tender-hearted to kill them. What are you going to do with them?"
"Give them to Billy Jones next door to sell to his pa."
"And what will he do with them after his pa has seen and paid for them?"
"Oh, he'll slip them back to me and I'll sell them to my pa to-morrow."
EXERCISE FOR YOUNG LADIES
Throwing a fellow over.
Tossing one's head in the air.
Jumping at a chance.
Pushing one's self forward.
Getting in the swim.
Fishing for an invitation.
Shooting arch glances at a man.
Twisting him round the little finger.
Casting about for an excuse.
Running up millinery bills.
An ideal woman is one who succeeds in concealing her imperfections.
"I haven't seen Jones in a long time. What's he doing now?"
"Sixty days!"
When a man says he wants to have a private talk with you it means that he has an axe to grind and he wants you to turn the grindstone.

three times, then add two and one-half cups milk, one-half cup raisins, cup chopped nut meats. Mix well and bake about one hour.

THE LAUNDRY.

Ironing Hint.—When ironing starched clothes, if the iron is dipped quickly into cold water each time when taken from the stove the starch will never stick and the clothes iron smooth and so quickly you hardly realize you're started before you're done.
To Clean Lace.—Powdered boracic acid sprinkled on lace yoke or collar, then laid away for a day or two, then well shaken out, will remove the soil.
Beading Help.—Fasten firmly at the center of back tape or ribbon, which is run through beading in underwear. This keeps it from being pulled half out or lost entirely in laundering.
Ironing Board Help.—Linen pieces should never be put through the wringer if you would avoid the little wrinkles that are so hard to press out. Small tucks will iron smoother and look better if ironed on the wrong side. If knitwear, bath towels, etc., when taken from the lines are smoothed with the hands and put on the bars to air, will be ready to put away by the time the bars are needed for the ironed clothes. To avoid the unsightly fold so often seen on top of a sleeve of starched shirt waists, fold at the seam, iron the upper, then the lower side, not letting the iron pass within an inch or two of the edge; then open the sleeve fold with the unironed part in the centre of the sleeve and press carefully.

MEATS.

German Chop Suey.—Two pounds hamburger, fry a nice brown, three onions, one-half box of noodles, one small bunch of celery chopped up in small pieces, one can tomatoes, salt and pepper; boil one hour.
Mock Roast.—One cup of beans, boiled and mashed; one cup of peas, boiled and mashed; one cup of finely chopped peanuts or pecans, one cup of dry bread crumbs. Moisten the bread crumbs with water and mix with the mashed peas, beans, and nuts. Season with salt, pepper and onion juice. Put into a buttered baking dish, cover with a cup of rich cream and bake about an hour and a half. This is very healthful and a fine substitute for meat.
Hungarian Goulash.—Cut one pound of good round steak into inch cubes and add an equal quantity of thinly sliced onion. Put one-half cup butter into a large saucepan and when it bubbles put in the meat and onion. Let it brown slightly, then stew slowly for three hours, or until the meat is tender. Do not add water, as the juice from the meat and onion will make a gravy. One-half hour before it is done add salt, paprika, and a little stewed tomato. Be sure to add entire amount of onion. Is none too much.
FOR THE VEGETARIAN.
Dessert.—A pretty dessert for a vegetarian dinner may be made in the following manner: Cook rice in water without stirring and form it in circles on fruit plate. Fill in the centre with fresh strawberries and pour over all a ladleful of pineapple juice which has been sweetened. Serve very cold.
Diced Beets.—To three-fourths

ing to t the arti a long "And Toole, come, b leaned uncontr "Oh, i in distr "Noth in brok but the family! Gobsa aire, ac Miss Lo a fore plankin sternly: "Now, this Ren "Yes," "A seve the canv "Oh, i sed, and and fow A Linc a clergy clated. church seem to that on l the peo so much silver sh "That warden's go away thee a g LE" Youn those b His V Her l you wo sweete His W Her mine, y heavy w "Whe man, M on bei married "Oh, Thomas' mum. I the par W Earne Orator want ho cational Bored "Can tracks?" rod. "I native r old chap A scie have he ry. We that onl should n The w understs when he cries wh laugh.

cupful of cooked diced beets take one-fourth cupful of bread crumbs. Place these in alternate layers in a baking dish, arranging the crumbs on top. Then pour over them one-half cupful of hot milk, to which has been added one tablespoonful of butter, one teaspoonful of salt and one-eighth teaspoonful of pepper. Bake twenty or thirty minutes.

Vegetarian Pie.—Take any one of the flaked, ready cooked breakfast foods and mix with about half the quantity of rich cream to form a moist paste. With this line a well greased pie plate, molding it around the edges as you would pie crust. Pour in a filling of custard, cocoanut, cream, lemon, or apple, and bake as an ordinary pie. While the filling is cooking the cereal will bake out dry and crisp, becoming firm enough to hold the pie when cut. The indigestible qualities of an ordinary pie crust are missing and a delicious light pastry is the result. A meringue should be placed on top instead of a crust.

DESSERTS.

Chocolate Ice Cream.—Three squares sweet chocolate, melted, to which add pint of milk, and beat until mixture reaches boiling point. Add well beaten mixture of tarragon eggs, pinch of salt, one teaspoon vanilla, two cups granulated sugar. While cooking beat until quite thick, then remove from stove to cool. Whip one pint cream, add to above, and freeze.

Delicious dessert.—Cut even slices of bread not less than one day old, butter and stack three or four high. Heat fruit juice left from canned fruit, or melt a glass of jelly, adding enough water to cover the bread which has been placed in a dish deep enough that the liquid can cover the bread. Have the liquid hot and let it stand on bread until thoroughly soaked and then allowed to get cold. Turn bread out on plate and slice like layer ice cream. Serve with plain or whipped cream. When canning fruit it is a good plan to put any surplus juice in pint cans for this purpose.

COOKING HELPS.

Serve a loaf of baked dressing with your roast of beef.

Try a spoonful or perhaps two of maple syrup on your warm apple pie.

Keep a box of parsley growing in your kitchen window or on your back porch and use it for dressing tomatoes, bacon, or chopped for sandwich filling.

Arrange cold rice in balls, roll in cocoanut, and serve with boiled custard.

Cut side salt pork thin and fry a crispy brown. Garnish with lemon quarters and parsley and you will not miss the more expensive bacon.

Toole's Tears.

Sallies of almost childlike high spirits endeared the late J. L. Toole, the lifelong friend of Henry Irving, to all who knew him. On one occasion, when the author of "Some Eminent Victorians" was spending a day in the innocent adventures which Toole was a genius in originating, they went to the Tower, where they found themselves among a party of eager sight-seers in the chamber where the crown jewels are on view.

It was a woman who was explaining to the eager throng the history of the articles displayed. At the end of a long catalogue she said:—

"And this is Anne Boleyn's crown."

On the Farm

THE USE OF FERTILIZERS.

That reliable fertilizers will not exhaust, but on the contrary will build up the poorest land into highest productiveness, has now been proven beyond cavil or doubt, writes G. C. Miller, Middleton, N. S. The writer has used only chemical fertilizers for over thirty years, and those who adopted his system of fertilization 20 years ago are now corroborating his experience. In apples, the crops have been most satisfactory. There have been no off years, and the fruit has always been of first quality. While the crops have not been surprisingly large, they have been good compared with the quantity of the fertilizer used. A larger quantity would probably have insured heavier crops. This is now being tested. The quantity used has never exceeded \$8.00 or \$9.00 worth per acre, or less than 8 cents for each barrel of apples packed. During the past ten years there have been an average yield of 110 bbls. of packed fruit per acre, which means 1,100 bbls. from every acre under cultivation during that period. On a valuation of \$1,000 per acre the fruit has paid all the expenses incident to its production, and left for the owner a surplus of from 14 to 17% per cent. Others report heavier crops than any I have grown, but large crops are often followed by a year of comparative barrenness, it is the long steady pull that counts.

Below is a brief report of the only 4 acres in full bearing in 1908. The balance of 30 acres is still in various stages below full production. The crop of 1909 is equally good, but at this writing has not all been realized on.

Pruning	\$ 10 00
Fertilizers for 4 acres at \$9	36 00
Hauling and sowing fertilizers	2 00
Disching 4 times at \$2	8 00
Vetch 2 bushels at \$2.10	4 20
Buckwheat 2 bus. at 75c	1 50
Sowing cover crop	1 50
Spraying 3 times	22 40
Bbls., 451 at 25c	113 00
Picking, packing and trucking at 25c	113 00
Sundries	4 80

Total expenses.....\$316 40
451 bbls. apples, net proceeds.....\$701 34

Balance.....\$384 94

This is about 17% per cent. for the owner on a valuation of \$1,000.00 per acre, and reckoned as though all the work had been done by hired help. There are many orchards doing much better than this, and solely because they get better care; but this moderate result shows most clearly the possibilities of scientific orchard culture in the Annapolis Valley.

ACCOMMODATING.

It was an overcast, indeterminate sort of a day, but the drug clerk was cheerful as he waddled behind the prescription desk and chatted with a friend in the front shop. Presently a customer came in and

ZULUS IN WOOD.

Eccentric Englishman Left Queer Collection of Statues.

However accustomed a traveler might be to strange sights and queer happenings, he would receive something of a shock in visiting the tiny, old-fashioned village of Castlethorpe, in Buckinghamshire. For in that quiet corner of rural England is to be found a collection of curios which for striking originality and workmanship would be difficult to beat.

This collection consists of life-sized figures of Livingstone and Stanley, Zulu men and women, crocodiles, snakes, monkeys, cats, prairie dogs, heads of lions, tigers, and jaguars—all carved out of solid blocks of wood, with every detail in color, etc., most faithfully delineated.

The collection belongs to Mr. Geo. Rainbow, the superintendent of the Castlethorpe golfcourse, who takes such a pride in his collection that he has built a couple of arbors in his garden and arranged the figures in tableaux, which at first have a somewhat alarming effect on the casual visitor. For some of the black figures have been carved in fighting attitudes, and grasp heavy African spears. Many offers to purchase parts of the collection have been made to Mr. Rainbow, but he refuses to sell.

"They were given to me," he said to a visitor recently, "by my cousin, who died a short time ago, and who must have devoted something over fifty years to carving them. Of course, he did not work at them all the time, for he varied this curious hobby by stuffing animals and fish; but there was nothing which delighted him more than to take a hammer and chisel and a block of wood and fashion representatives of the African jungle and forest. Curiously enough, he did not take any great pride in the work. While always willing to allow people to see them if they asked to do so, he never forced his works upon their attention.

"He got his ideas from books and museums, and I suppose it was his passion for reading about African exploration which led him to carve these figures. One of the best Zulu figures which he carved is in the museum at St. Neots, where he lived. Where did he keep the figures? In his garden; and I remember him telling me that one night he left the garden gate open. A new policeman came in, flashed his lantern round, and the first thing the light fell on was the terrible-looking fellow there"—and here Mr. Rainbow pointed to one of the biggest figures in the collection, with a huge spear. "That bobby turned tail and fled, but summoned up courage to come round the next morning and tell the story of a savage brandishing a spear which he had seen in my cousin's garden."

Perhaps the most remarkable feature of the collection is the wonderful manner in which every detail has been observed in modelling the figures. Properly-colored glass eyes have been left in the wood, while carefully-carved bone teeth have been inserted in the mouth. The hair, too, has been carefully carved out on the wood, the figures being decorated with necklaces of African beads and earrings. Six-foot snakes are twined in and out of the arbors, while full-bodied tigers' heads, beautifully modelled, are cunningly arranged in the woodwork behind ferns, to give the visitor a shock as he or she walks round to inspect the collection.

To some people the idea of having these huge black figures in a beautiful garden—for Mr. Rainbow can boast of one of the prettiest in Castlethorpe—may seem a little incongruous. One forgets the strangeness of these queer garden ornaments, however, when noting how beautifully modelled each figure is, showing every muscle and line of the body, and it would be very surprising if, ere long, some enthusiastic collector does not persuade Mr. Rainbow to part with what is certainly the most unique collection of wooden statues in the country.

"Dowager" Going Out.

The word "dowager" seems to be

HEALTH

COUNTRY MILK.

It is a well-recognized fact that every summer a number of babies perish from digestive troubles, in spite of the increasing care that is taken to prevent the tragedy. Much has been done to educate the mothers in the poorer quarters of our great cities, especially to teach them that if they would keep their babies alive and well through the hot spell they must have clean milk.

Now, clean milk sounds perhaps to some people like an easy thing to procure; but it is often far from easy. Given a crowded, poverty-stricken tenement, with mothers sending half-rinsed bottles to a little corner grocery where a doubtful fluid is left exposed to the air, or in carelessly kept receptacles, and the babies in that tenement will run the gantlet as soon as hot weather begins. Only the very fittest survive.

It is not only the tenement babies that are in danger. One of the saddest things is to see a mother, who honestly believes that she has taken every precaution, lose her baby, in spite of all her care, for the lack of a little more enlightenment on the subject. One mistake that is frequently made in all good faith is the going from a comfortable home in the city, where the milk supply is known to be beyond reproach, to country quarters where nothing is known about it. It all sounds so well while the family is talking it over! Good country air, a quiet farm, fresh country milk—and oh, that fresh country milk! To many minds just the placing of the adjective "country" in front of milk seems to act as a sterilizing process, but unfortunately this is far from being the case; on the contrary, it may be accepted as a truism that, with the exception of a few show dairies, milk on the average small farm is not well kept.

Clean milk means an unceasing attention to small details that very few people are capable of. It means that the cows must be housed decently, that they must be milked by clean people, and that all the receptacles must be scrupulously cared for.

If you are going to give your baby laboratory-handled milk in the winter, you need not expect it to thrive in the hot weather on the happy-go-lucky, hit-or-miss barn yard fluid that you will find on the average farm. Fortunately the Pasteurization of milk is not a difficult task; and all mothers who take young children into the country in the summer will do well to learn the process, and make it part of their daily duty.—Youth's Companion.

"PINS AND NEEDLES."

After being for a long time in a constrained attitude a peculiar numbness and pricking is often felt in the arm, leg or foot. This is caused by some interruption to the circulation and can usually be removed by rubbing or exercise.

The reason of the sensation, which is decidedly uncomfortable while it lasts, is that pressure for a certain length of time deadens the sensibility of a nerve. When this pressure is suddenly removed (as

was a genius in originating, they went to the Tower, where they found themselves among a party of eager sight-seers in the chamber where the crown jewels are on view.

It was a woman who was explaining to the eager throng the history of the articles displayed. At the end of a long catalogue she said:—

"And this is Anne Boleyn's crown." Toole, apparently suddenly overcome, burst into a flood of tears, and leaned against the wall in seemingly uncontrollable grief.

"Oh, sir," inquired the poor woman, in distress, "what is the matter?"

"Nothing! Nothing!" replied Toole, in broken accents. "Don't mind me; but the fact is, I have known the family so long."

The Guarantee.

Gobsa Golde, the American millionaire, accompanied by his daughter, Miss Lotta, picked out a Rembrandt at a foreign dealer's and then, before plunking down the cash, said very sternly:

"Now, see here, sir, do you guarantee this Rembrandt?"

"Yes, Mr. Golde," the dealer replied. "A seven years' guarantee goes with the canvas."

"Oh, very well," said Gobsa, mollified, and he took out his check book and fountain pen.—Washington Star.

A Bigger Bid.

A Lincolnshire parish once possessed a clergyman who was not much appreciated. One day he remarked to his church warden: "You people don't seem to appreciate me. Do you know that on leaving my last sphere of work the people showed their appreciation so much that they gave me a real silver slaver?"

"That is nothing," was the churchwarden's reply. "If that would only go away from this parish we'd give thee a gold un!"—London Chronicle.

LET HER DOWN EASY.

Young Husband—Did you make those biscuits, my dear?

His Wife—Yes, darling.

Her Husband—Well I'd rather you would not make any more, sweetheart.

His Wife—Why not, my love?

Her Husband—Because, angel mine, you are too light for such heavy work.

FUNNY.

"Where did you meet your young man, Mary?" queried the mistress on being told her maid was to get married.

"Oh, please, m'm, at Uncle Thomas' funeral. He's so amusing, m'm. He was the life and soul of the party."

WHAT HE WANTED.

Earnest But Prosy Street-Corner Orator—"I want land reform; I want housing reform; I want educational reform; I want—"

Bored Voice—"Chloroform."

"Can you show me any bear tracks?" asked the amateur Nimrod. "I kin show you a bear," the native replied. "Thanks awfully, old chap. Tracks will suffice."

A scientist says that people who have heart disease shouldn't marry. We were under the impression that only those with heart trouble should marry.

The way of woman is beyond the understanding of men. She laughs when he thinks she should cry, and cries when he thinks she should laugh.

ACCOMMODATING.

It was an overcast, indeterminate sort of a day, but the drug clerk was cheerful as he wistfully behind the prescription desk and chatted with a friend in the front shop. Presently a customer came in and made a small purchase.

"Fine day," he remarked.

"Great!" replied the clerk, enthusiastically.

The customer went out and was followed by another. He, too, made a small purchase and commented on the weather.

"Mean weather," he remarked.

"Beastly!" said the clerk, dolefully.

"Getting warmer," remarked a third customer.

"Hot!" said the clerk.

Ten minutes passed. Another individual drifted in from the outside world and made a purchase.

"Chilly, isn't it?" he said to the clerk.

"Cold as the pole!" agreed the clerk, with a shiver.

His friend had listened to these exchanges with interest.

"See here," he demanded, "what kind of weather do you think this is, anyway?"

"Same kind as the customer," replied the drug clerk.

LITERAL.

"What is your last name, my boy?" asked the teacher of the new pupil, a frightened-looking youngster of some half-dozen years.

"Tommy."

"Tommy what?"

"Tommy Tompkins."

"Then Tompkins is your name," turning to his record-book.

"No, sir," came the reply, with the air of one accustomed to render literalness to inquiring elders. "I don't think so, sir. Tompkins was my name already when I was born, and aunty says they didn't give me the other for a whole month afterwards."

PHYSICAL AID.

Needum—"Will you give me a lift, sir?"

Snugsum—"Certainly; but am I strong enough?"

Needum—"I think so. I'm trying to raise a \$500 mortgage from my home."

TAKING A SHINE TO US.

Funniman—I tell you, this is a hot system we've got working these days.

Stoopid—What system are you talking about?

Funniman—The solar system.

Mrs. Dobbs was trying to find out the likes and dislikes of her boarder, and all she learned increased her satisfaction. "Do you want pie for breakfast?" she asked.

"No, I thank you," said the new boarder, with a smile. "Pie for breakfast seems a little too much."

"That's just the way I look at it," said Mrs. Dobbs, heartily. "I say pie for dinner is a necessity, and pie for supper gives a kind o' finishing touch to the day; but pie for breakfast is what I call putting on airs."

Mr. David Shackleton, who introduced the Women's Franchise Bill, in the British House, is the son of an Accrington watchmaker. When he was nine he started work as a half-timer in the mills, and such were his energy and industry that before he was thirteen he had charge of three looms—a record in the weaving industry. "I was a good elementary scholar," says Mr. Shackleton, "and so nearly all my time as a pupil at the elementary school was spent as a teacher, instructing men old enough to be my father in the three R's. The result was that I had to educate myself after leaving that school."

figure is, showing every muscle and line of the body, and it would be very surprising if, ere long, some enthusiastic collector does not persuade Mr. Rainbow to part with what is certainly the most unique collection of wooden statues in the country.

"Dowager" Going Out.

The word "dowager" seems to be going quite out of fashion, and many who should so style themselves prefer to use instead their Christian names. Strictly speaking the mother of a married peer or baronet is the dowager, but it has become the custom when two ladies bear the same title to call the elder one by her Christian name, the distinction dowager being dropped altogether.

At court, however, all widows of peers and baronets are styled dowager when the peer or baronet regnant is married. The Christian name was adopted some years ago in cases where there were more than two ladies bearing the same title in order to make a distinction between the dowager and the wife of the holder of the title, and the innovation has become so popular that peeresses and baronets' wives who should style themselves dowager elect to be known by their Christian names. Thus the widow of the late Earl of Dudley is known as Georgiana Lady Dudley, but actually she is Dowager Lady Dudley.—Court Journal.

A Little Maori Meal.

The Maoris of New Zealand, whilst holding their annual gatherings, do not believe in going hungry, as a glance through the following list of food consumed during a recent gathering will show. There were nine bullocks, twenty sheep, seventeen bags of shellfish, eight tons of potatoes, thirteen 56-pound bags of sugar, 200 pounds of cake, 1,100 2-pound loaves, 220 gallons of milk, 4 cwt. of flour, eight 50-pound boxes of butter, six large tins of fancy biscuits, four cases of jam, two tons of eels, one ton of pumpkins, besides condiments and sundries. Fourteen tons of firewood were used for cooking. The number of Maoris present was 1,300.

The Heat of Australia.

Australia is the hottest country on record. I have ridden for miles astride the equator, but I have never found heat to compare with this. Out in the country in the dry times there appears to be little more than a sheet of brown paper between you and the lower regions, and the people facetiously say that they have to feed their hens on cracked ice to keep them from laying boiled eggs.—Sydney Telegraph.

Loudest Voice In the Lords.

The credit of having the loudest voice in the House of Lords belongs to Lord Ashbourne. The tones that were once his pride have been modified by time, use, and age, but he can still, like John Peel, "awaken the dead." There is a story that when Mr. Gibson, as he then was, made his debut as an Irish law officer in the Commons a colleague, hurrying into the House, met another coming out. "Why, where are you going? Don't you know that Gibson is up?" "Yes, I know, and I am going to the Lords." "To the Lords! Don't you want to hear him?" "I fancy I shall hear him with more comfort from the distance."

Champion of Women's Suffrage.

Mr. David Shackleton, who introduced the Women's Franchise Bill, in the British House, is the son of an Accrington watchmaker. When he was nine he started work as a half-timer in the mills, and such were his energy and industry that before he was thirteen he had charge of three looms—a record in the weaving industry. "I was a good elementary scholar," says Mr. Shackleton, "and so nearly all my time as a pupil at the elementary school was spent as a teacher, instructing men old enough to be my father in the three R's. The result was that I had to educate myself after leaving that school."

caused by some interruption to the circulation and can usually be removed by rubbing or exercise.

The reason of the sensation, which is decidedly uncomfortable while it lasts, is that pressure for a certain length of time deadens the sensibility of a nerve. When this pressure is suddenly removed (as straightening out of the leg after sitting with it doubled underneath the body) sensibility gradually returns to the nerve, and as each nerve-fibre composing the trunk regains its normal condition of sensibility a pricking sensation is felt, and these successive prickings from the successive awakenings of the numerous fibres have not inaptly been called "pins and needles."

A WITTY PASHA.

He Told the Missionary a Story to Fit the Occasion.

Official bribery is common in the east, and it is a tender subject there, as a humorous story told by the late Rev. H. H. Jessup, D. D., in his book, "Fifty-three Years in Syria," bears witness.

One day in 1873 Dr. Van Dyck, manager of the press in connection with the work of propaganda of the Syrian Protestant college at Beirut, was sent for by Kamil Pasha, the governor, to come to the serai, as he was about to shut up the press for a violation of the press laws. Dr. Van Dyck proceeded to the serai and asked the pasha what he meant.

The pasha, holding up a little tract, said, "Was this printed at your press?"

"Yes."

"Then it must be confiscated, as it contains an attack on the Turkish government."

"Wherein," asked Dr. Van Dyck, "does it attack the government?"

The pasha pointed out several passages which criticised the bribery and corruption everywhere prevalent, perjury and lying among witnesses and public officials and the fact that "truth had fallen in the streets and equity could not enter."

"Are not these statements true?" said Dr. Van Dyck. "Your excellency ought to put a copy into the hands of every government official in your pashalic. Is it not so?"

"Have you never heard the story of the Cadi el Ah War?" asked the pasha.

"And what is that?" queried the doctor.

"Well," began the pasha, "once there was a famous one eyed cadi (judge). One day a man came to court and addressed him as follows:

"Good morning, O one eyed cadi! May your day be blessed, O one eyed cadi! I have heard of the noble character and justice of the one eyed cadi, and I would ask the distinguished and revered one eyed cadi to do me justice, and—"

"Stop!" interrupted the cadi. "Supposing I am one eyed, do I want to be everlastingly reminded of it? Get out of my sight!"

"And so," concluded the pasha, "we know that these reflections on our country and our courts are true, but we don't want to be publicly reminded of it!"

Take Their Flasks Maybe.

Col. Seely admitted in the British House of Commons recently that in certain native courts in Southern Nigeria fines had been received in gin, although the practice was abolished by law in 1904.

No amount of effort to save the world can make up for failure to sacrifice for the salvation of your own little world.—Henry F. Cope.

LIONS OF BRITISH NAVY

WAR VESSELS THAT HAVE BORNE THE NAME.

The New Lion Could Defeat Whole Fleets of the Old Timers.

The name of Devonport's new cruiser is not one of the happiest in our naval annals, although there are few indeed that can rival it in point of antiquity, says the London Globe. Four hundred years ago—in 1511, to be exact—English shipping in the North Sea suffered much annoyance at the hands of one Andrew Barton, who with Andrew Wood was one of the commanders of the fleet of James IV. of Scotland. These men voyaged under letters of marque and were remarkably impartial in their attentions.

However, the Government of the day took no notice of their depredations and at last the Earl of Surrey took matters into his own hands, fitted out two ships at his own expense and set his own sons—Lord Edward and Lord Thomas Howard—in command of them. Barton had two ships with him, but they were scattered by a storm. The same thing happened to the Howards' ships, but in the end Lord Thomas fell in with Barton himself and his brother with the other Scottish ship.

Stout fighters as the Scots were the result of the actions was to add two ships to the navy of 1511, one Barton's own ship, the Lion, of 120 tons, and the other the Jenny Perwin, of seventy tons. Barton himself was killed and the affair led to war and

THE BATTLE OF FLODDEN.

King Henry's answer to James IV's complaints of the attack on Barton was to the effect that "punishing pirates was never held to be a breach of the peace among princes."

Curiously enough another Lion was taken from the Scots in 1547, but she received such severe punishment at the hands of the Pansy that she sank off Harwich before she could be carried into port.

The first Lion actually built for the navy dates from 1536. She was a vessel of 140 tons, but carried no fewer than fifty guns; two of brass and forty-eight of iron, but it is doubtful of any of them fired a shot or more than twelve pounds weight. The heaviest naval gun in use fifty years later fired a shot of only sixty-six pounds and the Ark Royal, of 800 tons, flagship in the armada campaign, mounted only four of these. During the next two centuries we find all sorts of varieties on the name which Viscountess Clifden gave to Devonport's cruiser.

There were "Red Lions," "White Lions," "Golden Lions," "Rose Lions," "Two Lions" and whole broods of "Lion's Whelps," these last frequently built in batches and numbered, like the torpedo boats of to-day. Among these, however, one particular "Golden Lion"

STANDS PRE-EMINENT.

She was built in 1582, had a tonnage of 500 and was manned with a crew of 250 soldiers and 150 mariners.

Her armament consisted of sixty pieces of what in those days passed

WILD KITTENS.

A Gentleman Who Had an Interesting Experience.

Most wild animals are wild because nature has made them so, and has kept them in wild surroundings. That almost any animal can be domesticated has been shown by many instances. If a conclusion is to be drawn from the incident related by a writer in the Scotsman, it would seem to be that animals born in captivity are more likely to change their character than those caught and partially tamed, but that even under these conditions there is a strong tendency to revert. In the instance in question, a female wildcat had been trapped, and came into the possession of the writer.

It was not long in my possession before I arrived at the conclusion that there are few animals wilder than a wildcat. The beast was so savage that I found it impossible to do anything to its injured fore limb, but nature came to the aid of my captive, and the leg, although remaining slightly deformed, became quite serviceable.

In about a month's time the cat, which afterward escaped and was shot while raiding pheasant-rearing grounds, presented me with four kittens, and knowing the cannibalistic tendencies of wild animals in captivity, I made arrangements to remove the kittens as soon as they were born. One, however, had been eaten before the others were rescued.

The remaining three were transferred to a foster mother in the shape of a gentle stable cat, and the family survived all their infantile ailments, and are still alive.

Notwithstanding their environment and the excellent example shown them by the stable cat, the kittens were practically untamed terrors with every one but myself until they reached the age of four or five months.

After that period they seemed to have a greater faith in human nature, or perhaps familiarity had bred contempt, although even yet there are times when the wild ancestral blood courses madly through their veins, and for days they are almost unapproachable. But in their quieter moments they follow me about like dogs, and respond to a call or whistle.

I give them their liberty only during the day now, and even then they are under observation, as once when I let them out of their quarters in the evening they bolted.

After much difficulty I recaptured two, but the third did not return for a week, and I was surprised that it came back at all.

On warm moonlight nights they will caterwaul to the domestic tabbies, and the voice of the ordinary cat is a mere whisper compared to the calls of those products of the pine woods gloom, and I had to remove my three wildcats to a place where there were no neighbors whose dreams could be disturbed.

USE OF SHEPHERD'S PIPE.

By Its Sound, Sheep Know Some One is On Guard.

The pastoral life of the Palestine peasant has always been a subject of interest and a pleasant study. The shepherd is seen at his best in the spring when he has the care of

WAYS OF SPANISH BANK

TRAVELLER TELLS OF GETTING MONEY IN TOLEDO.

How the Monied Institutions of King Alfonso's Country Transact Business.

"It is curious how far from modern civilization you feel when you get to some place in Spain," says a traveller. "Especially is this the case if you attempt to do any banking in a town where they are unused to our methods."

"In Madrid one morning three years ago I decided to go to Toledo. I needed about \$100, but the train for Toledo left before the banks in Madrid opened, and I could not get back before they closed. I looked at my letter of credit and was overjoyed to find that it mentioned that money could be drawn upon it at the Royal Bank of Spain in Toledo, so I decided this would solve the question."

"A little before 12 o'clock my courier and I sought the Royal Bank of Spain. It was a huge, four story building, with a row of eight windows on a floor and a big gilt sign and all sorts of armorial bearings on the face of it; but to my astonishment the door was

CLOSED AND LOCKED.

"I rang the bell, and after some delay there appeared a man who looked like a clerk, wearing a bandage about his head as if he had toothache."

"I want to get some money," I said to him through the courier.

"Senior, it is impossible," he replied; "you will have to come back to-morrow and see the president. He is entertaining friends and cannot see you."

"I explained that it was impossible for me to wait, but it seemed to make no impression. Well, it took my courier and me a quarter of an hour to convince that bungled attendant that I had to have something done, and he at last disappeared and came back accompanied by a pompous looking person wearing a black frock coat and a white tie."

"My situation was explained volubly to him by the courier. He shook his head and said:

"It is out of the question. I am too busy entertaining and I cannot attend to the matter to-day."

MAD ALL THROUGH.

"When the courier repeated this to me I lost my good temper. I used a few good English swear words, which I do not think the courier attempted to translate, but I reminded the president that he was the accredited agent of an English bank and guaranteed to give me the money I demanded upon its letter of credit on any working day. I prophesied all sorts of trouble for him, and finally he began to see the point."

"How much does the senior need?" he asked.

"Forty pounds," I replied.

"He threw up his hands and fell back against the door post as if agast. 'Forty pounds, 1,000 pesetas, it is impossible,' he cried. 'That will require at least two or three days' notice.'

"Well, I got pretty hot under the

IN AN ELEPHANT PIT.

Experience of Rev. Dr. Rainsford's Huntsman.

There is another element of danger besides the elephants themselves that attends the forest hunting of this game in Africa. It is the game pit. These are so cunningly concealed, says Rev. Dr. W. S. Rainsford in "The Land of the Lion," that even an observant man may fall into them and be seriously hurt. He tells of an experience of one of his huntsmen, not in the forest, but in the comparatively safe ground outside. The adventure might easily have been fatal.

He came on some elephants, and was creeping close to one that stood on the other side of some bush; as he was going to fire his game moved slowly on, and at a few yards' distance he followed, trying for a shoulder shot.

There was a narrow opening before him, wide enough just to permit the bulky body of the elephant to pass. To his astonishment, the great beast, instead of taking the evident path before it, without pausing or seeming to make any examination of the ground, deliberately trod, not in the open space, but full in the middle of the dense thorny bush on one side.

"What a fool of a beast!" thought the huntsman. "I'll cut it off and get a good shot." He rushed down the narrow clearing to do so, and in an instant was crashing down into a ten-foot-deep pit, a cocked double fifty-calibre rifle in his hands. Had the pit been staked, he would never have come out alive. As it was, he was badly hurt, and had to wait till his men found him and dragged him out.

In a few years game-hunting by the N'dorobo, the tribe which makes these pits, will probably be stopped by government, although it seems a little hard on these brave and independent people that customs which have been theirs from time immemorial should be banned. At present they are utterly uninfluenced by the white man's near approach. They live where their fathers have for ages lived, and they live as their fathers have lived, defending their mountain homes against the raiders of various tribes, hundreds of times more numerous than they. They dig their pits, use very deadly poisons on their arrows and elephant javelins and procure what little iron and brass they need in exchanging ivory and skins with the Swahili traders.

EXTRAORDINARY CHARADE.

An Opprobrious Synonym For the First Word.

This charade was written by a gentleman for some young lady friends. He had composed other riddles and acrostics for them, which they had duly solved, but they sighed for more worlds to conquer, and wanted a harder nut to crack than any that had gone before. In response to their request they received the following:

When you see a harder question To unriddle, your suggestion, I am sure, itself suggests its answer plain.

It has puzzled many sages, Of many lands and ages, But, no doubt, you will not tackle it in vain.

numbered, like the torpedos coast of to-day. Among these, however, one particular "Golden Lion"

STANDS PRE-EMINENT.

She was built in 1582, had a tonnage of 500 and was manned with a crew of 250 soldiers and 150 mariners.

Her armament consisted of sixty pieces of what in those days passed for ordnance. These were four "demi-cannon," the weight of the gun being 4,000 pounds and of its shot 30 1-4 pounds; eight 4,500 pound "culverins," firing a 17 1-4 pound shot; fourteen "demi-culverins," 3,400 pounds in weight and firing a 9 pound shot, and nine 1,400 pound "sakers" with a 5 pound shot. These constituted the "heavy armament." In addition there were eight "fowlers," sixteen "fowler chambers," and one "falcon." The longest ranging gun was the demi-culverin, which was effective at twenty score paces.

The Golden Lion is often referred to without the gliding adjective, and when she was rebuilt in 1609 it was officially discarded. She sailed with Drake to Cadiz in 1587 to singe the King of Spain's beard, much against the inclination of her skipper, one William Borough, "a distinguished navigator and hydrographer, but no warrior." Drake's plans struck him as pure madness and he did little to further the operations.

The result was that Borough was tried on board the Elizabeth Bonaventure by a primitive court-martial, and sentenced to "abide the pains of death," but he outlived both the sentence and his quarrel with Drake and commanded the Bonaventure against the Armada. In that fight the Lion was

SECOND FLAGSHIP.

having Lord Thomas Howard as her commander.

It was a new Lion that fought in the battle off the North Foreland in 1653. Twenty years later her captain was killed in the first battle of the "Schooneveld." Under Captain John Torpely she took part in the action with the French off Beachy Head in 1690 which brought so much contumely upon Torrington, but the ship had the satisfaction of sharing in Russell's great victory at Barfleur two years later. It is not until 1745 that we again find a Lion in action. This time, commanded by Capt. Piercy Brett, she endeavored to prevent the flight of the Young Pretender from Scotland to France, but the Lion came off decidedly second best in the encounter and retired with 55 killed and 107 wounded, of whom seven died later.

In 1759 the Lion was present at the taking of Guadeloupe, where her captain, William Trelawney, was wounded. Twenty years later, fighting under Byron off Grenada, she had a narrow escape from capture. Byron conducted the battle in anything but a capable manner although the ineptitude of the French prevented it from being the crushing defeat it ought to have been. The Lion and two other ships were cut off from the main body and Byron in his official report expressed his "great surprise" that "no ship of the enemy was detached after the Lion."

Who has a favorite sin has a hard master.

The best way to lead the weak to wrongdoing is to make a mockery of the punishment of the strong.

USE OF SHEPHERD'S PIPE.

By Its Sound, Sheep Know Some One is On Guard.

The pastoral life of the Palestine peasant has always been a subject of interest and a pleasant study. The shepherd is seen at his best in the spring when he has the care of both sheep and lambs and when all his thoughts are centred on his seemingly indolent occupation.

Work for the shepherd begins in earnest with the lambing season which commences early in January and continues for two or three months; during that time it is no unusual sight to see the shepherd with several newly born lambs or kids stored away in the capacious folds of his bosom and the mothers in close attendance.

When heavy storms of snow or rain come on the shelter of some cave has to be sought and a careful watch against the attacks of wild animals kept. This watchfulness is not relaxed on a fine day, and the long hours on the hillsides or plains are whiled away in making music on the reed flute, of which every shepherd is the maker and player.

The music is an assurance to the sheep that the shepherd is on the alert; let the music cease for any length of time and the flock will stop grazing and look around for their caretaker and leader.

At night the sheep are folded around the village or camp to which they belong. The fold is a long enclosure, the wall of which is made up of good-sized stones piled one on another.

There is only one entrance, which is narrow, for the sheep as they enter have to "pass under the rod" so that the owner may count them and see that none are missing.

BENEFITS OF YAWNING.

As an Exercise is Valuable in Diseases of the Throat.

Dr. Emil Bunzl of Vienna, Austria, in speaking of diseases of the throat and remedies, said that yawning has its great value. Yawning has recently been recommended, independently as a valuable exercise for the respiratory organs.

"According to Dr. Naegeli of the University of Luetich," said Dr. Bunzl, "yawning brings all the respiratory muscles of the chest and throat into action, and is, therefore, the best and most natural means of strengthening them. He advises everybody to yawn as deeply as possible, with arms outstretched, in order to change completely the air in the lungs and stimulate respiration. In many cases he has found the practice to relieve the difficulty in swallowing and disturbance of the sense of hearing that accompany catarrh of the throat. The patient is induced to yawn through suggestion, imitation of a preliminary exercise in deep breathing.

"Each treatment consists of from six to eight yawns, each followed by the operation of swallowing. It should be added, however, that it is quite possible for deep breathing to be overdone, particularly by persons with weak hearts, and it is at least open to question whether the obstacles to free respiration, which the yawning cure is alleged to remove, are not useful in preventing the entrance of germs and other foreign bodies."

How much does the senior need?" he asked.

"Forty pounds," I replied.

"He threw up his hands and fell back against the door post as if agast. 'Forty pounds, 1,000 pester, it is impossible,' he cried. 'That will require at least two or three days' notice.'

"Well, I got pretty hot under the collar, and with the assistance of the courier I said some very plain things to him. Finally he promised to see what he could do, and took us into the bank.

CLERK WENT COLLECTING.

"Waving us to seats the president sated himself at his desk and wrote several letters, which he gave to the factotum. The latter was gone about half an hour, and when he came back he had the greatest bunch of paper and silver and copper money I ever had seen at one time. They counted it out, and it amounted to 240 pester. Then they dug into the bank's vault and pulled out 500 pester. 'It is all the cash we had on hand,' the president assured me. 'No, Alfonso, bring your little cash box,' he said to the factotum. The latter unlocked a drawer and brought out a cigar box filled with small silver and copper coins. The president and Alfonso slowly counted the contents of the cigar box. There was something like eight pester 87 centimos.

"I am afraid the best we can do is to offer you 750 pester," said the president, pulling out his purse. After what I had been through I was glad to get that, so the president counted over the 1 peseta 13 centimes from his own pocketbook. I signed a receipt and I went out with my clothes full of paper, silver and copper."

SENTENCE SERMONS.

Some saints never believe in snow shovels until summer.

You cannot fail to augment your happiness by giving it out.

If men would hate sin as they hate the jail we would need few lawyers.

The pleasures of youth are often sinful to those who have lost them.

The brotherhood of man will not come by turning all into a sisterhood.

Often the man who prays for peace is only protesting against punishment.

You will never get people in the church as long as you are speculating on what you can get out of them.

There's a lot of difference between faith as to what you can make of a man and hope as to what you can make out of him.

One's chance of being heard may be in inverse proportion to his fondness for being heard.

COSTLY WINE.

A fanciful statistician has been making a curious calculation. In the famous cellars of the Hotel de Ville, at Bremen, Germany, there are a dozen cases of holy wine. They have been preserved for two centuries and a half. On a fair estimate of the cost of maintaining the cellar, rent, interest upon the original value of the wine, and other proper incidental charges, a bottle of this choice liquor is worth £400,000, one glass £54,476, and a single drop could not be profitably sold under £50

When you see a harder question To unriddle, your suggestion, I am sure, itself suggests its answer plain.

It has puzzled many sages, Of many lands and ages, But, no doubt, you will not tackle it in vain.

The answer to this charade is "Woman." It is obtained by taking the first letter of the first line, "w," the second letter of the second line, "o," the third letter of the third line, "m," fourth letter of the fourth line, "a," fifth letter of the fifth line, "n."

When it was written there was no intention whatever on the gentleman's part to have any other answer. The girls succeeded in solving the riddle, but in doing so they discovered that it contained another answer, a term or name for "woman" anything but complimentary. In fact, the word "hussy."

This second word is made by using the letters, next following those forming the word "woman." That is, the second letter of the first line is "h," third letter of second line, "u," and so on.

It is astonishing that the letters following the real answer should accidentally spell a word, but the most astonishing feature is that with so many chances, probably millions of them, against such a possibility, the second word should be an opprobrious synonym for the first one.

A BLUE ROSE AT LAST.

Successful Experiments of an English Floral Specialist.

No true horticulturist is satisfied with the colors given to blooms by nature. If a flower is normally yellow or red he desires to produce a variety which shall be green or blue or black.

Formerly the "blue rose," the "green carnation" and the "black tulip" were synonyms for the impossible, but thanks to the striving of growers after unnatural tints such phrases have lost their old significance.

Alfred Smith, F.R.H.S., of Downley, High Wycombe, England, who is a well-known rose specialist, has been experimenting for three or four years with a view of the production of a blue rose. By the process of crossing different strains he has now succeeded in obtaining the most distinct blue rose yet produced and has given it the name of Lady Coventry.

His nursery is near the estate of the late Lord Beaconsfield at Hughenden and he has previously achieved success by blending the common dog rose with cultivated roses, a notable example of his work being a climbing rose, pure white, which grows in clusters of from forty to sixty blooms.

RULES THE WAVES.

The figures of the English Board of Trade show that in ships of over fifty tons, the British mercantile marine has 18,250,686 tons. This is nearly three times the tonnage of the United States, and four and a half times the tonnage of Germany, which countries have respectively 6,242,473 and 4,307,052. Again, the navy of Great Britain measures 2,046,126 tons of fighting ships to 708,107 tons for Uncle Sam, and 544,073 for the Kaiser.

RELICS OF ENGLISH LIFE

HOW CHURCHES HAVE PRESERVED HER HISTORY.

Originally They Were Erected by the Pious Pioneers of the Norman Age.

It has been said that if all the histories of England were burned they could be entirely rewritten from the parish churches. They are full of records of the past, in stones, in brasses, in effigies, in windows and innumerable other articles. One can travel through this country for weeks, visiting every mile or so a fascinating little pile of stones full of curious old relics of every age of English life, says a writer in the Living Church.

There was a book published a few years ago telling all about the many inns along the country roads, havens of delight to the weary walker or rushing motorists. Another traveller tells about the country churches in a fascinating volume published a short time ago. It might be wise for somebody to try a combination of these two things. I have just walked fifty miles through the country, and the country churches and country inns are most conveniently situated so as to make splendid toils one to another. After the inevitable breakfast of tea, bacon and eggs and marmalade one can stroll a few minutes and come upon a charming old church that may be

A FEW HUNDRED YEARS OLD and full of interesting records of the past.

Some of the churches show that originally they were erected by the pious pioneers of the Norman age. Times changed and the new conditions were met by busy hands of the Gothic period. It is easy to picture those busy scenes when years and years were spent in doing what, in these enlightened days of machinery, we can do in a few months, and do so badly by comparison. Then you can see how after generations spent in this labor on a parish church along came the generations of men who were much wiser and could see the folly of beauty. Smash, smash, smash went the hammer and now we can contemplate the results of their ruthless piety which would not tolerate beautiful statues and windows.

We see wonderful old figures of our Lord or the Virgin with the features quite broken off, or lovely windows through which the reformers threw big bricks in the interests of religion. And again we see the return of the religious feeling without the artistic spirit. The churches were somewhat "restored," and all sorts of hybrid monstrosities were placed in them. The old Gothic churches seemed to be structures carved out of single rocks. The decorations seemed to be growing on the walls and in the niches. Everything was in harmony. But in this age of restoration

THE SLABS AND EFFIGIES

were plainly out of keeping with the general scheme of the buildings, great growths of inartistic, ugly designs and covered with flabby sentimentalities. One writer recently expressed his idea that the marble slabs in Canterbury Cath-

FAST TRAINS IN EUROPE.

Some That Average a Mile a Minute and Better.

English railroad men are proud of the speed records on their lines. The fastest non-stop run in England is between Darlington and York. The Northeastern railroad does this forty-four and a half mile run at a speed of 61.7 miles an hour.

The Great Central's expresses cover the twenty-two and a half miles between Leicester and Nottingham at the rate of 61.3 miles an hour. The next best run is the Caledonian Railroad's express, which covers the thirty-two and a half miles from Forfar to Perth at 60.9 miles an hour.

The Great Western Railroad has some remarkably fast trains. Its non-stop expresses cover the distance between London and Bristol one hundred and eighteen and a quarter miles, at a speed of 50 miles an hour. The Great Western also runs non-stop expresses between London and Plymouth, two hundred and twenty-five and three-quarter miles, at a speed of 54.8 miles an hour. When it runs a special it cuts this figure away down.

Passengers landing at Plymouth are familiar with the Great Western's boat specials that take them from Plymouth to London. They cover level stretches often at a speed of 75 miles an hour. From Plymouth to Exeter the line is hilly, which reduces the speed.

The French railroad men too have some fast expresses that they may boast about. The Northern of France covers the run from Paris to Arras daily, one hundred and twenty miles, in 117 minutes. Its Paris-Busigny expresses do the one hundred and twelve and a half miles in 112 minutes; its Paris-St. Quentin expresses do the ninety-five and a half miles in 95 minutes; its Paris-Longueau expresses do the seventy-eight and three-quarter miles in 78 minutes.

This summer the French railroads speeded up their Paris-Berlin expresses. The morning train from Paris is timed to the Belgian frontier thus: Paris-St. Quentin, ninety-five and one-quarter miles in 93 minutes; St. Quentin-Erquelines, fifty-three and one-half miles, in 51 minutes, or at the rate of 62.9 miles an hour. The French railroad men think this is going some.

There are a dozen trains from London to Birmingham, just 110 miles, that cover the distance in 120 minutes to the tick. From London to Brighton, a popular seaside resort, is 50 1-2 miles, and a dozen expresses a day do the distance in just 60 minutes.

NEW WAR APPLIANCES.

Novelties Which Have Recently Been Invented.

An illuminating shell, which bursts into flame in the air and acts as a temporary searchlight, is amongst the latest ideas of war inventors. This shell, which has been put to severe tests, would enable an Admiral, for instance, to see the vessels of an enemy's fleet at a distance of several miles, the light burning long enough for the gunners to get the range. It is a French invention and not unlike the illuminating shell which has been adopted by the German Government. The latter is a projectile,

SOME ROYAL ROMANCES

PRINCESSES WHO HAVE NEVER MARRIED.

Clementine Waited Long for Bonaparte—Why Victoria Remains Single.

Princess Clementine of Belgium, who is now at the Moncaliere palace, near Turin, preparing for her marriage with Prince Louis Bonaparte, has waited long for this day. Just what reasons her father, the late King Leopold of Belgium may have had for refusing his consent to a marriage that was in every way appropriate and even desirable, were never known to the world.

WANTED HIGH LIFE.

There was so little reasonableness in his obstinacy that many take refuge in the explanation so frequently heard in his lifetime that he enjoyed too much his freedom in Paris, which was the result of his good understanding with the republican authorities, to jeopardize that by any union with the Bonapartes.

If he were awaiting from the Princess Clementine the same sort of conduct shown him by his other daughters, he was mistaken. She remained faithful to her lover, but obedient to her father. She made none of the scandals connected with her other sisters and awaited her father's death to carry into effect the wishes so long delayed.

REASONS OF STATE.

Princess Victoria, sister of the present King of England, is another royal princess who has never married. Prince Napoleon, son of the Emperor of France and the unfortunate Empress Eugenie, lived in his youth near the princess. They fell in love. Both mothers were in favor of the match, and even Queen Victoria's sympathy was won for the scheme.

But there were reasons of state why the marriage should not take place. The Prince Napoleon was a refugee from France. He was, like his parents, in banishment. In spite of the strong support of his suit, it was decided that the marriage could not take place. Germany could not be made distrustful of England's loyalty by such a union.

In the disappointment of the refusal, Prince Napoleon demanded that he be allowed to go at once into the world. He went to South Africa and fell before the assegais of the Zulus.

ROSEBERY NEXT.

The Princess Victoria put on mourning just as if she were a widow and spent much of her time with the Empress Eugenie. Then, after a while, she came to be friendly with Rosebery, who attracted her intellect rather than her heart.

It appeared, after a time, that this match might be suitable and the princess was not averse to it. Her father, then Prince of Wales, favored the union and Queen Victoria was not averse to it; but here the present queen mother intervened.

She refused to allow such a mesalliance with a commoner. Her will prevailed and a second time the Princess Victoria saw her marriage set aside for reasons of state.

A BALKAN ROMANCE.

FRIENDS OF LATE KING

CONSISTED OF MEN OF MANY STATIONS.

Lord Suffield Knew Him for Nearly a Quarter of a Century.

Among the surviving friends of King Edward Lord Suffield is perhaps the one who can claim longest acquaintance, for he enjoyed his Majesty's confidence for the greater part of half a century. Lord Knollys, of course, stands on an altogether different plane; as private secretary since 1870, he was in more intimate relationship with King Edward than anyone outside the ever-extending circle of the royal family.

SPORTSMEN FRIENDS.

Some few friends there are who, like Lord Coventry, have agreeable recollections of the manifestations of loyalty which were made when, about 1866 or 1867, the Prince and Princess of Wales first appeared in the hunting fields of Worcestershire.

The bolder rider of the two was Queen Alexandra, who was a charming figure in the hunting field, and notably when she and "the Prince" were the guests at Trentham of the late Duke and Duchess of Sutherland. That Duke, by the way, was one of the earliest chosen friends of "the Prince," and on at least one occasion, both in suitable dress, were to be seen on an engine dashing off to a great fire.

MANY LORDS TOO.

The names of a score of intimate surviving friends of King Edward rise in the memory. Among others are those of Count Mensdorff-Pouilly, Austro-Hungarian Ambassador, the Marquis de Soveral, Portuguese Minister; Mr. Alfred de Rothschild, Sir Ernest Cassel, a valued adviser of the late Sovereign; Lords Howe, Escher, Alington, Marcus Beresford, and Ilchester, and Lord Burnham, so often his Majesty's host at the annual "shoots" at Hall Barn.

Edward VII. was for forty years on the friendliest terms with another well-known man, the late Lord Glenesk. No one more than the King, enjoyed the audacious and witty articles, paragraphs and verses, which made the little Owl, under Borthwick's editorship, the most entertaining jounalette in the world. It was Mr. Bothwick (as Lord Glenesk then was) who, owing to his intimate relations with Napoleon III., was able to inform "the Prince" of what was happening when the exiles took up their abode at Camden Place, and from Queen Victoria and the Prince of Wales learned of the futile attempts made by the Emperor, the Empress Eugenie, and their supporters to restore the Bonapartist dynasty. By the King's death the Empress has lost her most powerful and most cherished friend.

THE YOUNGER SET.

Lord Alfred Paget was one of the companions of "the Prince" on "the days that were earlier." There was a considerable time when the two were almost inseparable. That was the gay period when the jeunesse doree swarmed around the Prince-Leader of London society.

mony. But in this age of restoration

THE SLABS AND EFFIGIES

were plainly out of keeping with the general scheme of the buildings, great growths of inartistic, ugly designs and covered with flabby sentimentalities. One writer recently expressed his idea that the marble slabs in Canterbury Cathedral record "the fictitious virtues of a lot of nobodies."

One of these slabs which I saw was in a little church in the village of Nettlebed (where I slept merely to say that I had slept in Nettlebed). It is as follows:

Here lieth Judeth Harris, etc., followed by—"Know Reader
That if Piety, Prudence, Witt, Innocence or Beauty could rescue from ye grave Shee had been Immortal. Since these are ineffectual, Dust and ashes. Read thy own Destiny and prepare to follow."

In Warborough, where the schoolmaster is buried, one reads:

The Lord himself instructed me
In science of Astronomy.
My works have shown what I have done

About the Earth, the Moon and Sun.

Can't work no more and called away

To meet the Lord without delay,
I hope the Lord will pardon me

For all my sins what'er they be.
On the tower of this church one reads this charming palindrome:

Lewd I did live
Evil did I dwell.

Robert Cox, 1668.

BEAUTIFUL OLD CHURCH.

It was in Dorchester that I had a hearty welcome. I arrived after a five mile walk over the hills, looking like a tramp. But the vicar's wife was an American, and therefore forgot my appearance and took me all over the beautiful old church, explaining its many attractions. It is one of the best specimens in all England and has been fortunate in its preservation and restoration. One window, the Jesse window, is unique among English church windows. It has suffered but little and stands to-day with all of its remarkable tracery and little stone saints. The figure of the Blessed Virgin and that of the Crucifixion have both been demolished. Pious Puritans probably did it!

To-day these churches are again the centres of the religious life of the people. Careful, reverent hands have done much to restore their original beauty, and they now stand as historical centres of a living religion to-day. And to the traveller who seeks for interesting research they more than repay his careful observation.

AN ARMY OF TURKEYS.

It is a novel sight to watch the arrival of the turkey sellers in Madrid, Spain. Each one conducts a numerous army of well-fed turkeys, and half the town turns out to see the procession. The way one man, with only a long slender rod, can marshal some hundreds of noisy birds through the traffic and past other troops is astounding. Not only has he to keep his subjects under the closest surveillance, but he must be prepared for the attacks of starving vagabonds who wish to obtain a turkey lunch for nothing.

vendors. This shell, which has been put to severe tests, would enable an Admiral, for instance, to see the vessels of an enemy's fleet at a distance of several miles, the light burning long enough for the gunners to get the range. It is a French invention and not unlike the illuminating shell which has been adopted by the German Government. The latter is a projectile, filled with calcium carbide, which breaks into flame as it falls into the sea, where it floats.

Another novelty in war appliances has just been secured by the great firm of Krupp. It is an air torpedo, which is reported to be one of the deadliest instruments of warfare yet devised. It is to be introduced into the German army and navy. Other recent inventions are the anti-airship gun, a shrapnel grenade adapted for use with the service rifle, and a new automatic gun mounted on a motor truck, said to be capable of conveying a supply of ammunition and a crew of ten men twenty-five miles an hour along ordinary roads, and to fire 3lb. shells a distance of three and a half miles at the rate of 250 shots a minute.

UNKNOWN SPEECH FOUND.

Remnants of Great Work in Unfamiliar Language.

The Calcutta correspondent of the London Mail writes that remarkably interesting documents from Central Asia have been acquired by the Asiatic Society of Bengal from a Montenegrin gentleman. They consist of five leaves of brownish-yellow paper measuring 8 inches by 5 3/4 inches.

The true significance of these five leaves, the genuineness of which cannot be doubted, is that scholars are confronted with consecutive passages in a language to which no clue has yet been found and if which hitherto only fragments have been rescued from the sands of Central Asia.

It is quite possible that, by means of these leaves, an important literary language, of whose existence the world has had no suspicion, may be rescued from oblivion. The paging on the reverse of each leaf shows that they once formed part of an extensive work.

STRANGE LAND LAWS.

At Corfu All Land Leases are Perpetual.

Corfu, where a magnificent marble palace belonging to the German Emperor has just been purchased by an American millionaire, can boast of the most peculiar land laws in the world. The landlords are nearly all absentees and their tenants hold the land on a perpetual lease in return for a rent payable in kind and fixed at a certain proportion of the produce.

Such a tenant is considered a co-owner of the soil, and he cannot be expelled, except for non-payment of rent, bad culture, or the transfer of his lease without the landlord's consent; neither can his rent be raised without his permission. Attempts have been made to alter the law, but both landlord and tenants are apparently satisfied with a system that dates back to the time of Homer.

It is pleasant to think that the people who make gateways to the heavenly road never get any farther on it.

favored the union and Queen Victoria was not averse to it; but here the present queen mother intervened.

She refused to allow such a messalliance with a commoner. Her will prevailed and a second time the Princess Victoria saw her marriage set aside for reasons of state.

A BALKAN ROMANCE.

The romance of the third unmarried princess has all the color of the Balkan region from which she springs. This is the Princess Xenia of Montenegro, the sister of the present queen of Italy.

Her romance is mixed up with the gypsies, the fortune tellers of the old world land in which she dwells. Once a blind prophet seized her hand, went into an ecstasy and foretold her fate.

"That is the hand of a princess," he is said to have told the young woman who had given him no hint of her identity.

"Listen well to me, for although I am blind, I can see a crown in the air. A man brings it to you, and I can see that he is laying it at your feet, but do not touch it. I can see blood there on it. Do not touch it."

FULFILMENT.

"Wait. I see a second crown. It is glorious and brilliant. It gleams as none other in the world. That is coming to you, too. Wait for it. It is pure, it is radiant."

The first suitor for the hand of the Princess Xenia was Alexander of Servia. The people of the country were opposed to him, so was the Princess Nicholas, and above all the Princess Xenia would have none of him. So he went back to Servia, married Draga and met his fate. That seemed the fulfilment of the first part of the blind prophet's warning. So Princess Xenia is awaiting the king with the shining crown.

BURN YOUR BRIDGES.

Tremendous Force in Going in Unreservedly for Life Work.

It is pitiful to see so many young drifters in our stores and offices and factories; young people who would like to get on, but who have never set their faces like a flint toward a single unwavering aim and burnt all their bridges behind them so that they should not be tempted to turn back.

There is all the difference in the world between the prospects of the man who has committed himself to his life purpose without reservation, who has burned all bridges behind him and has taken a sacred oath to do the thing he has undertaken, to see his proposition through to the end, no matter what sacrifices he must make or how long it may take, and the man who has only half resolved, who has not quite committed himself, who is afraid to cut off all possible retreat in case of defeat.

There is a tremendous force in the very act of committing one's self unreservedly to his great life aim; a propelling power in the very act of flinging one's being with all his might into what he is doing, determined never to turn back, that is well-nigh irresistible.

Irresolution or unwillingness to commit the whole of himself to his of the American youth of to-day.—Success Magazine.

most cherished friend.

THE YOUNGER SET.

Lord Alfred Paget was one of the companions of "the Prince" on "the days that were earlier." There was a considerable time when the two were almost inseparable. That was the gay period when the jeunesse doree swarmed around the Prince-Leader of London society. Lord Dupplin, Lord Blandford ("Jo," later Duke of Marlborough), were prominent figures in "the Prince's" set. The social chroniclers of those joyous days had plenty to write about; marvelous and most amusing were the stories, which were retailed by our "all London" in the later sixties and throughout the seventies.

WESTERN IDEAS IN CHINA.

Spread of Militarism and Modern Education.

Dr. Geil, the American traveller, who has already crossed China five times, has completed a twelve months' tour of all the provincial capitals of the Empire, says the London Standard. During a long overland journey to Cheng-tu, in Szechuan, he passed through parts of Kwangsi and Kwanchau, where the people had never before seen a white. Here he visited a tribe, whose women wear a dress resembling Scotch kilts. Dr. Geil says:—

"One of the things that remain uppermost in my mind is the general spirit of revolution which I met with. By this I do not mean an anti-dynastic or anti-foreign feeling so much as what I would call an 'anti-baby' movement. Particularly among the scholars and thinking men the opinion prevails that China is passing through a critical period of her history, and there is a feeling of resentment that a baby should be on the throne at such a juncture.

"I have attended provincial parliaments, I have visited schools and am surprised at the reality of the desire to bring China up to date. In Kwangsi, the great copper centre, I found a large school and a widespread desire on the part of the young men to take the full modern curriculum. There I found the youngest Governor of China himself attending classes on international law. His private secretary is a graduate of Cambridge. In the remote province of Kwachau I found that the prefect was erecting a great block of almshouses capable of accommodating hundreds of persons, and he had established a school for the study of silkworms."

Referring to the spread of militarism in China, Dr. Geil says that everywhere he saw evidences of a general plan for the preparation of an enormous army. Not only in the provincial capitals, but in the smaller towns, drilling was in constant progress.

BELIEVE IN YOURSELF.

It isn't easy to be a winner; you've got to believe in yourself above all others if you want to succeed. Believe in your strength, believe in your sincerity, believe in the truth of your soul and heart, and with these weapons of steel you may surely disarm the fiercest foe. Then forget the people, and you'll wonder at the magic of your success. Even the crustiest and most hardened old business speculator isn't proof against this belief. Try it and find out—experience it!

Not a Drop of Alcohol

What is a "tonic"? A medicine that increases the strength or tone of the whole system. What is an "alterative"? A medicine that alters or changes unhealthy action to healthy action. Name the best "tonic and alterative"? Ayer's Sarsaparilla, the only Sarsaparilla entirely free from alcohol. Ask your own doctor all about it. Never take a medicine doctors cannot endorse. J.C. Ayer Co., Lowell, Mass.

Without daily action of the bowels poisonous products must be absorbed. Then you have impure blood, biliousness, headache. Ask your doctor about Ayer's Pills for constipation.

ANCESTRY.

Some Famous Personages to Whom It Meant Nothing.

The making famous of the expression "I am my own ancestor" is usually credited to Andoche Junot, for a time a marshal of France. Junot had risen from the ranks and became the Duke of Abrantes and an important figure at Napoleon's newly formed court. One day a nobleman of the old regime asked him what was his ancestry. "Ah, sir," replied the spirited soldier, "I know nothing about it. I am my own ancestor." Probably he had never heard of the similar remark made by Tiberius about Curtius Rufus, "He seems to me to be descended from himself."

Napoleon's reply to the emperor of Austria was in a kindred vein. The Austrian when Napoleon became his prospective son-in-law would fain have traced the Bonaparte lineage to some petty prince of Treviso. "I am my own Rudolph of Hapsburg," said Napoleon. Under similar circumstance Napoleon silenced a genealogist. "Friend, my patent of nobility dates from Montenotte," his first great victory.

When Epichrates, the Athenian general, had it cast up in his face by a descendant of Harmodius that he was a shoemaker's son he calmly replied, "The nobility of my family begins with me; yours ends with you."

Almost the same words were used by Alexander Dumas when asked if he were not descended from an ape (covert sneer at his negro grandmother). "Very likely my ancestry begins where yours ends."

Voltaire in his "Merope" says: "The first to become king was a successful soldier. He who serves well his country has no need of ancestry."

How to Clean Varnished Wall Paper.

Varnished wall paper should never be cleaned by rubbing with a flannel or cloth. Procure a good soft white-wash brush, which can be bought at any oil store; then have a bucket of clean soft warm water in which yellow soap has been lathered. Dip your brush into the water, slightly squeeze it and commence rubbing gently from the bottom of the paper, working upward. You will thus have your paper free from smears and the varnish uninjured.

Miser's Hoard Dug Up.

A hoard of sovereigns was discovered one day lately by workmen engaged in clearing the Great Western Canal between Crickhowell and Brecon. A pick struck a hard substance, which was found to be a bag full of sovereigns bearing the image of George III. They had been placed in a jug, which in turn had been placed in a bag.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. Edison announced that he has succeeded in making moving pictures talk. What are the wild films saying?

Lethbridge Herald.

Just a gentle tip, Sir Wilfrid. We have over 12,000 population, and a postoffice not as large as your reception room at Ottawa.

Guelph Mercury.

The tube system for Toronto would cost twenty-three millions. Guess it was a "pipe" dream after all. The number is rather suggestive.

Toronto Globe.

A gentleman whose business takes him into every corner of the Province says that the farmers of Ontario were never in a better financial position than they are in to-day. That helps to explain the phenomenal increase in bank deposits.

Kingston Whig.

Henri Bourassa is one of Canada's higher critics. He was supposed to be a man of liberal mind, but his attack upon the Mayor of Montreal because he participated in the laying of a church corner-stone has stamped him as a bigot. The church of which he would be the champion cannot endorse his little views.

Woodstock Sentinel-Review.

Two farmers were fined the other day for bringing farm produce to the Toronto market and offering it for sale in less quantities than barrels, bags or bushels. The Magistrate who tried asked what the market was for, it not for, people to sell goods in, but the law was there, and he had to enforce it. Free trade as they have it in Toronto would suit a good many protectionists.

Windsor Record.

The Conservative press is not very strong in its defence of the job that elevated a layman to the head of the Orillia asylum for imbeciles. It is in fact indefensible. As well put a non-professional man at the head of any asylum or hospital, to say nothing of the public and individual injustice of dismissing a man who was not only a specialist in this work but is capable as ever of continuing his duties.

Goderich Signal.

Sir James Whitney, who is in Great Britain, is reported as having given this sapient remark: "I hope that I am wrong in expressing the fear that there are people in Britain whose first object is to maintain free trade, not the empire." It would have sounded quite as well and would have been just

THE BLUE LINEN GOWN.

A Lost Bag and a Chase For the Owner.

By CLARISSA MACKIE.

[Copyright, 1910, by American Press Association.]

"Main floor—all out!" An elevator gate crashed open and sharp heel taps rapped across the tessellated floor, and a girl paused beside Fielding. He caught a glimpse of an exquisite profile under the drooping brim of a wide hat and a soft roll of dusky hair and a perfect figure gowned in blue linen. Then the girl flattered away and boarded a downtown car.

Fielding's eyes came back and discovered something lying at his feet. He picked it up just in time to save it from the snatching grasp of a ragged street lad.

"Me mother lost it," asserted the boy brazenly as he hovered near.

Fielding smiled as he looked at the dainty bag of blue linen and white leather, heavily stitched and bearing a small monogram in gold in one corner. He tossed a quarter to the boy and studied the monogram closely. The intertwined letters were A and E.

With sudden recollection that the girl was getting farther away from him every moment, he jumped on the next South ferry car, stuffing the bag in his coat pocket.

He had scarcely ridden two blocks when a northbound open car passed swiftly. He caught a glimpse of a blue linen gown and large hat before it whizzed from sight. In another instant he was on the ground and crossing the street to catch the following car.

He made it easily and with a degree of satisfaction, for he felt no doubt that the owner of the blue bag was on her way back to the Biggs building to search for her lost property.

Fielding leaped from the car and dashed across the street in spite of a policeman's warning hand.

She had turned and was walking through the lobby when he reached her

Synopsis of Canadian Northwest Land Regulations.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section along side his homestead. Price, \$3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry including the time required to earn homestead patent and cultivate fifty acres extra. A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price \$5.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$500.00.

Sir James Whitney, who is in Great Britain, is reported as having given this sapient remark: "I hope that I am wrong in expressing the fear that there are people in Britain whose first object is to maintain free trade, not the empire." It would have sounded quite as well and would have been just as sensible, if Sir James had said that there are people in Britain and elsewhere whose first object is, not to maintain the empire, but to advance their own personal interests by the advocacy of protection.

Ottawa Free Press.

Sir James Whitney has no more to do with the Canadian tariff or with the future of that tariff than has any private citizen of the Dominion. Of course, he has this private citizen's right to provide the London newspapers with copy, but he is sorely perverting that right inasmuch as his views would not be sought by these papers were it not for his public post. Moreover, the people of the old land will be prone to attach to Sir James' remarks more or less of semi-official significance. Sir James would do well to take a hint from Sir Wilfrid Laurier as to discretion in the giving out of newspaper interviews. He would do well to put the plug in.

Conquered the Orchestra.

In his early days Herr Arthur Nikisch, the famous conductor, was appointed to conduct a performance of "Tannhauser" at the Leipzig opera. He was but a young chorus master at the time, and the orchestra absolutely refused to play under so youthful a conductor. They were only induced to do so when a director said that if they were of the same mind after the overture had been played they could then and there hand in their resignations. The overture was a veritable triumph for Nikisch, and with profuse apologies the orchestra offered him their congratulations.—London Tit-Bits.

Dodging the Bore.

The tardy clubman paused at the door of the smoking room. "Bingley," he asked, in a whisper, "has Blodger given out the daily statement of his health and told all about his symptoms yet?" "Yes," said the man inside the door, "He's just finished." "All right, I'll come in."—Chicago Tribune.

"OH, YES, INDEED, IT IS MINE."

side. He removed his hat and mopped his dripping face.

"I beg your pardon," he ventured to the crown of her big hat.

She stopped and turned a surprised face to his—not the exquisitely beautiful face he had hoped and expected to see, but the plain and intelligent countenance of his head stenographer, Miss Murphy.

"What is it, Mr. Fielding?" she asked, with surprise.

"I—I thought it was some one else," stammered her employer dazedly. "You see, I was looking for some one in a blue gown, and I thought you were she."

Miss Murphy looked suspiciously at his flushed countenance and noted his incoherent speech.

"Lots of girls are wearing these blue dresses," she reassured him; "most any one would have made the same mistake. Terribly hot, isn't it?" She bowed respectfully and caught an elevator going up.

Fielding stood in the doorway once more, hot and bewildered with his fruitless chase and angry with himself for having been so easily led astray by a blue gown and a large hat. Come to think of it, Miss Murphy's gown had lacked the peculiar attractiveness of that other, and her hat was a black one, while the one he sought was a soft white leghorn—not that Fielding knew a leghorn hat from a beaver or any other sort—he simply knew black from white.

He decided that there was a bare chance he might get a glimpse of the right girl if he once more invaded the lower downtown district. The owner of the blue bag must have missed it by this time, and every moment was only making his search for her more difficult. Of course he could advertise the bag, but that would be quite different from meeting the divinity herself and delivering the bag into her surprised and grateful hands!

Fielding forgot heat and hunger and weariness as he pursued his search for the blue gown. While he waited for a southbound car he caught a glimpse of a girl in a blue gown entering a

jewelry store close by. Her hat was white and flapping, and he could not see the color of her hair, but her figure was everything to be desired and admired.

It was the work of an instant to enter the store and cautiously survey this girl in the blue gown, when a pink and white baby face, surrounded by puffs and sausages of pale golden hair, confronted him haughtily. He hurriedly made exit and boarded the first car that came along, trying to forget the anxious eyed jeweler who had rushed to the door in his wake.

Block after block the car jerked its way down to the Battery, Fielding, hot and eager and feeling very much of a fool in his obstinate quest. His afternoon was quite spoiled. There would be no shore dinner at the yacht club, no pleasant run through the Jersey roads. When the car reached the terminus he would take the subway and make a dash for home and a tub and then search for a bite to eat, for he was ravenously hungry.

At the Battery the green park lured his tired eyes from the hot streets, and he strolled for a few moments, watching the crowds hurrying to and from the ferries, his glance alert for the wearer of a blue linen gown. His common sense told him that the flower-

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. The Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY

YOU NEEDN'T DESPAIR

Here's an Offer that Should Interest Sufferers of Skin Irritation.

First of all we want to explain that the remedy we are about to tell you of carries our promise of money back for the mere asking to anyone not thoroughly pleased with its use. That should unquestionably establish the sincere faith we have in it.

Parasites or germs cause eczema and eczema is probably the most prevalent cause of all skin ailments. To overcome them, the remedy must of necessity destroy or remove the parasite or germ before relief can be obtained.

Possessing remarkable antiseptic, germicidal, cleansing, soothing and healing power, the curative value of Rexall Eczema Ointment is very pronounced in the treatment of eczema and allied skin diseases, whether of the dry scaly sort, the weeping type, where there is a flow of ill-smelling excretion, or the intermediary kind, such as pimples, blotches, discolorations, ringworm or acne. It is very useful for treating hives, nettle rash, insect bites and wounds. It is ideal for the skin ailments peculiar to children.

Rexall Eczema Ointment is grayish white in color, has a pleasant odor, and is very cleanly for use. If you are a sufferer of skin irritations or eruptions in any form whatever, we urge you to try a box at our risk. At the mere hint of dissatisfaction, you may have your money back. Two sizes, 50c and \$1.00. Remember, it is only sold at our store. The Rexall

heat another minute, so she agreed to come down to the Battery and wait for us. When an hour passed and you hadn't returned I just came on! Now, where is Alice and where did you meet her?"

"Did she have on a blue linen gown and is she—is she—beautiful?" demanded Fielding eagerly.

"Yes—to everything," said his sister, with a curious glance. "I always said when you saw her you'd fall down!"

"She's here, then—see, yonder!" Together they walked along the gallery, and then there was an exquisite moment for Fielding when Eleanor introduced the girl in the blue gown and her little gloved hand rested in his for a brief instant.

One day, long afterward, Jack Fielding told the girl in the blue gown how much he loved her.

"You see, dear," he concluded tenderly. "It must have been foreordained that we were to be more than ordinary acquaintances or I would never have been started on that mad chase in the hottest day of the year after your blue gown!"

"Very true," said Miss Evans demurely.

"And what are you going to tell me, dear?" he questioned anxiously.

A sweet smile curved her tender lips and her brown eyes sought his with the look that comes only once with its beautiful revelation—it's gracious surrender.

"Now that you have found me," she whispered softly, "you must keep me

LAWYERS IN GERMANY.

No Other Country in World Where They Enjoy Greater Confidence.

The German law fixes the exact fees which a German attorney has to claim for all kinds of professional work and the rechtsanwalt, or lawyer, can charge neither more nor less. These fees apply to all matters of the civil code and of criminal cases. The amount depends exclusively on the value of the object of contention.

It is an old though still unfulfilled wish of German lawyers to have a new fixed list of fees—not made after the old and low standard of the year 1878, but made with consideration to the changes which have taken place since that year.

The rechtsanwalt is attorney and counselor at law all in one (in England solicitor and barrister). The rechtsanwalt can never be a business man as is the case in the Anglo-Saxon nations. The exercise of the law is not to be considered a calling or profession, but is to be looked on more as a public office. According to the lawyers' code of the list of July, 1878, lawyers are charged publicly with certain duties. He is obliged to have his residence in the town or district where he is appointed (so called residence duty). Further, he must conduct himself in and out of office in a way befitting his professional and social standing. Thus a lawyer is forbidden to advertise in newspapers, by canvassing, etc., or to buy or take over a practice already made, as being unworthy of his calling.

His position in society is between officials and scholars and through custom and law he is compelled to keep the position to the last degree. This compulsion to keep one's rank has given rise to the existence of committees called anwaltskammern, whose duty it is to keep a strict watch that no lawyer dishonors his calling. These committees have a strict code of punishment, ranging to complete expulsion from office. In this way the lawyers in Germany have a good and honored position; in fact there is scarcely a country in which the lawyer enjoys more respect and confidence.

Birds' Eggs Too Much For Science.

It is not often that science acknowledges herself at fault in an apparently simple matter, but she frankly does so in regard to the color and marking of a large proportion of birds' eggs. A reason there must be for their infinite diversity; it cannot be an aesthetic one, and all we can say with any confidence is that the ever pervading instinct of distrust is probably exhibited in eggshells as in more important things, and the main idea in their scheme of coloration has been the securing of safety from many enemies by harmonizing them with their surroundings. But it is a scheme full of perplexing exceptions, which any one can study for himself.—Pall Mall Gazette.

Iceland's Hot Springs.

The hot springs in Reykjadal, though not the most magnificent, are perhaps the most curious among the numerous phenomena of this sort in Iceland. On entering the valley you see columns of vapor ascending from different parts of it. There are a number of apertures in a sort of platform of rock. The water is 212 degrees F., and it rises two or three feet into the air. A river flows through the valley, in the midst of which a jet of boiling water issues with violence from a rock raised but a few feet above the ice cold water of the river. Not far from this is the grotto or cave of Surt, which is so large that no one has penetrated to its inner end.

Mystery of the Sargasso Sea.

No steamship could ever penetrate the Sargasso Sea, that floating continent of yellow weeds, almost as large as the United States, lying in the middle Atlantic. The tangling weed would choke its propeller and make

like face of the girl he sought would not be among these crowds, but rather uptown.

Just then he saw her—unmistakably the one he sought. She was entering the door of the aquarium, and Fielding—old New Yorker that he was—who had never been inside its doors, was quickly after her.

Quietly, unobtrusively, he followed her from case to case, now and then catching a glimpse of her sweet face and again seeing nothing save the brim of her pretty hat. At last in the upper gallery he stood close beside her while they watched the darting golden forms of tiny tropical fishes.

Apparently she had not noticed his presence until he spoke in a low voice, and then she started and flushed rosily. "I hope you will pardon me," he was saying, hat in hand, "but didn't you drop this bag in front of the Biggs building this afternoon?" He drew the bag from his pocket and held it forth.

"Oh, yes, indeed. It is mine," she said, with a joyful little laugh. "I missed it after I had boarded my car, and as I didn't know just where I had lost it I concluded not to bother about it. It contained nothing but my cards. Thank you very much."

She turned away with a graceful little gesture that indicated the interview was at an end, and Fielding, mentally cursing himself for an idiot that he had not investigated the bag and at least discovered her name, moved slowly in the opposite direction.

Absorbed in these melancholy thoughts and with the excitement of his quest at an end, he was leaning over the rail, gazing moodily at the performing seals on the floor below, when he heard the sound of a familiar laugh and his name uttered.

"Jack! Where did you come from? I've been waiting hours at the office for you."

His sister Eleanor panted indignantly toward him, her eyes wide with surprise. "Where is Alice—I thought you didn't know her?"

"I don't know her—wherever she is," he said a bit crossly. "What's up, Nell, and why were you waiting for me at the office?"

"You know I've been expecting Alice Evans to visit me. Don't say you have forgotten, Jack Fielding! She came this morning, and where do you think the child wanted to go the first thing? Why, the aquarium, of all places, and I had never been here myself! So I told her we'd go down to your office and you would take us to luncheon, and then we three would go down to the aquarium together!"

"Exactly!" said Fielding impatiently. "Well, we went to the Biggs building, and we must have passed you when we went up in the elevator, for they said you'd just gone down, and as they didn't know whether you had gone for the day or not we decided to wait. Alice became tired after awhile and said she couldn't stand the

dear?" he questioned anxiously. A sweet smile curved her tender lips and her brown eyes sought his with the look that comes only once with its beautiful revelation—it's gracious surrender.

"Now that you have found me," she whispered softly, "you must keep me forever."

Easy Way of Measuring Heights.

Anybody who knows how to take the altitude of the sun or a star with a sextant and wishes to take that of any distant hill, steeple or the like should put a tea tray on the ground, fill it with water and then retire from it until the top of the hill, steeple or what not is reflected in the liquid. Now take the sextant and make the image of the summit coincide with its reflection in the liquid. The angle of elevation will thus obviously have been measured double. Half of this will give the measurement required.

The Dead Sea.

The daily average of 6,500,000 tons of water is received into the Dead Sea from the Jordan. There is no outlet, and the level is kept down by evaporation only, which is very rapid because of the intense heat, the dry atmosphere and the dry winds.

His Easy Way.

"Is he lazy?" "I would hardly say that. You've heard the expression, 'Unseemly haste'."

"Why, certainly." "Well, all haste looks that way to him."

Conclusive.

Briggs—It's too bad about Winkle and the girl he is engaged to. Neither of them is good enough for the other.

Griggs—What makes you think that? "Well, I've been talking the matter over with both families."—Life.

It is useless to attempt to reason a man out of a thing he was never reasoned into.—Swift.

Nervous Prostration For Three Years

"Dr. Miles' Restorative Nervine cured me of a period of nervous prostration of over three years duration, and the Anti-Pain Pills are as necessary to us as the roof of our house. They have been household remedies with us for many years."

WM. J. LOUGHRAN,
1214 Catherine St.,
Philadelphia, Penna.

Much sickness is due to nervous troubles. Headache, dizziness, epilepsy and insanity are nervous troubles. Then there is a large class of disorders which arise from a weakness of the nerves of an organ or part, as weak lungs, heart, stomach, kidney, bladder, eyes, etc. Dyspepsia and indigestion are usually the result of nervous disorders.

Restorative Nervine

soothes the irritated nerves, and assists the nerve cells to generate nerve force.

Price \$1.00 at your druggist. He should supply you. If he does not, send price to us, we forward prepaid.
DR. MILES MEDICAL CO., Toronto,

Mystery of the Sargasso Sea.

No steamship could ever penetrate the Sargasso Sea, that floating continent of yellow weeds, almost as large as the United States, lying in the middle Atlantic. The tangling weed would choke its propeller and make it useless. The skipper of any sailing craft who runs his prow into this thick web of weed through any of the mischances of navigation is fortunate indeed if he escapes quickly. The Sargasso Sea is baffling. It is not solid enough to walk upon nor liquid enough to permit the navigation of a boat. Whoever falls into it is drowned forthwith. The clinging weed grasps and holds and makes the stoutest swimmer powerless.

AFTER SUFFERING YEARS

Cured by Lydia E. Pinkham's Vegetable Compound

Fox Creek, N.B.—"I have always had pains in the loins and a weakness there, and often after my meals my food would distress me and cause soreness. Lydia E. Pinkham's Vegetable Compound has done me much good. I am stronger, digestion is better, and I can walk with ambition. I have encouraged many mothers of

families to take it, as it is the best remedy in the world. You can publish this in the papers."—Mrs. WILLIAM BOUQUET, Fox Creek, N.B., Canada.

The above is only one of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which prove beyond a doubt that Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, actually does cure these obstinate diseases of women after all other means have failed, and that every such suffering woman owes it to herself to at least give Lydia E. Pinkham's Vegetable Compound a trial before submitting to an operation, or giving up hope of recovery.

Mrs. Pinkham, of Lynn, Mass., invites all sick women to write her for advice. She has guided thousands to health and her advice is free.

The Great Painter Achieved It by Years of Self Sacrifice.

Turner could not bear to sell a favorite painting. He was always melancholy after such a transaction. "I lost one of my children this week," he would sadly exclaim. At a meeting at Somerset House it was decided to purchase his two great pictures, the "Rise" and the "Fall of Carthage," for the National gallery. A Mr. Griffiths was commissioned to offer £5,000 for them. "A noble offer," said the painter, "a noble offer; but, no, I cannot part with them. Impossible." Mr. Griffiths, greatly disappointed, took his leave. Turner ran after him. "Tell those gentlemen," he said, "that the nation will most likely have the pictures after all." Long before this Turner had matured a purpose which continued to be his dominant idea while life lasted. This was to bequeath to his country a Turner gallery of pictures and to amass £100,000 to build and endow an asylum for decayed artists. It was for this great object that he denied himself all pleasures that cost money, all luxuries. His resolve, once made, could not be shaken. On one occasion he was offered £100,000 for the art treasures locked up in the "den." "Give me the key of the house, Mr. Turner," said a Liverpool merchant, "and here is the money." "No, thank you," replied Turner. "I have refused a better offer." And that was true. By his will he bequeathed £140,000 to found an asylum for poor artists born in Eng-

THE TRAIN BABY.

Her Presence Saved the Passengers From Death.

By WILLIAM ALFRED COREY.
[Copyright, 1912, by American Press Association.]

The shrill cries of the motherless child arose above the roar of the train and the labored coughing of the two big mogul engines as the Overland limited slowly climbed the steep grades between Salida and Marshall pass. Do what she would, the woman the train crew had installed as nurse could not pacify the poor little waif. It had been supplied with everything a baby could be imagined to need or want.

Indeed, the nurse had a suspicion that this overattention and overfeeding were what ailed the infant in the present crisis. Too much and too many kinds of candy from people who could think of no other way to show their interest had brought on colic.

"Come back and see Pacifica, Bill," said the conductor to the engineer of

"Hi, there, ye little furrigner!"

the through train when she finally came to a stop on the cold but sun crowned height of the pass. "Pacifica's in a bad way. Maybe you can quiet the kid. Nobody else can."

The trainmen had named the baby "Pacifica" and adopted her as their own when they wired the authorities in Los Angeles of the mother's death and made arrangements for the infant's care. "The little czarina," "Babyofsky" and various other names had been suggested. But Cy Werner, the fireman, whom the engineer described as "a sort of bookish, sentimental cuss," had insisted on "Pacifica" as the most appropriate name, and the rest had acquiesced. So "Pacifica" the little stranger was throughout the rest of the long journey.

"All right, Mr. Barnes," said the big engineer; "I'll be there directly."

And "directly," when he had finished "olling 'er up" and deposited the long nosed can in its place in the cab, he started back along the train to where the little uncrowned queen lay yelling at full lung power, which was excellent, and kicking and fighting like a

pink toe between the fingers of the other. "Wot's the matter? Don't Ameriky suit ye nother?"

Then he opened his eyes wide and said "Boo!" as he bent down low and looked into the blue depths of the big orbs.

"O-o-ogle, oogle, goo, coo!" said the baby as her cries suddenly ceased and a wide smile of delight spread itself over her face.

"I think so myself," said the engineer, tickling Pacifica's fat chin with a stout finger.

"Goo-goo-google gee!" again remarked the baby, suddenly grasping the engineer's long mustaches with both hands and hanging on as though suspended in midair.

"Ouch, ye little terrorist!" winced the engineer, while the ring of bystanders roared.

But the infantile crisis was passed, and with a "that's the way to do it" air the man of the throttle and drive wheels went back to his seat in the cab, the conductor called "All aboard!" and the train resumed its journey toward the sunset slope.

They were snowed in for a day before reaching Ogden, and Pacifica was almost the sole diversion wherewith the storm bound community beguiled the slow hours. A stranger in a far strange land, she had more friends than she could well manage, though all were willing to be managed. The only baby on the train, her welfare was apparently the one concern of all.

Elegant, fur wrapped ladies brought dainties from the Pullman car buffet to please the child of poverty and misfortune. Dignified men of wealth and affairs inquired anxiously as to the little one's comfort and wanted to know if there was anything they could do. A newly married couple on their honeymoon were effusively solicitous. A titled somebody from somewhere calmly adjusted his monocle and smiled grimly as he studied the bit of democratic humanity. All did what they could. And many who could do nothing else paid the eloquent tribute of silent tears. A baby, a poor helpless waif from a foreign land, had done what has baffled the logic of centuries—it had broken the granite barriers of social caste and captured the citadel of the common human heart.

The snow blockade was raised, and the train moved on. And Pacifica ruled her moving autocracy with her scepter of love as they passed Ogden, crossed the sagebrush deserts of Nevada and climbed the Sierras. She wanted for nothing that her loyal subjects could supply. As each successive crew took charge of the train the baby was duly and cheerfully accepted as a part thereof. These blunt, rough men of the iron rails were as gentle and tender with the orphaned child whom chance had thrown in their way as though she had been of their own flesh and blood. If she was fretful at a siding or desert watering tank she would be taken out of her car and passed about among the trainmen, train dispatcher, conductor, engineer, fireman, brakemen, porters, baggage-men and hotel runners, all taking awkward turns at holding her or otherwise contributing to her entertainment. Pacifica owned the train and the whole works.

The Sierras were crossed, Sacramento was reached and passed, and the train headed south toward the San Joaquin and Los Angeles.

A few miles south of Sacramento a storm, suddenly blowing in from the ocean, was encountered, which increased in violence as they neared Bakersfield and the Tehachapi mountains.

SAVED FROM THE

Appendicitis Cured By

NEWBY

"Just about a year ago, our daughter Ella, terrible pains in the right side. The pain was to bed. We at once put her under the care of a it a case of Appendicitis and advised an operation."

We took her to a hospital in Kingston where eminent specialist. He said she had Appendicitis and we wanted to save her life. As we did this done, we were ready, but our daughter was

earth, and you fellows and 200 passengers ought to be furnishing fuel for your own cremating down yonder at the foot of the grade. But I disobeyed orders to play with a sick baby, and death missed us by five minutes."

And twenty-four hours later, when the belated Overland crossed the divide, emerged from the storm into the sun flooded valleys to the south and reached its destination, Pacifica, the train's good angel, carried a purse of \$500 and thanks in all the languages to the sad hearted Russian father who, with a large contingent from the foreign quarter, waited at the Arcade station.

CHICKEN RACES.

The Ridiculous "Hen Derby" Instituted by Sir John Astley.

It is said that the crowning triumph of Sir John Astley, that inventor of absurd contests, whose forte it was to arrange races between animals which nature apparently had made most unsuitable for the purpose, was the institution of the only races that ever took place between chickens.

The story is that the idea came to Sir John during a visit to a friend who kept a large number of hens. He noticed how rapidly the chickens used to scurry to their mother when food was thrown to her. This furnished the ingenious Sir John with a clever notion, and at mess, he then being quartered at Windsor, he accordingly unfolded to his brother officers his plans for a great chicken race.

He bought from a farmer a hen and a brood of chickens. Each officer was to choose a chicken and mark it with a ribbon, so that he could easily recognize it. The chickens were to be placed about fifty yards away from their mother, and whichever of them reached her first in answer to her cackle when

of the house, Mr. Turner," said a Liverpool merchant, "and here is the money." "No, thank you," replied Turner. "I have refused a better offer." And that was true. By his will he bequeathed £140,000 to found an asylum for poor artists born in England and a magnificent art collection to his country. This latter bequest was, however, coupled with the condition that his "Rise and Fall of Carthage" should be hung in the National gallery between Claude's "Sea-port" and "Mill"—London Graphic.

And "directly," when he had finished "oiling 'er up" and deposited the long nosed can in its place in the cab, he started back along the train to where the little uncrowned queen lay yelling at full lung power, which was excellent, and kicking and fighting like a true revolutionist.

The engineer's hypnotic presence worked quick and marvelous results. "Hill, there, ye little furreigner, wot's the matter?" he called out, dangling a glove above the improvised crib with one hand and catching a diminutive

train headed south toward the San Joaquin and Los Angeles.

A few miles south of Sacramento a storm, suddenly blowing in from the ocean, was encountered, which increased in violence as they neared Bakersfield and the Tehachepi mountains.

At Bakersfield the wind was blowing a fifty mile clip, and the rain was coming down like a cloudburst.

"Ticklish business up there, Rogers," yelled the conductor to the engineer as he waved his hand toward the storm swept heights of the Tehachepi. Rogers had no need to be told of the danger of landslides in this the first severe storm of the season.

It was 11 o'clock that night when the engineer stopped for water a short distance below tunnel No. 5. The night was very black, and the storm beat and roared about the train like an army of demons. The trainmen, incased in their long raincoats, flashed their lanterns about, examining boxings, testing air brakes and otherwise making ready for the next run, when suddenly Pacifica's baby wail from her car just back of the mail car arose above the noise of the storm.

It reached the ears of the engineer walking back by the tender, and straightway, instead of the screaming wind and pelting rain, he heard the voice of his own child calling to him from a new made grave in Los Angeles, and instead of the two glistening rails stretching away from the headlight into the gloom he saw the pleading eyes and outstretched arms of his dead boy. And the heart of the brave man came up in his throat, and he felt coming over him the weakness that for days had incapacitated him after his loss.

"Oh, my God!" he muttered to himself as the plaintive cry again smote his ears. "That sounded like little Bob."

And then Engineer Rogers did an unprecedented thing. Telling his fireman he would return in a minute, he started back through the storm to where Pacifica lay crying and refusing to be comforted.

Dripping with storm water, he edged his way through the circle of attendants and bent over the train baby's crib.

The crying instantly ceased. Whether it was the play of the car lights on his wet raincoat or the hypnotism of love in his presence there was no telling. But the plaint stopped and was not resumed until he had toyed with her for a moment and turned to go.

Then the wailing began again, nor did it cease until the engineer turned and again smiled down into the big blue eyes.

The moments followed each other unnoted, and the Southern Pacific Overland limited was being held while her engineer played with an orphaned emigrant child. Again and again he turned to go, and again and again the baby arms were held out in irresistible appeal.

Suddenly the roar of the storm outside was interrupted by a deeper and more significant roar, mingled with rending, crashing sounds, followed by a concussion which shook the whole mountain side.

A landslide! Not a trainman but recognized these ominous sounds. Instantly a handcar was manned and went forward to reconnoiter.

A mile up the track they found the mouth of tunnel No. 5 completely barricaded by a vast mass of huge boulders and earth and tree trunks, swept from their anchorage on the heights above.

Rogers held his watch in the light of a lantern. "According to schedule," he said calmly to the grim faced men about, "my fireman and I ought to be lying under that pile of rocks and

being brought from a farmer a hen and a brood of chickens. Each officer was to choose a chicken and mark it with a ribbon, so that he could easily recognize it. The chickens were to be placed about fifty yards away from their mother, and whichever of them reached her first in answer to her cackle when food was thrown to her was to be adjudged the winner.

And so this ridiculous "hen Derby" came off in the barracks at Windsor and was witnessed by nearly the whole brigade of guards, who traveled down from London especially to see it.

The race was such a success that it was arranged to repeat it the following week. It might possibly have become a regular institution and a racing stable of chickens might have been added to the attractions at Windsor had not Sir John's chicken won on each occasion with such ease as to cause suspicion in the minds of his competitors. Indeed, it was found, it is said, that in both races Sir John had selected a sturdy young cockerel who was much too speedy for his sisters. When victory was a certainty for one particular competitor the contest, of course, lost interest, and so the chicken races at Windsor came to a sudden end.—New York Herald.

A WITTY PASHA.

He Told the Missionary a Story to Fit the Occasion.

Official bribery is common in the east, and it is a tender subject there, as a humorous story told by the late Rev. H. H. Jessup, D. D., in his book, "Fifty-three Years in Syria," bears witness.

One day in 1873 Dr. Van Dyck, manager of the press in connection with the work of propaganda of the Syrian Protestant college at Beirut, was sent for by Kamil Pasha, the governor, to come to the seral, as he was about to shut up the press for a violation of the press laws. Dr. Van Dyck proceeded to the seral and asked the pasha what he meant.

The pasha, holding up a little tract, said, "Was this printed at your press?" "Yes."

"Then it must be confiscated, as it contains an attack on the Turkish government."

"Wherein," asked Dr. Van Dyck, "does it attack the government?"

The pasha pointed out several passages which criticised the bribery and corruption everywhere prevalent, perjury and lying among witnesses and public officials and the fact that "truth had fallen in the streets and equity could not enter."

"Are not these statements true?" said Dr. Van Dyck. "Your excellency ought to put a copy into the hands of every government official in your pashalic. Is it not so?"

"Have you never heard the story of the Cadi el Ah War?" asked the pasha. "And what is that?" queried the doctor.

"Well," began the pasha, "once there was a famous one eyed cadi (judge). One day a man came to court and addressed him as follows:

"Good morning, O one eyed cadi! May your day be blessed, O one eyed cadi! I have heard of the noble character and justice of the one eyed cadi, and I would ask the distinguished and revered one eyed cadi to do me justice, and—"

"Stop!" interrupted the cadi. "Supposing I am one eyed, do I want to be everlastingly reminded of it? Get out of my sight!"

"And so," concluded the pasha, "we know that these reflections on our country and our courts are true, but we don't want to be publicly reminded of it!"

MEN-YOU NEED NERVE

EARLY INDISCRETIONS AND EXCESSES HAVE UNDERMINED YOUR SYSTEM

The nerves control all actions of the body so that anything that debilitates them will weaken all organs of the system. Early indiscretions and excesses have ruined thousands of promising young men. Unnatural drains sap their vigor and vitality and they never develop to a proper condition of manhood. They remain weaklings, mentally, physically and sexually. How you feel? Are you nervous and weak, despondent and gloomy, specks before the eyes with dark circles under them, weak back, kidneys irritable, palpitation of the heart, bashful, debilitating dreams, sediment in urine, pimples on the face, eyes sunken, hollow cheeks, careworn expression, poor memory, lifeless, distrustful, lack energy and strength, tired mornings, restless nights, changeable moods, premature decay, bone pains, hair loose, etc.

This is the condition our New Method Treatment is GUARANTEED TO CURE. We have treated Diseases of Men for almost a lifetime and do not have to experiment. Consult us FREE OF CHARGE

and we will tell you whether you are curable or not.

We guarantee curable cases of NERVOUS DEBILITY, VARICOSE VEINS, BLOOD AND SKIN DISEASES, GLEET, BLADDER URINARY AND KIDNEY COMPLAINTS

Free Booklet on Diseases of Men. If unable to call write for

FROM THE KNIFE

ired By "Fruit-a-tives"

NEWBURGH, ONT., Feb. 12th, 1910.

daughter Ella, (fourteen years), was taken with the pain was so severe that we had to carry her to the care of a first-class doctor, who pronounced it an operation.

Kingston where she was again examined by an e had Appendicitis and must be operated on at life. As we had taken her to Kingston to have r daughter was afraid and cried and begged so pitifully, that we postponed it for that day. Luckily for us and for her, an uncle came in with some 'Fruit-a-tives' and insisted on Ella taking them. Good results were apparent, almost from the first dose, and the continuous treatment cured her.

'Fruit-a-tives' saved our daughter from the surgeon's knife and to-day she is enjoying the best of health."

J. W. FOX, (Father).
LILLIAN FOX, (Mother).

Words cannot express the gratitude of Mr. and Mrs. Fox. And Miss Ella will always remember "Fruit-a-tives"—the discovery of an eminent physician, and the only medicine in the world made of fruit. 50c. a box, 6 for \$2.50, or trial box, 25c. At dealers, or sent, postpaid, on receipt of price by Fruit-a-tives Limited, Ottawa.

CENSUS OF MORTALITY, DISABILITY AND COMPENSATION.

The date of the next census for Mortality, Disability and Compensation is 1st of June of next year, which is the same as the date for Population. It is a record for one year, and gives the information concerning all persons to whom the schedule relates for the year counting to the hour of midnight of 31st May 1911.

Personal description of every person who has died in the year, or suffered disability by accident or sickness and has received compensation therefor is required in the schedule, and for more complete identification reference is made to his family or household in the first schedule.

The name and sex of each person, and whether single, married, widowed, divorced or legally separated, together with the month of birth, the year of birth, the age at last birthday and the country or place of birth are required under personal description. His or her racial or tribal origin, religion and profession, occupation or trade, will also be recorded under the general heading of personal description, whether the reference is to persons who have died within the year or to persons who have been disabled within the year by accident or sickness, and to persons who have sustained loss of time and earnings and to allowance or compensation for loss of life or time.

Under the heading of Mortality records will be entered showing the month of death in the census year, the disease or cause of death as described by the Bertillon nomenclature, the place of death if it occurred away from home, and the name and address of the attending physician.

Disability and Compensation relate to accident or sickness, and under these heads records will be entered of the nature of loss or injury caused by accident in the year, cause of the accident, weeks of disability due to sickness or accident, and loss of salary or other earnings caused by sickness or accident.

Allowance or compensation made to employers is recorded under three heads: 1. The voluntary allowance which may be made to employee by employer for lost time through sickness or accident during the year. 2. Compensation in the year by employer under statute for (1) loss of life by accident, and (2) for injury by accident, which is required in some provinces of the Dominion. 3. Compensation by insurance for (1) loss of life and (2) for sickness or injury.

SOME JULY CONTRASTS.

On the milk record sheets received at the Dairy Division, Ottawa, from members of cow testing associations there are found some good yields of milk and butter fat for July: for instance, in the Bertie, Ont., association one cow that freshened in May gave 1320 pounds of milk, testing 40 per cent of fat, equal to 55.8 pounds of fat. One herd of 17 cows at Glanworth, Ont., has an average of 926 pounds of milk, the herd including 5 two-year-olds. Some cows in this herd have given 4840 pounds of milk in 4 months. At Cassel, Ont., 183 cows average 858 pounds of milk, 3.6 test, 28.3 pounds of fat.

The records of many individual cows in these and other associations show a yield of barely 650 pounds of milk and 22 pounds of fat, or less than half of many good yields.

Dairy farmers, it is not difficult for you to make three very simple deductions from these remarkable contrasts. First, there are plenty of cows still being kept for milk production that are not worthy the name of Dairy Cows. Second, scores of dairy far-

WEDDED AT DESERONTO.

At St. Vincent de Paul church, Wednesday morning, Aug. 31st, the marriage of Miss Veronica Kathleen Slavin, daughter of Mr. and Mrs. P. Slavin, of Deseronto, and Thomas Harvey Price, of St. Thomas, was solemnized by Rev. Father Hartigan. The church was decorated with crysanthemums and palms, and Stewart Brennan chose for music the bridal march from Bohengrin.

The bride, who was given away by her father, wore a gown of white satin, veiled in white chiffon, and carried white roses. The bridesmaid, Miss Genevieve Price, sister of the groom, wore gold colored satin. Each wore the gifts of the groom, a necklace with pearl pendant and a necklace and cross of pearls. The groom was attended by Reginald V. Slavin, B. Sc., of Montreal, brother of the bride. The ushers were M. J. Connolly, of Boston, and Charles B. Price, of St. Thomas. A reception and dejeuner were held at the residence of the bride's parents and after receiving the congratulations of the friends assembled, Mr. and Mrs. Price left for an extended journey. They will reside in Winnipeg, Mr. Price being the western manager of the Stone Limited lithographers, Toronto.

The bride's mother in grey silk with old lace trimming, received the following guests: Mrs. G. Porter, of Welland, who looked very chic in blue rajah with black trimming and black hat; Miss Vandevort, in a cream and green silk gown, most becoming to her fair face and hair; Miss Knox was in blue embroidered silk, which perfectly suited her tall, willowy figure; the Misses Marrin, of Winnipeg, were very smart in white embroidery and blue rajah silk; Miss Dalton wore an exquisite blue lingerie gown; Miss Dryden's gown of green and white was becoming and stylish; Mrs. M. J. Connolly wore cream veiling with Persian trimming and large blue hat; Miss Georgie Stafford, of Belleville, wore a stylish and girlish gown of blue eolienne; Miss Myrtle Johnston wore broadened silk, and her dark hair and olive complexion were most attractive under a large tuscan hat with willow plumes; Miss Relux looked charming in cream voile with handsome trimmings.

WILL IT BE BLOOMERS?

Airships May Help Change Style of Woman's Dress.

So long as woman remained a creature of earth most any old style of dress skirt, from the balloon-shaped crinoline to the hobble, served her purpose. Now, all is changed. Her ladyship wishes to imitate the birds and whirl through the air, far above the envious crowd. But none of the old styles of skirt are quite the thing for this new sport, and so a change is imminent. As though to hasten the matter, the hobble skirt put in its appearance recently, and now shrewd forecasters believe they hear a sound in the air like bloomers.

Never before in the history of fashion has the longing for a change been more just, declares one woman. It was a man who said: "Let the galled jade wince!" And she is wincing with a vengeance! But wincing in shackles she has forged for herself, shackles that are more galling to her than any that the most tyrannical of men ever devised to hold her in bondage. Is it any wonder that men laugh at the appeals of their wives and sisters and daughters for a wider sphere of activity and freedom when they see us deliberately, wantonly, putting our feet in fetters that prevent us from walking, disguising the graceful curves of our bodies under gowns patterned after stove pipes and hiding under vast

FINE TONIC FOR WOMEN.

PE-RU-N FOR CATARRH

USES FOR THE SUNFLOWER.

It Yields Valuable Oil, Fodder and Beautiful Fabric.

Canadians do not regard the sunflower, which is said to be one of our own native plants, as being of much practical service, but in Russia it is utilized in many ways.

There the seeds are eaten in immense quantities, raw or roasted, as peanuts are in this country, and the oil obtained by pressing the seeds is an important article of food. The frequent religious feast days in Russia restrict the use of meat and lead to a large consumption of vegetable oil, and the manufacture of sunflower oil has consequently grown to considerable dimensions in that country. The best seeds yield an oil that compares favorably with olive oil for table purposes.

Even the upper classes in Russia, it is said, eat the seeds, the larger and finer ones being quite equal to most nuts in respect to palatability and wholesomeness. The stalks and dried leaves are highly prized for fuel, being in some parts of the Empire almost the only available substitute for wood. An acre of sunflowers will yield many cords of good fuel.

The oil appears to have more of the general properties of olive oil than has any other known vegetable oil. It takes about a bushel of seeds to make a gallon of oil, and 50 bushels of seeds can be grown on one acre of land. As the oil sells at about \$1 a gallon the profit is large.

At one time putrified sunflower oil was used quite extensively to adulterate pure olive oil. It is of a pale yellowish color and decidedly palatable. In a crude state it is used by painters to some extent, but it is inferior to linseed oil for use in paint.

In addition to the oil from the seeds the stalks when green and the oil cake make excellent fodder. The fiber of the stalks, which is fine, silky and strong, also has value. In China it is woven into beautiful fabrics, and it is believed that by the use of proper machinery it might be used most profitably in this country.

Like Master, Like Man.

In 1814 Baron Stieglitz in St. Petersburg, went to great expense to have the news of the treaty of peace conveyed to him by a private courier a few hours before it came to the knowledge of the Government. He therefore gain a few hundred thousand rubles. But his porter, to whom he communicated the news, tried his hand at a little speculation of his own. In an hour or two he bought up all the lamps he could find in St. Petersburg, so that in the evening, when the whole city was making ready for the illum-

SCOUTING IN AIR.

Army Sleuths Use Ingenious Battery of Kites to Lift Them Up.

The armies of France, England, Russia and Italy have been experimenting with kites as a means of making military observations, kites from which a basket similar to that of a balloon is suspended and in which the observer is lifted to a great height. The kite has this advantage over the balloon or aeroplane, that it can go up in the greatest storm; in fact, the higher the wind the easier it is to ascend by means of the kite. Furthermore, the stronger the wind the smaller is the lifting surface required.

The operator employs from eight to ten kites and a heavy anchored winch with two barrels each bearing about 1,000 yards of line. A pilot kite is sent up first at the end of the principal line. At intervals of about 50 yards, one, two, three, four or five kites are attached tandem wise to the line, the number varying according to the strength of the wind. This first battery is the sustaining power and it is sent up to a height of about 1,500 feet. A second battery, attached to the secondary line and threaded by rings upon the principal line, is then sent up. It supports a framework rolling upon the principal line, and from this framework is hung the basket in which the aeronaut sits.

The first battery holds the principal cable tight and the second battery drags the aeronaut in his basket up this aerial railway.

By this means a man may rise with safety several hundred yards above the earth and communicate with his friends below by telephone (using the primary cords) or by messages, sent up as boys send messages up a kite string or down by means of a small weight.

Cellular box kites with automatic rudders, made of a bamboo frame covered with fine oiled silk, is one form in use. They weigh very little, are collapsible into small space and can

friends below telephone using the primary cords) or by messages, sent up as boys send messages up a kite string or down by means of a small weight.

Cellular box kites with automatic rudders, made of a bamboo frame covered with fine oiled silk, is one form in use. They weigh very little, are collapsible and sent up so easily that the aeronaut may be up in the air within 20 minutes of reaching the scene. It is claimed for this system that it is safer and more convenient than ascensions by balloons or aeroplanes.

Greeting the New Moon In Fiji.

In Colo, the mountainous interior of Viti Levu, the largest island of the Fiji group, the natives have a very curious method of greeting the new moon. On seeing the thin crescent rising above the hills they salute it with a prolonged "Ah!" at the same time quickly rapping on their open mouths with their left hands, thus producing a rapid, vibratory sound. An old chief, when asked regarding the meaning and origin of this curious custom, said: "We always look and hunt for the moon in the sky, and when it comes we do as you see to show our pleasure at finding it again. We don't know the meaning of what we do. Our fathers always did so."

Comes That Way.

A young minister who was naturally of a shy disposition was rather embarrassed at his first marriage ceremony and unwittingly reversed the usual order of the service, thus making the bridegroom promise to live and obey his blushing bride. The error passed unnoticed at the time, but shortly afterward it dawned upon the father of the bride that a mistake had occurred, and he said to the minister: "I believe, Mr. —, you have made John promise to love and obey my daughter. Ah, well," he added after a pause and with a sly look at his better half, "I suppose it won't matter much. It generally comes to that anyway."—Pearson's.

The Spectroscope.

Originally the spectroscope was applied only to chemistry and in that limited field proved itself an invaluable aid in accurate analysis. By holding in a bunsen flame a platinum wire moistened by contact with the skin the presence of a few grains of salt swallowed a few minutes previously can be detected with the spectroscope. Indeed, so wonderfully refined is the work of the spectroscopic chemist that he can discover in a substance the presence of one three-millionth of a grain of metal.

Cause of His Sorrow.

"Why do ye look so sorry? Dennis?" asked one man of another. "I just hear-r-rd wan man call another a liar. And the man that was called a liar said the other man would have to apologize or there would be a fight."

"And why should that make you look sad?"

"The other man apologized."

A Printer's Blunder.

A Paris newspaper on one occasion made a blunder which excited no small amount of merriment at the expense of a man of real talent. The following paragraphs, intended to have been printed separately, were by some error so arranged that they were read consecutively: "Dr. X. has been appointed head physician to the Hospital de la Charite. Orders have been issued by the authorities for the immediate extension of the cemetery at Mont Parnasse. The works are being executed with the utmost dispatch."

**Children Cry
FOR FLETCHER'S
CASTORIA**

22 pounds of fat, or less than half of many good yields.

Dairy farmers, it is not difficult for you to make three very simple deductions from these remarkable contrasts. First, there are plenty of cows still being kept for milk production that are not worthy the name of Dairy Cows. Second, scores of dairy farmers are getting excellent records from selected herds. Third, records alone do not increase the yield of milk and butter, there must be intelligent selection of good cows based on the lessons that individual records teach.

Breechloaders.

Breechloading in artillery and small arms is popularly supposed to be an invention of the middle of the last century, but such is by no means the case. In a Dublin gunsmith's shop at Cork Hill is on view a breechloading rifle offered to the British War Office at the close of the eighteenth century and rejected, as it was considered to need too much ammunition!

An Easy Comparison.

Uncle Ethan was in a cautious frame of mind. "Which," somebody asked him, "do you think is the worst, a flood or a drought?"

Uncle Ethan scratched his head. "It always depends," he replied. "I should say that a flood was a great deal worse, providing, of course, that there was a flood."

Would Suit Him.

Subbub—Swamphurst is the most unhealthy place in the world. Since we have lived there my wife can scarcely speak above a whisper.

Henpeckke—Gee! Do you suppose I could get a house out there?

It Flies Away.

"Why do they call a theatrical backer an angel. He hasn't got wings."

"No, but his money has."

Baby's Terrible Eczema.

Hands Tied to Prevent Scratching

Five Doctors Failed to Relieve, but Zam-Buk Worked a Cure.

Mrs. Chas. Levere, of Prescott North Channel, Ont., tells how Zam-Buk cured her baby. She says:—"My baby's head and face was one complete mass of sores. The itching and irritation were fearful, and the little one's plight was so serious that at one time we feared her ears would be eaten off by the disease.

We had to keep her hands tied for to prevent her rubbing and scratching the sores. Doctor after doctor treated her in vain, until we had had five doctors. They all agreed it was a frightful case of eczema, but none of them did any permanent good.

"As a last resource we were advised to try Zam-Buk. The first box bid so much good that we felt sure we were at last working in the right direction.

We persevered with the treatment until we had used thirteen boxes, and at the end of that time I am glad to say Zam-Buk had effected a complete cure."

Mrs. Holmes, of 30 Guise Street, Hamilton, is quite as eloquent in her praise. She says:—"Zam-Buk cured my boy of boils and eruption when he was so bad that he had been unable to mix with other children. Zam-Buk is a wonderful preparation, and mothers throughout the land should always keep it handy."

For eczema, eruption rashes, tetter, itch, ringworm, and similar skin diseases, Zam-Buk is without equal.

It also cures cuts, burns, scalds, piles, abscesses, chronic sores, blood poisoning etc. All druggists and stores at 50 cents a box, or post free for price from Zam-Buk Co., Toronto. Refuse imitations.

devised to hold her in bondage. Is it any wonder that men laugh at the appeals of their wives and sisters and daughters for a wider sphere of activity and freedom when they see us deliberately, wantonly, putting our feet in fetters that prevent us from walking, disguising the graceful curves of our bodies under gowns patterned after stove pipes and hiding under vast extinguishers whatever beauty we may have in our faces?

No harem slave is more thoroughly in chains than the woman with the hobble skirt. No African water carrier balances upon her head a more unwieldy burden than the modern hat. No prisoner wearing chains but had more freedom in the use of his arms than the fashionable woman of to-day, whose kimono sleeves forbid her raising her hands above her head.

How can a woman wear a hobble skirt if she is interested in any of the modern sports and pursuits? She may wear a hobble skirt once or twice, just because it is new, but her common sense and her desire for freedom above all things, as well as her innate sense of beauty show her that the extremely tight skirt is not artistic.

When the short skirt was introduced some years ago, argues another woman, no one believed that it had really come to stay among the leisure classes. It was supposed to be only a necessity for the working woman, but it is no longer elegant even for the motor habitue to be seen shopping in the morning with a long skirt. Fashions must adapt themselves to the occupation, and they must be practical above all things. Whatever is impractical is conspicuous, and whatever is conspicuous is out of place, except in the evening, one might say, and then the conspicuous must be conspicuous for its beauty.

The new motor bonnet and the tight-fitting caps and turbans, especially those which can be worn without hat pins, are worn because they are practical in the first place and as they happen to be beautiful and most generally becoming I think the hat problem for the future is very nearly solved.

No one can think of a time when women will not wish to look beautiful. To want to be beautiful is not only a natural instinct of the race, but is a highly cultivated instinct as well, one to which all women truckle and to which artists and artisans have catered since just after the Garden of Eden episode.

But women have found out that unless they have some interest or some occupation they fall behind even in the race for pleasure, and these occupations, whether they be the sailing of an airship or the fingering of a typewriter, influence the future of the clothes question.

Just what the future dress may look like—one may be able to gather from a glimpse at some of the reform dresses and some of the costumes used in the latest sport, aviation. No woman will attempt to sail the air wearing a skirt. Modesty, comfort and self-protection necessitate a tighter fitting garment, in which she would not run the risks incurred in the full skirt, no matter how short.

Women have been getting closer and closer to the bloomer idea for some years. Bloomers were worn when bicycling first came in and were discarded chiefly because they were not necessary for safety. Every now and then the bloomer or pantaloen garment raises its bifurcated head, but it was forced upon the public long before the time was right for it. With the advent of the airship and the tremendous interest developed by women in aviation, however, some sort of garment which will combine the freedom of pantaloons and the modesty of a skirt will eventually become popular; and when it does no one will give its propriety a second thought, for the proper and practical garment is always the most inconspicuous and modest.

few hours before it came to the knowledge of the Government. He therefore gain a few hundred thousand rubles. But his porter, to whom he communicated the news, tried his hand at a little speculation of his own. In an hour or two he bought up all the lamps he could find in St. Petersburg, so that in the evening, when the whole city was making ready for the illumination, not a single lamp was to be found in any of the shops. The crafty porter now sold out his stock at a price which left him a nice little profit of 25,000 rubles.

The Volcano Circle.

Volcanoes would seem to be arranged with more or less symmetry in belts circling the great oceans. A ring of fire surrounds the Pacific. Starting at the South Shetland Islands, several hundred miles south of Cape Horn, a belt of volcanoes extends up the west coast of South America, Central America and North America; from Alaska it crosses the Pacific along the Aleutian islands to Kamchatka; thence it follows the east edge of the Pacific through the Kurile Islands, Japan, Formosa, the Philippines, the Moluccas, the Solomon Islands, the North Hebrides, New Zealand and finally ends in Mounts Terror and Erebus, on the Antarctic continent.

Have Animals a Prophetic Sense?

One of the puzzling questions now claiming the attention of scientists and which, so far, has defied all explanation, is the premonitory sense of animals in regard to earthquakes. Horses snort, throw up their heads, and gaze about in affright; cattle put their snouts to the ground and moan; sheep huddle together and bleat; birds flock to the trees and set up a prodigious clamor. The only plausible explanation yet offered is that animals possess a more delicate organism than that of man, which enables them to feel preliminary shocks which, to us, are imperceptible.

Wronged.

"I am sorry to hear, Mrs. Newcomb," said the minister, "that your husband gambles by buying grain and stocks on margins."

"He doesn't do anything of the kind. I've just been looking up the definition of the word gambling, and, according to the dictionary, one who gambles has a chance to win."

Rusty Screws.

Screws which have rusted in their bed of wood may be easily loosened by pouring a small quantity of paraffin around the top of the screw. When sufficient time has been allowed for the grease to sink in the screw may be pulled out.

How to Wash China Silk Ribbons.

THE SECRET OF HER POWER; Or, A TRUTH NEVER OLD.

CHAPTER I.—(Cont'd)

Blanford listens with admirable patience and affects to agree that the vision of the American crawling on his stomach over soaking sather in a thick fog for eight ours after a "stag of ten" is a vision of such unspeakably enviable bliss it must harrow the innermost soul of the dispossessed lord of the oil.

"And yet, do you know," he says in conclusion, "I am such a degenerate mortal, such an unworthy son of a gun," that I would actually sooner be sitting in these lovely, sunny, shady gardens, where one expects to see all Spenser's knights coming through the green toward one, than I would be the buyer of Achnalorrie, even in the third week of August."

"You say so, but you don't mean it," says the seller of Achnalorrie. "I never say what I don't mean," says Blanford. "And I never care about Scotland."

The other smokes dejectedly, and refuses to be comforted.

"Lady Waverley isn't here?" asks Blanford with a certain significance. Lady Waverley alone would have the power to making the torturing vision of the American among the heather fade into the background of her host's reflections.

CHAPTER II.

"Dolly is nasty about Achnalorrie," says Lord Usk, as they at last rise and approach the house.

"Not logical if she objects to moors on political principles. But ladies are seldom logical when they are as charming as Lady Usk."

"She never likes me to enjoy anything."

"I don't think you are quite just to her; you know I always tell you so." (Blanford remembers the sweetness with which Dorothy Usk invites Lady Waverley season after season.) "You are a great grumbler, George. I know grumbling is a Briton's privilege, provided for and secured to him in Magna Charta, but still too great abuse of the privilege spoils life."

"Nobody was ever so bothered as I am." Lord Usk regards himself invariably with compassion as an ill-used man. "You always take everything lightly, but then you aren't married, and I suppose you get some of your rents?"

"I have always been rather poor, but I don't mind it. So long as I needn't shut up or let the old place, and can keep my boat afloat, I don't much care about anything more."

ered grange on the edge of the home woods of Surrenden. If Boom finds things at all in order when he comes into possession it will be wholly due to John Lanyon.

In one of the pauses of their game the tennis players hear the babe and the omnibus returning. None of those whom they bring will be visible until luncheon at 2 o'clock.

"Have you anybody very nice, Lady Usk?" asks Blanford of his hostess.

She hesitates; there are some women that he would call nice but then they each have their man. "I hardly know," she answers, vaguely; "you don't like many people, if I remember—"

"All ladies, surely," says Blanford, with due gravity.

"I'm sure you don't like Grandma Sophy," says the saucy Babe, sitting cross-legged in front of him. He means the dowager Duchess of Derry, a very unpleasant person of strong principles, called by the profane "Sophia, by the grace of God," because she ruled Ireland in a vicereignty of short duration and long-enduring mischief. She and Blanford do not agree—a fact which the Babe has seen and noted with the all-seeing eyes of a petted boy who is too much in his mother's drawing-rooms.

"I plead guilty to having offended her grace, Sophia," said Blanford, "but I conclude that Lady Usk's guests are not all like that most admirable lady."

The Babe and his sisters laugh with much irreverent enjoyment; her grace is not more appreciated by her grandchildren than she was by Ireland.

"If I had known you were going to be so kind as to remember us, I would have invited some of your friends," says his hostess, without coming to the rescue of her august mother's name. "I am sorry; but there is nobody, I think, who will be very sympathetic to you. Besides, you know them all already."

"And is that fatal to sympathy? What a cruel suggestion, dear Lady Usk!"

"Sympathy is best new, like a glove. It fits best; you don't see any wrinkles in it for the first hour."

"What cynicism! Do you know that I am very fond of old gloves? But then, I never was a dandy—"

"Lord Blanford will like Mme. Sabaroff," says Dodo, a very evil-ill young lady of 13.

"Fair prophesies, why? And who is Mme. Sabaroff? A second O. K., a female Stepniak?"

asks Blanford, as he picks up his racquet to resume the game.

"She won't be here for three days," says Lady Usk.

"Then I fear I shall not see her."

"Oh, nonsense. You must stay all the month at least."

"You are too good, but I have so many engagements."

"Engagements are made to be broken. I am sure George will not let you go."

"We won't let you go," cries the Babe, dragging him off to the nets, "and I'll drive you this afternoon behind my ponies."

"I have gone through most perils that can confront a man, Babe, and I shall be equal even to that," says Blanford.

(To be continued.)

GREATEST OF DREADNOUGHTS

Britain Launches the Lion, Her Fifteenth Monster Warship.

The gigantic battleship-cruiser Lion was launched the other afternoon at Devonport, England. She is the greatest battleship afloat, exceeding all existing Dreadnoughts in size, speed and armament.

The Lion is officially described as an armored cruiser. She is superior to every battleship in the world, however, and is the naval marvel of the year.

The Lion is the first naval vessel to be armed with eight of the new 13.5 inch guns, which are arranged in four barbettes on the centre line of the ship. The two middle barbettes are raised so as to permit their guns to be fired over the other barbettes. This system will allow the whole of the main armament to be trained on either broadside.

The guns will fire projectiles of 1,250 pounds a distance of 5,000 yards. These projectiles will penetrate 22 inch armor. The Lion has a displacement of 26,000 tons. The length is 700 feet and the breadth 88 feet.

The horse-power of the Lion will be 70,000 and the speed will be 30 knots. She will be fitted with the Parsons turbines, will have forty-two water tube boilers situated amidships and will be protected with nine inch armor plating.

The Lion is the fifteenth British Dreadnought to be launched. She weighs 1,250 tons, and cost £2,175,000, or \$10,875,000.

THE SICILIAN MAFIA ACTIVE.

The Well-to-do Go About in Fear and Trembling.

Renewed activity on the part of the Sicilian Mafia is causing alarm, especially in the neighborhood of Alamo, Italy, where well-to-do men who have not complied with the demands of the banditti go about in fear of their lives.

Signor Vesco, a town councillor, had several thousand vines destroyed one night. The next evening he was shot down by masked men with revolvers in the main street.

Four of the principal wine merchants have had their warehouses destroyed by incendiaries. One of them was enticed out of his bedroom on to the balcony at midnight and was fired at by an armed band. He saved his life by throwing himself flat on the floor. A farmer was clubbed to death on the highway in

SELECTED RECIPES.

Tutti-Frutti Jam.—Use six pounds of plums,—one pint to the pound after the skins and stones are removed,—six pounds of sugar, one pound of seedless raisins, chopped meats from one pound of walnuts, the juice of four oranges, the grated rind of one. Boil slowly one hour, stirring constantly. This is delicious when served with ice-cream.

Curried Halibut.—Cook one teaspoonful of chopped onion and one tablespoonful of butter, adding one teaspoonful of curry-powder mixed with one tablespoonful of flour. When these bubble, stir in one-half pint of milk and one gill of cream. Add two cups of halibut that has been either boiled or baked, and then flaked, add an even teaspoonful of salt, and, when steaming hot, the juice of one lemon.

A New Filling for Layer Cake.—Melt one cup of sugar in one-quarter of a cup of water, letting the syrup simmer until it threads. Add one-half cup of walnut meats, one-half cup of raisins, one tablespoonful of coconut, and two figs which have been chopped together. Let the mixture get hot, remove it from the fire, and stir into it the white of an egg well beaten. Spread this filling between two cakes, baked in layer-cake tins. It makes a rich but delicious loaf. Any good recipe for a fine grained white layer cake may be used.

Comforts—As made by this recipe comforts are a species of doughnut, but more delicate and digestible and much more easily and quickly made. Mix thoroughly two eggs well beaten; one cup of sugar, one large teaspoonful of melted butter, one cup of sweet milk, three and one-half cups of flour, sifted with two teaspoonfuls of baking-powder, a little salt, and some grated nutmeg. Drop the batter from a teaspoon into boiling fat. With a little practise perfectly round balls can be produced. When they are cold roll them in powdered sugar.

Bachelor Maid's Salad.—Use equal parts of chopped walnut meats and celery, one banana sliced, and cut in small pieces; one orange cut in small pieces, after removing the peel. Mix the nuts, celery, banana and orange bits, omitting as much if the orange-juice as possible. Mix with the mayonnaise dressing and serve on lettuce leaves with cheese crackers. The ingredients for the dressing are the yolk of one egg, pepper, salt, vinegar—or lemon-juice—and olive-oil. Beat the egg yolk thoroughly with an egg-beater. Add the oil in small quantities, not more than one teaspoonful at a time, and beat into the egg each time before adding more. Add salt and pepper to taste, and about one teaspoonful of vinegar or two of lemon-juice, being careful not to get in too much. Beat thoroughly. Use perfectly fresh eggs and have all ingredients cold, and the dressing will be a success. Take plenty of time to make it.

SMOKY CIGARS.

Have you ever smoked part of a cigar, laid it down to die, and hours after lighted it again. If so you probably found that the first few whiffs tasted like burned rags, partly because you did not blow the smoke back through the cigar, but let it go out with the smoke inside.

Have you ever smoked cigars that from the outstart tasted "burnt," if so it is mostly because the tobacco

House their h

as I am." Lord Usk regards himself invariably with compassion as an ill-used man. "You always take everything lightly, but then you aren't married, and I suppose you get some of your rents?"

"I have always been rather poor, but I don't mind it. So long as I needn't shut up or let the old place, and can keep my boat afloat, I don't much care about anything more. I've enough for myself."

"Ah, that's just it; but when one has no end of family expenses and four great houses to keep up, and the counties looking to one for everything, and the farmers, poor devils, ruined themselves, it's another matter. I assure you if I hadn't made that sacrifice of Ach-nalorrie—"

Lady Usk, coming out of the garden-room down the steps of one of the low windows, spares Blanford the continuation of the lament. She looks pretty; mindful of her years, she holds a rose-lined sun umbrella over her head; the lace and muslin of her breakfast gown sweep the lawn softly; she has her two daughters with her, the Ladies Alexandra and Hermione, known as Dodo and Lillie. She welcomes Blanford with mixed feelings, though with unmixing suavity. She is glad to see him, because he amuses Usk, and is a person of wit and distinction whom everybody tries to draw to their houses; but, then, he upsets all her nicely-balanced combinations; there is nobody for him; he will be the "one out" when all her people are so nicely arranged and paired; and, as she is aware that he is not a person to be reconciled to such isolation, he will dispossess somebody else, and cause, probably, those very dissensions and complications from which it is always her effort to keep all her house parties free. However, there he is, and he is accustomed to be welcomed and much of wherever he goes. She can do no less.

Blanford makes himself charming in return, and turns pretty compliments to her and the children, which he can do honestly, for he has always liked Dorothy Usk, and the two young girls are as agreeable objects of contemplation as youth, good looks, fair skins, pretty frocks, open air, much exercise, and an indescribable air of "breeding" can make them. An English patrician child is one of the prettiest and most wholesome things on the face of the earth.

He goes to play lawn-tennis with them and their younger brother, Cecil, called the Babe; and Lady Usk, under her rose-lined umbrella, sits as umpire, while her lord saunters off disconsolately to an interview with his steward. In these times these interviews are of an unbroken melancholy and always result in producing the conviction in his mind that Great Britain cannot possibly last out another year. Without the nobility and gentry that will she be? And they will all go to the lands they've bought in America, if they're in luck, and if they aren't will have to turn shoeblacks.

"But the new electorate won't have its shoes blacked; won't even have any shoes to black," suggests Mr. Canyon, the land steward, who began his life as an oppidan at Eton and captain of an eight, but has been glad to take refuge from the storm in the estates of his old Eton comrade, a trust which he discharges with as much zeal as discretion, dwelling contentedly in a rose-cov-

erly wrinkles it it for - the first hour."

"What cynicism! Do you know that I am very fond of old gloves? But then, I never was a dandy—"

"Lord Blanford will like Mme. Sabaroff," says Dodo, a very evil-looking young lady of 13.

"Fair prophetic, why? And who is Mme. Sabaroff? A second O. K., a female Stepniak?"

"What are those?" says Dodo. "She is very handsome, and a princess in her own right."

"She gave me two Ukraine ponies and a real drochsky," says the Babe.

"And Boom a Circassian mare, all white, and each of us a set of Siberian torques," says Lillie.

"Her virtues must be as many as her charms," says Blanford.

"She is a lovely creature," adds Lady Usk, "but I don't think she is your style at all; you like fast women who make you laugh."

"My tastes are catholic where your adorable sex is in question," says Blanford. "I am not sure that I do like fast women; they are painful to one's vanity; they flirt with everybody."

Lady Usk smiles. "The season before last I recollect—"

"Dearest lady, don't revert to prehistoric times. Nothing is so disagreeable as to think this year of what we liked last year."

"It was Lady Leamington last year," says the terrible Babe.

Blanford topples him over on the grass and hoists him up on his own shoulders. "You precocious rascal! What will you be when you are 20?"

"Babe's future is a thing of horror to contemplate," says his mother, smiling placidly.

"Who is Mme. Sabaroff?" asks Blanford again, with a vague curiosity.

"A princess in her own right; a god-daughter of the emperor's," said Dodo. "She is so handsome, and her jewels—you never saw such jewels."

"Her father was chancellor," adds her mother, "and her husband held some very high place at court, I forget what."

"Held? Is he disgraced then or dead?"

"Oh, dead; that is what is so nice for her," says Dodo.

"Heartless Dodo!" says Blanford. "Then if I marry you four years hence I must kill myself to become endeared to you?"

"I should pity you indeed if you were to marry Dodo," says Dodo's mother. "She has not a grain of any human feeling except for her dog."

Dodo laughs. She likes to be called heartless; she thinks it is chic and grown up; she will weep over a lame puppy, a beaten horse, a dead bird; but she is "hard as nails to humans," as her brother Boom phrases it.

"Somebody will reign some day where the Skye reigns now over Dodo's soul. Happy somebody!" says Blanford. "I shall be too old to be that somebody. Besides Dodo will demand from fate an Adonis and a Croesus in one?"

Dodo smiles, showing her pretty white teeth; she likes the banter and the flirtation with some of her father's friends. She feels quite old; in four years' time her mother will present her, and she means to marry directly after that.

"When does this Russian goddess who drops ponies and torques out of the clouds arrive here?"

was shot down by masked men with revolvers in the main street.

Four of the principal vice merchants have had their warehouses destroyed by incendiaries. One of them was enticed out of his bedroom on to the balcony at midnight and was fired at by an armed band. He saved his life by throwing himself flat on the floor. A farmer was clubbed to death on the highway in broad daylight and his assassins got away with his horse and cart.

The brigands who are committing these crimes appear to be working in three bands under the leadership of Grisalfi, Galiofo and Ballo. The police attribute their immunity to the many safe retreats which a mountainous country affords, as well as to the fact that the inhabitants of the region rather obstruct than aid the police, through fear of the brigands.

Meantime strife has broken out among the brigands over the distribution of the booty. Three of them were treacherously stabbed to the heart while overcome with wine at a supper of the band near Corleone. One of the party thus murdered was a lad of 14.

SALADS.

Dandelion Salad.—The dandelion besides being recommended for its medicinal qualities, makes an appetizing spring salad. It can be purchased in season at most grocery stores. First remove all dead leaves and root and wash thoroughly. Take small handful at a time, shake free from water and cut up finely into mixing bowl. When all is used up have enough to make about two quarts when tossed lightly into bowl—sprinkle over one teaspoonful salt, one of sugar, and a pinch of mustard. Have ready as much fat bacon cut into bits as will fill a small teacup, fry to a light brown; remove the bacon and into the hot grease mince a small onion, if onion flavor is not objectionable; try lightly; then add to hot grease one-half cup mild vinegar, pour over the dandelions, and mix well. Garnish with hard boiled eggs, sliced, and serve at once. Dandelions can also be cooked and prepared like spinach.

Ideal Salad.—Take one-half package of gelatin, one-half cupful of cold water, one-half cupful of vinegar, juice of one lemon, one pint of boiling water, one-half cupful of sugar, one teaspoonful of salt, two cupfuls of celery cut in small dice, one cupful of finely shredded cabbage, one-fourth of a can of sweet red peppers (pimentoes), cut fine. First soak gelatin in cold water two minutes, adding boiling water, vinegar, lemon juice, sugar and salt. Strain, then let it cool until it starts to set, before adding the other ingredients. Turn into molds and have cold for serving. This salad is a delightful accompaniment to any meat course. It also is especially practical, for it may be kept a week before serving. This salad is served with mayonnaise dressing, either on a lettuce leaf, or in orange peel, or in red or green pepper cases. This will serve twenty people.

Pineapple Salad.—Lay a slice of canned pineapple on lettuce leaf. Moisten blue ribbon cheese with cream and spread over pineapple. Now cut the pineapple in small pieces, keeping the round shape of the slice. Sprinkle chopped walnut meats thickly over the cheese, then add the mayonnaise dressing.

Have you ever smoked part of a cigar, laid it down to die, and hours after lighted it again. If so you probably found that the first few whiffs tasted like burned rags, partly because you did not blow the smoke back through the cigar, but let it go out with the smoke inside.

Have you ever smoked cigars that from the outset tasted "burnt," if so it is mostly because the tobacco got too hot in course of fermentation.

Raw tobacco has to be fermented and aged in order to work out the natural gum, and yet it must possess the gum to ferment properly:

It should never go beyond 130 degrees. When it reaches this point the pile should be taken down, all the outside brought to the inside, and the inside leaves go to the outside. In another ten to fifteen days it will go back to 130 degrees, when the same process is repeated, after which it is assorted, put in bales, and subsequently goes through another sweat, the bales being turned over every few days for several weeks, until it has resumed normal temperature.

About two months after, the tobacco in the bales will warm up to what is called "fever" heat, after which the tobacco only needs age, as the gum should have disappeared.

The majority of manufacturers let the tobacco go through in the condition they bought it, expecting that every bale is like the sample from which they made the original purchase.

The house of "J. Bruce Payne, Limited," make it a rule to re-handle all of their tobacco, aging it from three to six months in barrels, Cuban style, after it has been stripped and booked, which ensures the uniformity in taste and aroma for which their "Pharaoh" cigar is noted.

Moreover, they always carry a two years' stock on hand and work only the best "vegas" that have been carefully selected, thus ensuring old, mellow, sweet-tasting cigars, free from that burned or smoked taste.

They have recently introduced a new brand, "Lords of Canada," that goes over the counter at ten cents straight. It costs the dealer something more than similar looking cigars from other factories, but there is a reason, which you can find out by smoking one.

WHAT THEY SAY.

WHEN BABY'S LIFE IS MOST IN DANGER

Summer is the season when the mother finds it most difficult to keep her little ones well. The complaints that afflict the babies during the hot summer months come on so quickly and so unexpectedly that often it is too late before the mother realizes that her baby is anything but well. In summer the mother should make a special effort to keep baby's bowels regular and his little stomach sweet and pure, for this is the secret of successful warding off those dangerous summer complaints. The mother will find a great friend in Baby's Own Tablets during the hot weather. These Tablets regulate the bowels, sweeten the stomach and thus ward off or cure cholera infantum, diarrhoea, colic, vomiting, etc. Mrs. Wm. Sinclair, Bonaventure River, Que., writes: "I can highly recommend Baby's Own Tablets, as they have done my baby much good." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SUMMER DRINKS.

Grape Drink.—A delicious drink can be made from left over grape jelly. Melt the jelly with boiling water, to every glass of jelly add the juice of one lemon, serve in glass with shaved ice.

Refreshing Drink.—For five gallons of root beer one 20 cent bottle of root beer extract, four pounds of granulated sugar, one cake of compressed yeast, and five gallons of pure water, lukewarm. First dissolve yeast in one teacupful of warm water, then dissolve sugar in the five gallons of water. Add the extract and yeast last. Pour the mixture in strong bottles that have patent stoppers, then cork tightly and set in a warm place for eight hours. It is then ready to use.

HAVE YOU REMEMBERED IT?

When packing for the country cottage, don't forget your box of Zam-Buk! Blisters, sunburn, scratches, insect stings, etc., if not immediately attended to, are likely to spoil your pleasure. Zam-Buk ensures you against trouble from these.

Zam-Buk is antiseptic; kills all poison in wounds, whether from barbed wire fence, or insect sting. Soothes aching feet and blistered hands; heals baby's chafed places; cools those sunburn patches, and prevents freckles. Purely herbal in its composition, Zam-Buk is always superior to the ordinary ointments containing animal oils and fats, and mineral coloring matter. All druggists and stores sell Zam-Buk, but avoid substitutes.

"Maude is a woman of a very open nature." "I notice that it is very hard to make her shut up."

These two desirable qualifications, pleasant to the taste and at the same time effectual, are to be found in Mother Graves' Worm Expeller. Children like it.

In this world we pay for everything, the things we think we get for nothing the things we pay the most for.

Housekeepers who wish to keep

USEFUL HINTS.

Pails and tubs may be kept from shrinking by painting them with glycerine.

If a teaspoonful of sugar is put into the teapot the tea will infuse in one-half the time.

To remove paint from linens rub with turpentine then clean with French chalk dampened with alcohol.

When starching Holland pinafores put a little tea into the starch. It will help them to keep their color.

Always place citron in a moderately hot oven for a few moments before cutting it up for cakes or pudding.

To heat dishes quickly, don't put them into a hot oven, but let them lie for a minute or two in hot water.

By soaking oatmeal over night it can be cooked in fifteen minutes and have the flavor of cooking many hours.

If boiled water is used for drinking purposes, care should be taken that the water boils for 15 minutes before it is poured off.

Tumblers that have contained milk should be washed in cold water, as washing in hot tends to cloud the glass permanently.

The gasoline that is left after a garment is washed can be allowed to settle, and the clear gasoline at the top used again.

To prevent patent leather shoes from cracking warm them before putting them on. Warmth renders the leather soft and pliable.

When bedsteads creak with every movement of the sleeper, the slats should be removed and the end of each wrapped in newspaper.

When washing tan colored clothes or stockings, or the khaki colored suits, put a little brown dye in the rinsing water and in the starch.

Articles of old furniture are sometimes made to appear like new by washing them with lime water and then applying a coat of oil.

GREAT SUMMER TRAIN.

Ocean Limited Has Done Much to Make the I. C. R. Route Popular.

"You may journey where you will," said a traveller of many years experience recently, "but you will find no finer train anywhere than the Intercolonial Railway's Ocean Limited." This is a terse statement widely endorsed by the travelling public, for to use a mild slang phrase, the Ocean Limited has "made good." Tried as an experiment about five years ago, its popularity has so increased and its business so developed, that it is now an actual necessity. When the train was first placed on the route between Montreal and Halifax, the equipment was entirely new and up-to-date. Great care has been taken to keep it so, and certainly with regard to this particular train, the Intercolonial is in line with the best ideas of Railway progression. The dining and sleeping car service is excellent. Most enjoyable meals are served table d'hôte at reasonable prices, viz.: one dollar for dinner, and seventy-five cents for other meals. Intercolonial Railway trains use the Bonaventure Union Depot at Montreal, and at that station the Ocean Limited connects with the Grand Trunk expresses to and from Toronto, Detroit, Chicago, and other Western cities. The

If You Want to be Sure of Quality
Buy

NA-DRU-CO

Medicinal and Toilet Preparations

You certainly take no chances when you buy any toilet article or medicinal preparation which bears the name NA-DRU-CO and this trade mark.

As soon as you see "NA-DRU-CO" you can be absolutely certain that the article is the very best.

The National Drug and Chemical Company of Canada, Limited, has spent thousands of dollars in perfecting this line of over 125 NA-DRU-CO preparations.

The formulae are the best known to medical science.

The purity and strength of the ingredients are assured by rigid tests. The compounding is done by expert chemists, who are thoroughly qualified for a work so vital to your health.

Knowing that everything has been done to make them right, we guarantee, positively and unreservedly, each and every NA-DRU-CO preparation. If you find any one unsatisfactory we want you to return it to the druggist from whom you bought it and he will refund your money.

Ask your physician or druggist all about the NA-DRU-CO line. They are men of standing in your community, worthy of your confidence, and in position to tell you, for we will furnish to any member of either profession, on request, a full list of the ingredients in any NA-DRU-CO preparation.

NA-DRU-CO Dyspepsia Tablets
Cure sour stomach—heartburn—flatulence—indigestion—chronic dyspepsia.

NA-DRU-CO Headache Wafers
Stop a headache in 30 minutes. Contain no harmful drug.

NA-DRU-CO Talcum Powder
3 kinds—Violet—Rose—Flesh Color. Gems of refreshment and refinement.

NA-DRU-CO Laxatives
Act without any discomfort. Increased doses not needed.

NA-DRU-CO Baby Tablets
Relieve Baby's ills. Especially valuable during teething.

NA-DRU-CO Tooth Paste
Cleanses throughout—prevents decay—makes the teeth beautifully white.

MAPLEINE

A flavoring used the same as lemon or vanilla. By dissolving granulated sugar in water and adding Mapleine, a delicious syrup is made and a syrup better than maple. Map cine is sold by grocers. If not send 50c for 2 oz. bottle and recipe book. Crescent Mfg. Co., Seattle, Wa.

Sufferers from indigestion should take the white of an egg beaten to a stiff froth and stirred into a wine-glassful of cold water after each meal.

To remove hot water marks on japanned trays, use sweet oil. Rub it in well till all marks disappear, then polish the tray with dry flour and soft cloths.

To eat cucumbers without causing bad effects, eat plenty of raw onion with them. The onion contains an oil which neutralizes the poison in the cucumber.

Wallpaper that has been soiled by a smoky fire or lamp may be cleansed by using a hard, dry sponge; the stiffer and harder the better. Rub the wall briskly with it.

Maud—How stout Miss Waite is getting. Belle—Isn't she? She says she can't even skip in reading a dull novel.

Your Druggist Will Tell You
Murnine Eye Remedy Relieves Sore Eyes, Strengthens Weak Eyes, Doesn't Smart, Soothes Eye Pain, and Sells for 50c. Try Murnine in Your Eyes and in Baby's Eyes for Scaly Eyelids and Granulation.

**NEURALGIA, HEADACHE,
TOOTHACHE & ALL PAINS**

Radway's Ready Relief cures the worst pains in from one to twenty minutes. For Headache (whether sick or nervous), Toothache, Neuralgia, Rheumatism, Lumbago, pains and weakness in the back, spine or kidneys, around the liver, pleurisy, swelling of the joints, and pains of all kinds, Radway's Ready Relief will in a few days effect a permanent cure.

WINNIPEG WHEAT MARKET

Now Occupies the Premier Position on the Continent.

A despatch from Winnipeg says: Winnipeg has at last outdistanced Minneapolis in the actual amount of grain marketed, and may now lay claim to being the biggest actual wheat market on the North American continent. Comparative figures, made public on Thursday by the Winnipeg Grain Exchange, show that for the year ending August 31, 1910, Winnipeg wheat receipts were 88,269,330 bushels, while Minneapolis, for the calendar year 1909, could show a total of

only 81,111,410. Buffalo, Duluth, Kansas City and Montreal follow in order. Winnipeg is second to Chicago in the total of oats handled during the past year. The figures for Winnipeg are taken from the Dominion Grain Inspector's official report, and do not include shipments made direct from southern Manitoba and Alberta into the United States, nor shipments made west from Calgary, neither do they include local shipments nor any wheat inspected at Calgary.

GOOD THRASHING RETURNS

Western Grain Is Turning Out Better Than Expected.

A despatch from Winnipeg says: The C. P. R. weekly crop report shows that 75 per cent. of the crop on branch lines north of the main line has been cut and that, in the main, harvest weather is fairly favorable. In the northern parts of all the three western provinces the thrashed crops show a larger yield than estimated, and the grade is better than expected.

In southern Manitoba thrashing is practically finished. Recent snows in Alberta, in the Edmonton district, and along branches in the

Crow's Nest Pass district have not permanently injured the standing crops. Straw was flattened, but with favorable weather, is rapidly recovering. With the exception of half a dozen scattered districts, where heavy rains have retarded harvesting and thrashing, the report is decidedly satisfactory.

A despatch from Arcola, Sask., says: A heavy rain and hail storm on Monday afternoon ruined all the standing crops left uncut, but as 90 per cent. of wheat and 80 per cent. of oats are in stock the damage is not very great.

HIGHER TYPE OF IMMIGRANT

British Settlers in West This Year the Best Yet.

A despatch from Winnipeg says: During the period from March 1 to August 1 of this year, when 41,452 men, women and children from England, Ireland and Scotland came into Western Canada by way of Winnipeg; 20,000 more than passed through this city during the same time last year. During the same period this year, 15,916 immigrants from Europe passed through the Winnipeg immigration office. "I can say of the Britishers who came this year," said the Dominion Inspector, J. Bruce Walker, "that they have been of a higher type than any that we ever handled before." "In what respect?" was asked. "Physically, mentally, morally and financially."

SECOND LARGEST CITY.

New York Has Now a Population of 4,766,883.

A despatch from Washington says: Greater New York has a population of 4,766,883 under the thirteen decennial census, according to figures issued on Thursday night by Director of the Census Durand. This makes New York the second largest city in the world, and as large as any two foreign cities except London. Since

FELL DOWN STAIRS.

Kingston Woman Killed on a Visit to Daughter.

A despatch from London, Ont., says: Mrs. Jessie Smith, of Kingston, was almost instantly killed here on Friday night by falling down stairs at the home of her daughter, the wife of Rev. James Rollins, where she has been visiting. With her daughter and son-in-law, she returned about 11 o'clock from King Street Presbyterian Church, where Mr. Rollins had been tendered a reception by the congregation on returning from his vacation. In the fall Mrs. Smith's neck was fractured and she died in a few minutes.

A DESPERADO SHOT.

Mounted Police Put Bullet Into Escaping Indian.

A despatch from Prince Albert, Sask., says: Peter Blackhand, an Indian desperado, who escaped twice from the custody of the Mounted Police after being sentenced to a year in jail for horse-stealing, had to be shot by pursuing officers during his second attempt at escape before he would surrender. He was within a few yards of his rifle when "winged," his arm being broken. He is a noted rifle shot, and had boasted that if he got free he would never

CRIPPLED BY RHEUMATISM

Suffered Tortures Until "Fruit-a-tives" Took Away The Pain.

"Fruit-a-tives," the famous fruit medicine, is the greatest and most scientific remedy ever discovered for Rheumatism.

"Fruit-a-tives," by its marvellous action on the bowels, kidneys and skin, prevents the accumulation of Uric Acid, which causes Rheumatism and thereby keeps the blood pure and rich.

Mrs. Walter Hooper, of Hillview, Ont., says: "I suffered from severe Rheumatism, lost the use of my right arm and could not do my work. Nothing helped me until I took 'Fruit-a-tives' and this medicine cured me."

If you are subject to Rheumatism, don't wait until a severe attack comes on before trying "Fruit-a-tives." Take these fruit tablets now and thus prevent the attacks.

"Fruit-a-tives" is sold by all dealers at 50c a box, 6 for \$2.50 or trial box, 25c, or may be obtained from Fruit-a-tives, Limited, Ottawa.

Beans—\$2 to \$2.10 per bushel for primes; and \$2.15 for hand-picked.

HEALTH

LARYNGITIS.

Laryngitis is an inflammation of the mucous membrane which lines the larynx; a disorder which attacks all ages and conditions of people, but is likely to be more serious in the case of children than in that of adults.

In grown-up people an attack of acute laryngitis is rarely fatal, although its symptoms, which include breathlessness, and sometimes complete loss of voice, often give rise to much alarm. In children the passages are narrower and they are less able to throw off the secretions, with the result that an attack of laryngitis may become croupous in character and consequently dangerous to life.

When a child develops a tendency to attacks of laryngitis a thorough examination of the air-passages should be made by a specialist in throat disorders, and in most cases some contraction or chronic inflammation will be found, which calls for correction. The importance of this will be recognized when it is understood by parents that one attack predisposes to others, until the unfortunate child becomes the victim of so-called croup with the least exposure or indiscretion, and all the time the trouble may be caused by the mouth-breathing, which keeps the throat and all the air-passages in a state of irritation and delicacy.

An attack of acute laryngitis in one predisposed to it may be brought on in various ways. Sitting with wet feet will often do the mischief. So will inhaling dust or gas, or getting too cold, or going too long without food, or, in short, doing anything or permitting anything that serves to depress the general vitality; for no organ of the body resents any insult offered to the general system more thoroughly than does an irritable throat.

In the case of adults the trouble is often caused by overuse of the voice. This form is seen in the case of what is known as "clergyman's sore throat," but it is not necessary to be a clergyman to have it, and the average college student the day after a boat-race may be trusted to have acquired a fair case of laryngitis. Sometimes the voice is only hoarse or husky, but in severe cases it may be completely gone, owing to the local thickening and congestion of the parts.

The treatment of this disease is both general and local. Local applications are first for the thorough cleansing of the affected parts. After that has been accomplished, sedative and astringent remedies are applied. This treatment should always be given by the physician.—Youth's Companion.

WHAT TO DO FOR BURNS.

Many lives are lost from injuries resulting from burns, which might be saved if the person who finds his clothing on fire would remember several simple facts. The head, chest and abdomen are the parts where burns so often prove fatal, and should be protected from this form of injury.

The first impulse many persons have on finding they are on fire is

A despatch from Washington says: Greater New York has a population of 4,766,883 under the thirteen decennial census, according to figures issued on Thursday night by Director of the Census Durand. This makes New York the second largest city in the world, and as large as any two foreign cities except London. Since 1900 the population of the metropolis has increased by 1,329,681, or 38.7 per cent., as compared with 3,437,202 under the last census.

A DOUBLE DROWNING.

Mother and Daughter Lost Their Lives in the Otonabee.

A despatch from Peterborough says: About 11 o'clock on Friday a double drowning happened in the River Otonabee, at a point called Dangerfield, the victims being Mrs. Wm. E. Lang and her seven-year-old daughter. They were in a gasoline launch with two or three other members of the family, including the father. The launch was running close alongside the excursion steamer Otonabee, when something went wrong with the steering gear, the launch colliding with the steamer and turning turtle. All were rescued except the mother and daughter.

CUSTOM RECEIPTS UP.

An Increase of Nearly Six Millions in the Last Five Months.

A despatch from Ottawa says: The growth of Canada's revenue taken at the customs houses continues. For the five months of the fiscal year ending on Wednesday customs revenue had totalled \$29,091,605, a betterment of \$5,747,994 over the same period last year. During August alone collections totalled \$6,479,795, a betterment of \$1,139,338.

PROVINCES ALL IN LINE.

Every Province is Exhibiting at the C. N. E. This Year.

Every province in the Dominion is exhibiting at this year's Canadian National Exhibition and the result is the greatest display of the national resources of Canada ever placed on exhibition. It is a great chance for Canadians as well as visitors from other countries to see just what each corner of the great Dominion depends on for future greatness. And the net result cannot fail to be a pleasant surprise to Canadians as well as outsiders.

HARVEST WEATHER IS GOOD

75 Per Cent. of Crop North of the C.P.R. in the West is Cut.

A despatch from Winnipeg says: The C. P. R. weekly crop report shows that 75 per cent. of the crop on branch lines north of the main line has been cut, and that, in the main, harvest weather is fairly favorable. In the northern parts of all the three Western Provinces the threshed crops show a larger yield than estimated, and the grade is better than expected.

In Southern Manitoba threshing

Mounted Police after being sentenced to a year in jail for horse-stealing, had to be shot by pursuing officers during his second attempt at escape before he would surrender. He was within a few yards of his rifle when "winged," his arm being broken. He is a noted rifle shot, and had boasted that if he got free he would never be caught alive. He is now in Victoria Hospital here, closely guarded night and day.

SHOT THROUGH THE HEART.

Montreal Man Put Gun in Boat With Muzzle Towards Him.

A despatch from Montreal says: The shooting season opened on Thursday with a fatal accident, a blacksmith in the Point St. Charles Grand Trunk shops named John Bennett being shot through the heart while on the river near Nun's Island. Bennett put the gun in the bottom of the boat with the muzzle pointing towards him. The inevitable happened.

SHOT BY HIS BROTHER.

First Accident of the Duck-Shooting Season.

A despatch from Winnipeg says: The duck shooting season opened in Manitoba on Thursday with the inevitable accident, the season being but a few hours old when a report came from Balduz that Allan Johnston, son of a farmer near that town, had been killed by the accidental discharge of a shotgun in the hands of his younger brother. The charge entered his abdomen, and although a doctor was on the scene within a few minutes the young man died within an hour.

PUSHING SETTLEMENT.

Government and Railways to Unite Their Efforts.

A despatch from Montreal says: It is said here in railway circles that the C. P. R., G. T. P. and C. N. R. are about to unite with the Dominion Government in an aggressive advertising campaign to offset the "Back to the United States exodus" yarns. Railways and Government will co-operate in opening up new lands, pushing settlement work, and in brief, "carrying the war into Africa."

The lockout of masons at Winnipeg has been settled by arbitration and the men have returned to work.

21-2c; separator prints, 17c to 22c; dairy prints (choice), 20c to 21c; do., tubs, 19c to 20c; inferior tubs, 18c to 19c.

Eggs—20c per dozen in case lots. Cheese—11-12c per lb. for large cheese and at 11-3-4c per lb. for twins.

Beans—\$2 to \$2.10 per bushel for primes and \$2.15 for hand-picked.

Honey—Strained honey is quoted at 9c to 10c per lb. in 60-pound tins; 5 to 10 pound tins at 9-1-2c to 10-1-2c; No. 1 comb honey at \$1.75 to \$2 per dozen; No. 2 at \$1.50 per dozen.

Potatoes—70c to 90c per bag.

PROVISIONS.

Wholesale quotations:—

Rolls—Smoked, 15c to 15-1-2c; medium and light hams, 19c to 19-1-2c; heavy, 17-1-2c to 18c; bacon, 19c to 20c.

Pork—Short cut, \$30 to \$30.50 per barrel; mess, \$27.50 to \$28.

Lard—Tierces, 14-1-4c; tubs, 14-1-2c; pails, 14-3-4c; stocks steady.

Smoked and Dry Salted Meats—Long clear bacon, tons and cases, 15c to 15-1-2c; backs (plain), 21c to 21-1-2c; backs (pea-meal), 21-1-2c to 22c.

Green meats out of pickle, 1c less than smoked.

MONTREAL MARKETS.

Montreal, Sept. 6.—Oats—No. 2 Canadian Western, 41-3-4 to 42c; No. 3, 40-3-8 to 40-1-2. Barley—No. 1, 52 to 54c; No. 2, 50c. Flour—Manitoba Spring wheat patents, firsts, \$6.30; do., seconds, \$5.80; Winter wheat patents, \$5.50; Manitoba strong bakers', \$5.60; straight rollers, \$5.25; do., in bags, \$2.50 to \$2.60; extras, \$2.15 to \$2.25. Feed—Ontario bran, \$20.50 to \$21; Ontario middlings, \$22; Manitoba bran, \$20; Manitoba shorts, \$22; pure grain mouille, \$33 to \$34; mixed mouille, \$26 to \$29. Cheese—Western grades, 11 to 11-1-8c and eastern, 10-5-8 to 10-3-4c. Butter—Choicest creamery, 23-1-2 to 23-3-4c. Eggs—Selected stock, 22c; No. 1 stock, 19c; straight receipts, 18c, and No. 2 stock at 12 to 13c per dozen.

UNITED STATES MARKETS.

Buffalo, Sept. 6.—Wheat—Spring wheat, No. 1, carloads store, \$1.18-3-4 to \$1.19-3-4; Winter, No. 2 white, \$1.00.—Corn—No. 3 yellow, 66c; No. 4 yellow, 65c; No. 3 corn, 64-1-2c; No. 4 corn, 62-1-2c, all on track, through billed. Oats—No. 4 white, 35c. Barley—Malting, 73 to 77c. Rye—No. 2 on track, 78c. Minneapolis, Sept. 6.—Wheat—No. 1 Northern, September, \$1.10-7-8; December, \$1.13-3-4.

LIVE STOCK MARKETS.

Montreal, Sept. 6.—Calves, \$5 to \$15; live hogs, \$9.25 to \$9.50 per 100 lbs; sheep, 3-3-4 to 4c a lb; lambs, 5-1-2 to 6c a lb; steers choice, 6c to 6-1-4c; good, 5-3-4c to 6c; middle, 5-1-4c to 5-1-2c; fair, 4-3-4c to 5c; common, 4-1-4c to 4-1-2c. Dressed hogs active, \$13 to \$13.25 per 100 lbs.

Toronto, Sept. 6.—Several lots of exporters sold at \$6.25 to \$6.60. Butchers were very firm, selected steers selling up to \$6.10, ordinary good loads at \$5.50 to \$5.90, medium at \$4.90 to \$5.40, cows and bulls were steady and ranged from \$3.50 to \$5. Notwithstanding the heavy run, sheep and lambs were firm and slightly dearer. Hogs were quoted at \$8.70 f.o.b. and \$9 fed and watered.

resulting from burns, which might be saved if the person who finds his clothing on fire would remember several simple facts. The head, chest and abdomen are the parts where burns so often prove fatal, and should be protected from this form of injury.

The first impulse many persons have on finding they are on fire is to run, which only fans the fire and helps to increase its fierceness. As soon as one finds his clothing is on fire he should lie down. Do this immediately and call for help. If one sees another person on fire he should throw him to the ground if it can be accomplished in no other way. Of course the next thing to do is to extinguish the flames. Any heavy garment, piece of carpet, or a rug may be used to smother the fire, or water may be thrown over the burning clothing.

When the fire has been extinguished cut away all burned clothing, taking care not to remove any that may adhere to the burned flesh. Be careful not to break any blisters, and cover the burn as quickly as possible. It is the air coming in contact with the burned surface that causes such severe pain. Any covering that will exclude the air from a burn should be applied, but if it can be obtained, soft wool is best. Pack this carefully around the burn, but in the meantime, see that someone has started for the nearest reliable physician.

While a burn on the surface that raises up the skin in a blister is not dangerous, it causes an unpleasant sensation, and may be effectively treated by excluding the air in the case of a more severe burn. Anything that will keep the air from the burn may be used. Submerging the part in water has been recommended by some physiologists, but the objection to this plan is that one can do nothing else while he is attending to the burn. Another remedy is to apply common baking soda, or coat the burned place with flour and water.

The most effective covering for burns, in the opinion of many, is adhesive plaster. This excludes all air, and the burning sensation that is usually felt for hours after one has been burned will not be noticed at all after the plaster has been applied. One can go on with his tasks and not be annoyed in the least. In fact, he will soon forget that he has been burned. In a half day the plaster can be soaked off and the burn will have ceased to cause pain.

CONTRACTOR MURDERED.

Struck With Bottle by Employee Who Had Demanded Pay.

A despatch from Winnipeg says: Hector Murray, a railway contractor, was murdered on Wednesday at Alix, Alberta, by a disgruntled employee, named Woods. Woods demanded his pay and Murray referred him to the office, whereupon Woods hit him on the temple with a whiskey bottle three quarters full. Murray died shortly afterwards. The mounted police are on the trail of Woods, who is still at large.

Hector Fabre, Canadian Commissioner in France, is dead.

Hon. George P. Graham has taken up the claims of the Grand Trunk men, recently on strike, in correspondence with President Hays.

Fashion Hints.

SEEN IN PARIS SHOPS.

Heels are to be lower.

Black satin tailormades are good.

In materials, pied de poule is one of the newest.

The smartest new hats are low, broad affairs.

The plaited frill holds its vogue wonderfully well.

Jet for buttons is not quite as popular as last year.

The colonel's plume is more than ever worn on small hats.

Shaded automobile veils are among the novelties of the hour.

Yellow is one of the favorite colors as the summer advances.

Lace and plain linen turnovers will be worn on stocks of silk.

Patent leather belts with enamelled or jeweled buckles are in the lead.

Eyelet and open work designs are seen in embroidered, laundered, turnover collars.

Often the distinctive touch of the evening gown is the one rose worn in the corsage.

French gowns are finished with large round collars of hand embroidered batiste.

Turbans are rising in height and also showing the narrow effect of the crown apex.

New and fetching are bags and belts of cretonne incrustated with fine white soutache.

Scarf silk, with deep double border, is the popular gauzy material for evening gowns.

It is quite smart to have one's belt, pumps, and handbag of the same material, whether leather or velvet.

One of the newest curtains is made of green linen appliqued with a heavy patterned copper colored Cluny lace.

Small hats of sealskin, bell shaped, with a small brim, and military turbans are to be much in vogue.

Velvet flowers are coming out for the winter, splendid convolvuli in plain or mixed colorings to be worn on velvet hats.

Hoods are seen on many of the handsomest evening capes. These are often finished with a tassel more or less elaborate.

50,000 MEN LOCKED OUT

Boilermakers at British Shipyards Told That They Need Not Report.

A despatch from London says: Lock-out notices were posted at all the Federal shipyards at noon on Friday advising the members of the boilermakers' society that their services would be dispensed with. Fifty thousand men are directly affected. The trouble is due to a strike on Thursday of the riveters employed at the Walker

shipyard at Newcastle-on-Tyne. The employers claim that this constituted a breach of the agreement between the owners and workmen, and declare that those locked out will not be allowed to resume work until the boilermakers' society guarantees a fulfilment of the terms of the national agreement for the prevention of strikes and lock-outs.

KING WILL VISIT COLONIES

The London Times Says Means Will be Found.

A despatch from London says: The Times says: Though we be many sovereign peoples, our sovereign must be one. He must hold his court not only in these islands, but, as opportunity permits, in all the chief dominions of the Crown. His most distant peoples may feel assured that means will be found for the fulfilment of his wish to revisit them as King.

STABBED AND SHOT.

Had Drinking Bout With Woman When Husband Arrived.

A despatch from North Bay says: In the Township of Ferris, 12 miles south of North Bay, a shooting and stabbing affray took place on Sunday night. A man named Rowley, sawyer in J. B. Smith's sawmill at Callander, went to the home of James McNee in the evening, and it is alleged that about 9 o'clock, after a drinking bout with McNee's wife, McNee arrived home unexpectedly and attacked the visitor with a knife and cut him seriously about the head. Then McNee secured a small 22 rifle and shot Rowley, who managed to escape from the house and make his way two miles to the Village of Callander, where Dr. De-foe dressed the knife wounds and probed unsuccessfully for the bullet, before bringing him to the hospital here.

INSANE WITH JEALOUSY.

Young Pole Murders His Sweet-

SAT DEAD ON BED.

Mysterious Death of Piano Tuner at Woodstock.

A despatch from Woodstock says: Sitting bolt upright on the edge of the bed and with an unlighted cigar in his hand, the dead body of Walter Quick was found in his room at the Royal Hotel on Monday morning. He was fully dressed. Mr. Quick, who was a young man, was employed as a tuner at the Thomas Organ Company's factory, and had been staying at the hotel while his mother was away in Cleveland. He was to have been married in a day or two to a popular Woodstock young lady.

INFANTILE PARALYSIS.

A Fatal Case Reported at Bonville Near Cornwall.

A despatch from Cornwall says: Infantile paralysis has made its appearance in this section of the country. A few days ago the three-year-old son of Nathan McLaughlin, who lives at Bonville, about twelve miles from Cornwall, was taken ill with the disease, and after enduring great suffering passed away on Sunday.

SECRETS CAN'T LEAK OUT.

Weird Story of Mute Attendants on the Turkish Cabinet.

Sigmund Muenz, the well known political essayist, has just returned to London from Constantinople. He brings an extraordinary account of how State secrets are kept by the new Turkish Government. He thus describes a Cabinet coun-

The French Government has ordered 30 new military aeroplanes.

M. Bielovucchi, the French aviator, will attempt to fly from Bordeaux to Milan.

A strong movement is afoot in Germany to bring about free trade in cattle and meat.

ONTARIO GOT \$51,973.

Amount Collected in Succession Duties Last Month.

A despatch from Toronto says: Succession duties netted the province \$51,973.24 in August, as compared with \$15,482.54 during the same month last year. Last month \$20,164 were collected from York County estates. The largest payment was that of \$13,432.93 by the executors of the late Philip Jamieson, of Toronto.

FIVE C. N. R. CARS BURNED.

Company Blames Winnipeg Strikers for Fire.

A despatch from Winnipeg says: Five box cars in the Canadian Northern yards were destroyed by fire early on Wednesday morning, and the company again claims that the fire was incendiary, and that the striking carmen, who are still out, are the guilty persons. The union men renew their denials, and there seems little prospect of proof either way.

HOMESTEAD ENTRIES.

This Year Shows a Large Increase in the Number.

A despatch from Ottawa says: Homestead entries for the six months ending July 31, 1910, show an increase of 11,852 over the similar period of 1909, the entries numbering 33,416. For July alone there were 4,260 entries, of which 1,248 were made by Canadians residing in Canada, 58 by Canadians returning from the United States, 959 by United States citizens, and with the exception of 34 entries, the whole of the remainder were made by persons from the British Isles and northern European countries, in which the Government is carrying on immigration work. Of the entries from the United States over one-half were made by people coming from North Dakota and Minnesota. Patents were issued in July, 1910, for 248,223 acres of land, as against 170,013 for the corresponding month of 1909.

STILL CRYING FOR MEN.

Nearly Ten Thousand More Harvesters Needed.

A despatch from Winnipeg says: The ten thousand harvesters who have come west this year to work in the harvest fields are not much more than half of the number needed, according to C. P. R. officials, who announce that telegrams are still pouring in from all directions asking for men.

lity turbans are to be much in vogue.

Velvet flowers are coming out for the winter, splendid convolvuli in plain or mixed colorings to be worn on velvet hats.

Hoods are seen on many of the handsomest evening capes. These are often finished with a tassel more or less elaborate.

Gilt buttons, which have been exceedingly popular on the colored tud dresses this summer, will be used on the fall gowns.

For skirt trimming nothing is better than wide folds of the same material or satin of the same color used in folds. These are untrimmed.

The liking for bits of cretonne, judiciously introduced as trimming has never been quite overcome. Every now and then it reappears, but now its popularity is seriously threatened by the Persian printed designs.

Some of the most attractive of the gold or silver embroidered shoulder scarfs or shawls have richly knotted fringe of silk shoe strings.

The new sackcloth material is an imitation of coarse packing canvas. And yet it is in reality an expensive fabric. It is a mixture of silk and wool.

Fantasies in plumage grow more and more eccentric, enormous coin spots, stripes, plaids, and iridescent coloring being displayed.

There is a disposition again to use small buttons in an ornamental way, and the return of old time "nail heads" is among the possibilities of fall.

PROTECTING FORESTS.

Penalties for Starting Fires Should be Increased.

A despatch from Ottawa says: Mr. James White, Secretary of the Conservation Commission, has returned from the west more than ever impressed with the need of protection from forest fires. "Forest fires and water-power have been the two objects to which I paid some attention during the time that I was in British Columbia. Many fires are caused by absolute carelessness, and the law will have to be made more stringent if fires are to be prevented. If a man is caught and convicted of setting fire to a valuable piece of forest land through carelessness he is fined \$50. If he sets fire to a house worth \$500 he is liable to be convicted for arson. The fire-rang- ing system is all right, but to prevent fires you must go deeper than such a system. If the punishment for carelessness is not made more severe fire will not be lessened."

STILL EXPELLING JEWS.

Exodus From Kiev Continues on Smaller Scale.

A despatch from Kiev, Russia, says: The expulsion of Jews who must return to the restricted districts set apart for them by law, continues on a small scale. A daily average of fifteen persons receive a preliminary notice to depart within a stated period. About 12 persons are peremptorily expelled every day. From July 30 to Aug. 29, inclusive, a total of 794 persons were sent away from Kiev or ordered to leave the city. During the same period 336 Jews were expelled from Solomenka and Demifka, suburbs.

lage of Callander, where Dr. Defoe dressed the knife wounds and probed unsuccessfully for the bullet, before bringing him to the hospital here.

INSANE WITH JEALOUSY.

Young Pole Murders His Sweetheart at Montreal.

A despatch from Montreal says: A young Polish girl named Schuchow was murdered on Monday night in a house in the east end of the city by her sweetheart, August Jury, a Pole, who turned the revolver on himself afterwards, and now lies in the General Hospital in a critical condition. The man was found by the police sitting on the side of the bed in which the dead girl was lying, with a bullet wound in the vicinity of his heart. The police state that the man was evidently insane with jealousy.

REUBEN LEE ARRESTED.

Charged With Attempting to Wreck a Train.

A despatch from Brockville says: Reuben Lee, a young man of twenty years, residing at Forfar, was arrested on Monday charged with attempting to wreck a train on the B. W. & N. Railway, the recently-acquired branch of the Canadian Northern, on August 8 last. Lee is accused of piling a quantity of rocks and timbers between the rails after he had been put off a train for creating a disturbance. His arrest is the second as the outcome of a drunken brawl, following a picnic at Beverley Lake.

Weird Story of Mute Attendants on the Turkish Cabinet.

Sigmund Muenz, the well known political essayist, has just returned to London from Constantinople. He brings an extraordinary account of how State secrets are kept by the new Turkish Government. He thus describes a Cabinet council:

"The Grand Vizier, flanked by Sheikhul-Islam on his right and the Minister of War on his left, presides, the other Ministers being distributed around the outer side of a table shaped like a horseshoe. Behind the chair of every Minister stands a deaf and dumb domestic who will wait on him during the proceedings, which are often prolonged over the greater part of a day, during which the nation's rulers consume vast quantities of Turkish coffee and smoke innumerable cigarettes.

"On the inner side of the horseshoe sit deaf and dumb secretaries. The accomplishments of a Cabinet Minister thus include a working acquaintance with the deaf and dumb alphabet; otherwise it would be impossible to communicate the necessary instructions to the silent collaborators."

A ROYAL CHRISTMAS.

Henry the Third believed in plenty of food at the Festive Season. In 1247 he celebrated Christmas at Winchester Castle, and the dainties for the Royal table included 48 boars, 1,900 fowls, 500 partridges, 41 swans, 48 peacocks, 260 hares, 24,000 eggs, and 300 gallons of cy-sters. The cost of the bread was £27 10s. at four loaves a penny.

NA-DRU-CO DYSPEPSIA TABLETS

relieve and cure indigestion—acidity of the stomach—biliousness—flatulence—dyspepsia. They re-inforce the stomach by supplying the active principles needed for the digestion of all kinds of food. Try one after each meal.

To My Patrons

GREETING—

As the Seed Season is nearing its close, please accept my sincere thanks for your liberal patronage, and allow me to suggest that as July 1st is practically the end, all seed accounts may be squared away by that date.

Yours respectfully,

Thos. Symington.

Napanee, June 7th.

Household Conveniences

Who said Household Conveniences. Where? Why down at Madole's, of course.

Food Choppers, Bread Mixers, Rasin Seeders, Apple Parers, Meat Presses, Egg Separators, and the very newest thing in Egg Beater and Mayonnaise Mixer.

If you want to see these just look in our east shop window. Don't be afraid to come in and ask questions either. And LAST but not LEAST the best kitchen convenience is a PENINSULA RANGE, and we will have a full exhibit of these at the Fall Fair. A representative of Clare Bros. will be there with a full display of these Ranges, and also of the famous Hecla Furnace.

Opera House, Fair Night.

For the evening of September 16th, the second night of the fair, Mr. Brisco, manager of the opera house, has been successful in securing for his patrons that well-known and popular play "Ole Olson." For the benefit of his country patrons arrangements have been made whereby they can secure reserved seats by mail. The plan for this attraction will be opened at Jessop's Drug Store on Monday, Sept. 12th. Prices 25c, 50c, and 75c.

Family Reunion.

On Friday, September 2nd, a family reunion took place at the home of Mr. and Mrs. Geo. Frisken, Richmond. The occasion of the gathering was in honor of Mr. and Mrs. James Frisken, of Seattle, who have been renewing acquaintances in this vicinity for some time. A most pleasant time was spent, dinner being served on the spacious lawn, when some twenty-two relatives partook of sumptuous spread prepared by the host and hostess. The family gathering was complete with the exception of Mr. and Mrs. David Frisken, who are residents of Carman, Man. The following families were represented at the gathering: Mr. and Mrs. Adam Frisken and family, Mr. and Mrs. John Frisken and family, Mr. and Mrs. Jas. Frisken, Mrs. Adam Frisken, senior, Mr. and Mrs. W. H. Pringle and family, Mr. and Mrs. G. H. Rankin. A most enjoyable time was the outcome of this happy gathering and the day was pleasantly spent in old time reminiscences and social intercourse.

Fireman Drowned.

Cecil Miller, of Picton, fireman on the Steamer Quinte Queen, was drowned at C. F. Allison's dock on the bay on Saturday morning last, while attempting to rescue his four-year-old son, who had fallen overboard. The steamer had just pulled out from the dock, and the little lad who had been playing on some bags attempted to look out of one of the windows when he fell out. The father hearing the cries came hurriedly out of the fire hole and jumped overboard to rescue his boy. In the meantime Mr. A. Roblin, of Sackett's Harbor, was standing on the dock, and noticing the little boy fall into the water, he immediately jumped in and brought the child to shore. The father was advised of the rescue and told to swim ashore which he proceeded to do, but when about twenty-five feet away he sank beneath the waves and did not come up again. Capt. Fred Bristow immediately had a boat lowered and the body was speedily recovered, being in about eight feet of water. The coroner who examined the remains stated that the man evidently was dead before he sank beneath the waves. Coming directly from the hot fire hole, and perspiring freely, the chilly water of the bay was evidently the cause of the unfortunate man's death. Deceased leaves a wife and three small children.

J. C. Rockwell's New Sunny South Co

As a sort of diversion local theatre goers will have an opportunity of seeing something entirely new in the amusement line at the Brisco Opera House, Saturday evening, September 10th, when J. C. newest thing in Egg Beater and Mayonnaise Mixer.

If you want to see these just look in our east shop window. Don't be afraid to come in and ask questions either. And LAST but not LEAST the best kitchen convenience is a PENINSULA RANGE, and we will have a full exhibit of these at the Fall Fair. A representative of Clare Bros. will be there with a full display of these Ranges, and also of the famous Hecla Furnace.

Meet your friends at our booth, and you may leave your parcels, etc. there while you visit the rest of the grounds.

Stove Exhibit.

At this season of the year when we are so rushed with work, we find it impossible to make any exhibit at our County show. We have more space in our store and can show you the largest and best assortment of Cast and Steel Ranges that has yet been seen in this district. We would be glad to see you when in town. Visit our store.

BOYLE & SON.

Centreville Fair takes place to-morrow, Saturday, September 10th.

Double barrel hammerless Shot Gun for sale. F. Chinneck, Jeweller, Napanee.

The schooner Winnie Wing is in the harbour with a cargo of coal for P. Gleeson.

The steamer Quinte Queen will run an excursion from Napanee to the Picton fair on Sept. 22nd, the last day of the show. For full particulars see bills.

Itch, Mange, Prairie Scratches, Barber's itch, and every form of contagious Itch on human or animal cured in 30 minutes by Wolford's Sanitary Lotion. It never fails. Sold by—T. B. Wallace

The Marks Bros. who were to have appeared at the opera house during fair week, have cancelled their engagement, but Mr. Brisco has secured a good attraction for the 16th in the production of "Ole Olson."

Owing to the inclemency of the weather the Swatiska Yacht Club regatta which was to have taken place opposite Deseronto on Labor Day had to be postponed to a later date which will be announced in due time.

J. R. Dafoe wishes to advise his customers and the general public that after the 20th of September the price of coal will advance from \$6.75 to \$7.00 ton. Parties paying cash before that date may have coal delivered at any time.

Mr. and Mrs. Chas. D. Vanalstine have returned from the west on account of Mrs. Vanalstine's health. Mr. Vanalstine has rented Mr. S. G. Hawley's house and will resume his carting business until next spring when he expects to return to the west.

Messrs. Hughs and Church, of Picton, have leased the Collier premises on Water street, and are having the building overhauled and put into shape as an evaporator, which they will conduct this fall. They expect to have everything in readiness for the receiving of apples by the first of the week.

They all speak of Simkins' Steel Range Cook Stove in the highest terms after trying it. If they do not I will take it away from them. It will save one cord of wood the year round, out of three cords, also one ton of coal out of three tons, and give better results. It will not cost you anything to try this stove. I will put it in your house at my risk and expense, and take it away cheerfully if you don't want it. It is entirely of new design with double damper drafts at each end of fire pot. I am still selling the very best Sewing Machines on the Market, with 20 years guarantee. Address

J. C. Rockwell's New Sunny South Co

As a sort of diversion local theatre goers will have an opportunity of seeing something entirely new in the amusement line at the Brisco Opera House, Saturday evening, September 10th, when J. C. Rockwell's New Sunny South company, said to be one of the strongest, brightest, most complete and capable colored organizations ever gotten together, is announced to appear. This season the performance is up-to-the minute, bright and pleasing from start to finish. There is a very ingredient of gaiety and melody and the Olio is composed of a strong array of vaudeville talent equalled by few and surpassed by none. Improved in many ways and with the introduction of much new business this odd mixture of fun, melody pantomime and comedy pretends to no higher mission than that of making a merry evening. Dating from the opening scene until the final fall of the curtain there is not a moment when some of the numerous cast are not occupied rendering matters pleasing to the audience. They present a snappy, gingery performance, well calculated to drive away the blues. The organization is accompanied by a high class solo concert band and a superb orchestra. The band will head the Koon-ton parade, which will take place at noon. The prices of admission have been placed at 25, 35 and 50c. Reserved seats are now selling at Jessop's Pharmacy.

Spoiled Pickles and Catsup

On Thursday afternoon, Sept. 8th, Mr. and Mrs. Geo. A. Blewitt took a number of friends to Forester Island in their motor boat, Zipalong. The party consisted of Mr. and Mrs. Geo.

Dr. Ash's Cholera Syrup

And all of the remedies you have been in the habit of getting at Huffman's drug store can now be procured at Wallace's Red Cross drug store, Napanee.

Bible Society.

The Rev. Hazzar, agent for the Bible Society, will hold a public meeting in the interest of that society on Monday evening, September 12th, at 8 o'clock, in the school room of Trinity Church.

Bargains in Monuments.

I wish to announce to the public, that I have a few very choice granite monuments in my yard at the rear of shop, that I will sell at very close figures. There is also an assortment of markers and posts that must be sold off regardless of cost. A call will convince you.

C. J. PAPINEAU.

Important to Ladies.

It is not often an opportunity occurs at your door to see the latest Parisian and New York styles in Hair Goods, yet such is the case, as Prof. Dorenwend of Toronto is visiting this town, and invites your inspection of these goods at his private apartments reserved at the Hotel. These Hair Goods styles, when properly adjusted protect and ornament the head, soften and beautify the expression of the face, and consequently tone up an aged appearance. Be sure and see them at Paisley House on Wednesday, Sept. 21st.

Canoe Races at Belleville.

Canoe races were held at Belleville on Monday afternoon last under the auspices of the Belleville Canoe Club. Messrs. D. Jemmett, P. Laidley, H. Steacy and B. Jemmett, members of the Napanee Canoe Club, were in attendance and participated in several of the events, and they brought home the prizes, too. Following are the events in which they were successful:

Fours, paddling, half mile straight away—1st prize, four club pennants. Gunnel Race, 100 yards—D. Jemmett, 1st. B. Jemmett, 2nd.

Doubles, half mile—D. Jemmett and B. Jemmett, 1st; P. Laidley and H. Steacy, 2nd.

Singles, quarter mile—D. Jemmett, 1st; B. Jemmett, 2nd; P. Laidley, 3rd.

Tilting—D. Jemmett, 2nd. The above members of the Napanee Canoe Club are to be congratulated on their success, in adding to the laurels brought to the town in athletic events. The boys remained over in Belleville and attended the Canoe Club dance returning the next day.

in tea must be distinctive, pleasing and unvarying to merit continuous use. The flavor of Red Rose Tea is all its own; and it never fails to win and hold approval because it never fails in quality. Try it.
